Project by Nasrat Jhedeu

Supervised by Prof. Dr. Jens Seehaver

Introduction

In the previous semester I implemented a project called "Windows to an alternate reality" inspired by cross-reality devices and what it would look like if we could see what is behind the computer. I was also interested in how we could use a device that allows us to see what is behind us. I thought about how we could use a device that allows us to see what is behind us. I thought about how we could use a device that allows us to see what is behind us. I thought about
