Kommentar

The course is given by Lika Sharifi Sadeghi, PhD Candidate at the chair of Prof. F. Eckardt

Course description

Cultural diversity is the becoming the dominant character of cities around the world. Changes in the political and economic structure of the cities, religious and tribal conflicts, war, seeking new job opportunities and technological facilities have contributed to the mobility of people around the world. Globalization has led not only to the fast transaction of capital, but also people. However, the socio-cultural restructuring of the cities has been less central to the planning discussions as the economic forces.

Is cultural diversity essentially a threat or an opportunity for the city? To find the answer, this course starts with an overview of different models of handling diversity and their implications and then probes further the theoretical aspects of multiculturalists' model, based on the utopian concept of "*Cosmopolis*" introduced by Sandercock as a site of tolerance and respect to differences: *'...a construction site of the mind and heart, a city in which there is genuine acceptance of, connection with, and respect for 'the stranger' (outsider, foreigner...), in which there exists the possibility of working together on matters of common destiny, of forging new hybrid cultures and communities.'* (Sandercock 2003: xiv). Meanwhile, an increasing number of scholars have recently started questioning commonly held view of multiculturalism and raised new critics on it, and therefore, some authors have been on the search of new approaches to manage ethnic diversity, which is mostly defined as post-multiculturalism literature. We will revisit the main contributions to this literature and examine the main failure reasons of traditional multiculturalism.

As some major religions and civilizations have been founded in the Middle East, cultural diversity has had a long history of being the source of conflict and intolerance. On the other hand, we have been witnessing some drastic changes/reformations in the social and urban atmosphere of several countries in this region, namely Istanbul, Alexandria, Cairo and Amman. One common point which has had a great influence on the socio-cultural atmosphere of the mentioned cities is that Islam is being practiced by a large number of people. In this course, several forums will be held to discuss the current processes in the mentioned cities and the relation of Islam and city planning/developments in them.

In addition to the above, three guest lecturers will be invited as well.

1432210 Segregation: Divided Cities in Europe**F. Eckardt, J. Plaul**

Veranst. SWS: 2

Seminar

Di, gerade Wo, 11:00 - 15:00, Belvederer Allee 5 - Seminarraum 005, 15.10.2013 - 31.01.2014

Kommentar

Spatial division along class and/or ethnic lines is commonplace in urban spaces around the world, varying only in the intensity of the gap between social groups. This seminar aims to discuss the history of theorizing urban segregation in the context of evolving paradigms of urban studies. In addition, we will explore current theoretical debates and practical approaches to spatial inequality. Despite the fact that segregation in European cities does not reach the same extremes as e.g. favelas in Brazil or slums in India, it significantly impacts social interactions within urban space and the urban fabric itself, thus influencing society as a whole. The seminar will consist of readings and discussion as well as case study investigations on European cities of various sizes. An excursion to Halle (Saale) (ca. 1,5h from Weimar) is planned.

Richtet sich an: Master (Architektur, EU, AdUrb)

Termine: dienstags, 11:00 bis 15:00 Uhr - 14tägig, erster Termin 15.10.2013

Einschreibung in der ersten Semesterwoche im IfEU

1432220 Urban Sociology (Introduction)**F. Eckardt**

Veranst. SWS: 2

Vorlesung

Mo, wöch., 11:00 - 12:30, Marienstraße 13 C - Hörsaal C, 14.10.2013 - 31.01.2014

Kommentar

This lecture introduces the key ideas of urban sociology. It will deliver a first understanding of the most important scholars in urban sociology from the classics (Simmel, Weber, Chicago School) to today's research. It provides furthermore a reading of historical approaches to urban studies in Germany and a reflection on important aspects of recent urban development (segregation, gentrification, multiculturalism). It pays special to the sociology of cities in disaster situations.

Kommentar

Die Vorlesung vermittelt eine architekturenspezifische Einführung in die Aufgaben, Geschichte, Theorie und Methoden der Denkmalpflege. Ein Schwerpunkt bilden aktuelle Fragen, Debatten und Ansätze, wobei auch internationale Aspekte Beachtung finden. Diskutiert werden u.a. folgende Themen: Gegenstand, Aufgaben und Institutionen der Denkmalpflege; Denkmalpflege als Spezifikum der Moderne; Denkmalbegriffe; Denkmalwerte; der Architekt/ die Architektin am Denkmal; denkmalpflegerische Praxis von der Befundanalyse und -dokumentation über Konservierung und Reparatur bis zu Umnutzung und Ergänzungsbauten; städtebauliche Denkmalpflege; inter- und transnationale sowie interkulturelle Aspekte der Denkmalpflege.

Aim

The aim of the course is to provide students with main skills in order to successfully realize an own scientific research project. The main focus therefore is on the aspects of planning an own research project and of writing a proper scientific paper.

Contents

At the beginning we will deal with the process of production of scientific knowledge as such considering basic 'rules' of scientific work. As learning by doing is usually a successful way which makes us experiencing the specific demands of a research process you will work in the course in small teams defining and planning your own research

project. Starting the practical work we will first deal with different sources of information, how to decode and evaluate them as well as how to quote and organize them properly in scientific working and writing. Now having an idea how and where to gather information you will define your own research question and develop a research concept step by step going from a proper wording of the research question to the selection of fitting research methods, time planning and documentation.

Requirements

In order to successfully complete the course a continuous and active participation in the classes is required. Students will prepare and present a brief presentation in teams. The course is held in English.

Kommentar

Dieses Seminar setzt die von den Austauschstudenten mit unserer mexikanischen Partneruniversität letztes Jahr initiierte Zusammenarbeit mit studentisch organisierten Projekten fort. Das Thema des zweiten Autokonstruktionsprojekts ist Gentrification und deshalb fachlich an den Lehrstuhl Sozialwissenschaftliche Stadtforschung angebunden. In einem ersten theoretischen Block werden neuere Forschungen zu dem Thema diskutiert, danach werden studentische Projekte in Leipzig und Berlin durchgeführt, um eigene Erfahrungen über Gentrifizierungsprozesse zu sammeln. Diese sollen in Dezember stattfinden, wenn Studierende aus Mexiko nach Deutschland kommen werden. Die Ergebnisse des Projekts sollen dokumentiert und ausgestellt werden.

Bemerkung

Instructor:

Ervin Sezgin, Research Assistant
Istanbul Technical University
Department of Urban and Regional Planning

Kommentar

The socio-political conjecture of states and societies has always found its reflection in the trajectory of border regions. In the aftermath of World War 1 they were subject of cartography with the main objective of finding the most appropriate ways for drawing the border lines, as new states were emerging. During the cold war they were the outskirts of nation states, remaining almost forgotten except military investments and have lost their contacts with neighbours while polarization was increasing between two global powers. And in the times of globalization they are declared to be bridges between societies and countries as the flows of people, commodities, capital and information increases.

The aim of the course is to follow that trajectory of border regions with a political geography perspective. An analysis of social institutions, political organizations and individual narratives will be used with that purpose.

After a relatively short discussion of historical perspectives, particular importance will be given to the impacts of globalization on border regions. Theoretical discussions will be supported by case studies from different parts of the world.

Do, Einzel, 09:15 - 12:30, 12.12.2013 - 12.12.2013

Kommentar

The study project is focusing on processes of shrinking and growing in the eastern part of Germany. The basic theses are:

- villages and towns affected by shrinkage are causing disproportionately high costs, especially infrastructure costs,
- remaining towns are suffering an asymmetry related to rural areas
- financial and structural incentives are made to attract the relocation of inhabitants from shrinking villages to towns.

Next to socio-demographic and psychological questions, this study project mainly touches questions about the „value“ and „costs“ of shrinking villages. A quantification may allow to draw first conclusions for an incentive system for moving into towns. The areas „left-behind“ might eventually become of interest for other target groups and needs.

The topic is highly transferable regarding similar spatial structures in Europe and also bears a certain political brisance.

Kommentar

Europas Städte verändern ihr Image und konkurrieren seit einigen Jahren im Ranking um das Zertifikat der „lebenswertesten Stadt“ mit großen Stadtumbaumaßnahmen in den zentralen Bereichen. Dabei entstehen komplett neue Stadtteile mit urbanen Funktionen, hohem Wohnanteil und besonderen öffentlichen Räumen. Mit diesen neuen Stadtteilen - Marseille Vieux-Port, Bahnstadt Heidelberg, Hamburg Hafencity, Lyon Confluence, Amsterdam IJ-oever usw. - , die mit unterschiedlichen Zielstellungen und Strategien entstehen, beschäftigt sich das Seminar. Dabei geht es vor allem um die Frage: „Wie erzeugt man mit Architektur 'neue' Urbanität in einem bestehenden (groß-)städtischen Gefüge?“

Das Seminar ist als begleitende Veranstaltung zu den Projekten : „For example London“ und „Spandau bei Berlin“ vorgesehen. Entwurfsteilnehmer werden bei der Einschreibung bevorzugt.

Planners and urban designers alike appreciate what is commonly understood as the “European city”: densely built, socially integrated, mixed use, walkable - altogether: a model of sustainable urbanism. But leaving the urban cores, coming into the surrounding landscape or flying in to European cities there is plenty of evidence that European cities hardly can be defined exclusively by these criteria, that they are instead part of large city regions: densely populated and built out areas integrating smaller cities, villages, and, yes, a far stretched suburban landscape with single family homes, big box service clusters, malls or factories linked by a network of highways and public transportation – an urban landscape that, already some time ago has stopped to be an area subordinated to its core city, an “In-Between-City” that even though planners may not like it, exists and will be of eminent importance as a field of action for urban planners in future: how should or can the existing post-suburban landscape be re-designed? How can auto-oriented urban structures in a post-oil age be transformed? How can single family homes neighborhoods be adapted to the needs of an aging population? How can fragmented governance structures be overcome to implement strategies of sustainable regional development? The post-suburban landscape raises many questions to urban planning and urban studies. Against the background of international debates on the development of metropolitan areas, the lecture series and the seminar will discuss different aspects of postsuburban landscapes integrating different disciplinary perspectives.

The objective of the lecture series is to provide an understanding of the complexity and heterogeneity of postsuburban spaces. It will do so on the one hand by approaching the topic from different disciplinary perspectives. Additionally the lecture series will integrate papers on specific aspects, such as terminology and urban theory, sociological aspects, building morphology or infrastructure in postsuburbia as well as case studies on selected metropolitan areas in Germany and Europe.

Planners and urban designers alike appreciate what is commonly understood as the “European city”: densely built, socially integrated, mixed use, walkable - altogether: a model of sustainable urbanism. But leaving the urban cores, coming into the surrounding landscape or flying in to European cities there is plenty of evidence that European cities hardly can be defined exclusively by these criteria, that they are instead part of large city regions: densely populated and built out areas integrating smaller cities, villages, and, yes, a far stretched suburban landscape with single family homes, big box service clusters, malls or factories linked by a network of highways and public transportation – an urban landscape that, already some time ago has stopped to be an area subordinated to its core city, an “In-Between-City” that even though planners may not like it, exists and will be of eminent importance as a field of action for urban planners in future: how should or can the existing post-suburban landscape be re-designed? How can auto-oriented urban structures in a post-oil age be transformed? How can single family homes neighborhoods be adapted to the needs of an aging population? How can fragmented governance structures be overcome to implement strategies of sustainable regional development? The post-suburban landscape raises many questions to urban planning and urban studies. Against the background of international debates on the development of metropolitan areas, the lecture series and the seminar will discuss different aspects of postsuburban landscapes integrating different disciplinary perspectives.

Building on the theoretical input of the lecture series and against the background of the idea that (post-)suburbanization is a global phenomenon, whether specific patterns of the “In-Between-City” in different national context can be identified. It will do so by discussing different aspects of spatial development of metropolitan areas in a comparative perspective. Postsuburban development in Germany will be discussed against the background of the development in metropolitan areas in the home countries of the students. Students will prepare a research report including international case studies and the synthesis of the seminar’s discussion on “post-suburban” spaces in European metropolitan areas against the background of global perspectives on the issue. Part of the seminar is an excursion to Berlin and its historic and present suburban developments (November 1st and 2nd).

The interdisciplinary and international study project is jointly organised with the Royal University of Battambang, Cambodia. It focuses on analyzing the complex interplay of a range of issues in urban development the city of Battambang faces. A sound understanding of the cultural, social, planning, and infrastructure realities and challenges will provide the framework from which solutions to some of the city’s most pressing problems will be developed.

Voraussetzungen

Directed at: Master European Urban Studies, Master Advanced Urbanism, Master Civil Engineering (2nd semester or higher), Environmental Engineering (2nd semester or higher)

Leistungsnachweis

The study project is based on group work, workshops, lecturer input and feedback. In the end of February / early March a two-week excursion to Battambang, Cambodia will complete the project. During their research stay in Cambodia students will conduct fieldwork and exchange knowledge with students from the Royal University of Battambang. Some financial assistance for travel will be available for students who are admitted to the course.

On successful completion of the course graduate students of Civil Engineering and Environmental Engineering will receive 12 credits for the course. Students of European Urban Studies and Advanced Urbanism can obtain 21 credits for the course, because additional tasks will be assigned to them.

Dates of this exercise-course are: 14.10., 04.11., 02.12., 13.01. --> students who participate in the Seminar European Suburbanism have to enrol into this moderation course!!!!

Meetings with representatives of different interest groups are important milestones in today's planning processes. The different expectations regarding the outcome of the meeting and the different backgrounds of the participants challenge the diplomatic skills of the planners who lead the discussion. The lecture teaches fundamental tools to guide group meetings and planning workshops towards a productive output. Practical exercise sessions address techniques to visualize and to moderate planning related issues. A consensus on multi-interest decisions in the urban context depends on the accurate detection of all different interests of the stakeholders involved and the right analysis of potentially conflicting positions. The implementation of informal planning strategies and dialogue based communication are discussed in the course.

Masterprojekt integrated Sanitation Systems (iSAS)**J. Stäudel**

Projekt

Kommentar

Die Nachfrage nach Energie und in wachsendem Maße ökonomische Zwänge, die abnehmende Verfügbarkeit von Siedlungsflächen und die Forderung nach effizienter Ressourcennutzung sind Themen, die weltweit bei der Realisierung von Siedlungen in Ballungsräumen stärker an Bedeutung gewinnen werden.

Wenn es nun gelingt, bei der Planung umzudenken, angepasste oder auch neue technische Lösungen zu verwirklichen, die den Ansprüchen, Bedürfnissen und Fähigkeiten der Nutzer genügen, dann kann – so unsere These – ein wesentlicher Beitrag für eine nachhaltige Stadtentwicklung geleistet werden. Übergreifende, möglichst flexible Konzepte mit innovativer Wasser- Abwasser-Infrastruktur in Städten, Kopplung von dezentralen und zentralen technischen und organisatorischen Ansätzen sollen im studentischen Projekt zusammen mit städteplanerischen und sozioökonomischen Aspekten betrachtet und erprobt werden.

Im Rahmen mehrerer Projekte wurden an der Professur Siedlungswasserwirtschaft Ansätze für einen neuen Umgang mit Wasser und Abwasser entwickelt, der auf der Nutzung von Wasser und den Inhaltsstoffen im Abwasser aufbaut. Die heute linear auf Entsorgung aufgebaute Infrastruktur soll durch Kreislauf orientierte Systeme abgelöst werden. Der Grundansatz – so eine weitere These – ist weltweit anwendbar, nicht jedoch die Ausprägung der einzusetzenden Komponenten. Das System besteht aus den Elementen Erfassung, Transport, Behandlung und Nutzung. Die Technik ist mit geeigneten Finanzierungssystemen zu koppeln.

Ziel des Projektes ist es, Kriterien für die Anpassung des integrierten Sanitärsystems iSaS auf unterschiedlichste Randbedingungen zu erarbeiten. Hierzu sind

- aus **Sicht der Umweltingenieurwissenschaften** die Anpassungsnotwendigkeiten des Gesamtsystems,
- aus **städteplanerischer Sicht** insbesondere die Transportvarianten in Abhängigkeit der Siedlungsstruktur oder auch Konzepte für angepasste Siedlungsstrukturen,
- aus **Sicht des Produktdesigns** sind Kriterien für die Gestaltung und Funktionalität des Erfassungssystems (human-technological-interface)

zu erarbeiten.

Die Erkenntnisse sind zu einem Gesamtergebnis zusammenzuführen, das für unterschiedliche Zielgruppen (Endnutzer, Planer, Entscheider) aufbereitet werden soll.

Max. Teilnehmerzahl: je 2 Studierende aus den Masterstudiengängen Urbanistik, Umweltingenieurwissenschaften und Produktdesign

Model Project Forum

P. Schmidt

Veranst. SWS: 2

Seminar

Mi, unger. Wo, 15:15 - 18:30, Belvederer Allee 5 - Seminarraum 005, 23.10.2013 - 29.01.2014

Kommentar

The seminar's goal is to exchange about and learn from different projects in the urban realm where second semester students have been involved in during their Model Project semester in summer 2011. The seminar challenges students to contextualize the own individual practical work and research experience into a broader context of urban research. It allows participants to deepen the understanding between practice and theory and to contribute real-world-experience in a reflective way. Finally, the seminar work aims also to prepare students to hold a lecture for the International Model Project Forum in front of audience that is dedicated to an overarching conference title.

The three phases of the seminar: 1.) Reporting and evaluating the Model Projects through individual presentations and group discussion, 2.) Introduction to the Model Project Forum including the preparation of and feedback on individual presentation concepts for the forum, 3.) Coached rehearsals for presentations, and last but not least the final presentations at the 12th International Model Project Forum (mid February 2012).

Participation is obligatory and only for EU students. Attested absences of more than two meetings will automatically lead to the failure of credits.

New urban mobility: Kopenhagen, Portland, Amsterdam

S. Rudder

Veranst. SWS: 2

Prüfung

Fr, Einzel, 09:15 - 16:45, Geschwister-Scholl-Str.8A - Seminarraum 105, 14.02.2014 - 14.02.2014

Politische und Ökonomische Dimensionen der räumlichen Planung

M. Welch Guerra

Veranst. SWS: 2

Integrierte Vorlesung

Mo, wöch., 11:00 - 15:00, Belvederer Allee 5 - Seminarraum 008, ACHTUNG! Raum: IfEU R 008, 14.10.2013 - 07.02.2014

Bemerkung

Montag, 11.00 - 14.00 Uhr, Belvederer Allee 5, R. 008

Start: 21.10.2013

Prüfung: 10.2.2013

Einschreibung ab 7.10.2013, Belvederer Allee 5, 1. OG

Kommentar

„Hitlers Neigung ... erfasste sehr bald auch die Städte.“

Eine kritische Durchsicht der Planungsgeschichtsschreibung

Kombiniertes Modul

Politische und ökonomische Dimensionen der räumlichen Planung

Die Planungsgeschichte gehört zu den wichtigsten Feldern der Verständigung darüber, was denn räumliche Planung ist und wie diese mit der sonstigen Gesellschaft zusammenhängt. Die deutschsprachige Planungsgeschichtsschreibung – oder Planungshistoriographie – ist zudem ein fruchtbares Feld, um unterschiedliche Möglichkeiten zu identifizieren und zu bewerten, wie über Planung mit wissenschaftlichem Anspruch geforscht und geschrieben wird.

Im Mittelpunkt des Doppelmoduls steht die Fachliteratur über die Stadtplanung und Raumordnung des deutschen Faschismus. Wir werden ausgewählte Werke gemeinsam lesen und dabei zugleich das historische Substrat – etwa Leitbilder und Entwicklungsstrategien, Verfahren und Realisierungen – sowie die Erzählstrategie und das zugrundeliegende Verständnis des Verhältnisses von Planung und Gesellschaft untersuchen. Wir schauen den Autoren gleichsam über die Schulter und werden so anspruchsvolle wie grob vereinfachende Ansätze kennenlernen (eine Kostprobe für die grob personalisierenden Ansätze ist das Zitat im Titel, entnommen dem Werk: Jörn Düwel u. Niels Gutschow. Städtebau in Deutschland im 20. Jahrhundert. Ideen - Projekte - Akteure. Leipzig/ Wiesbaden 2001, S. 111).

Die Doppel-LV wird ihr Ziel erreicht haben, wenn die Studierenden ihre Kenntnisse über die Planung in Nazi-Deutschland deutlich erweitert, einen höheren Grad der Reflexion über unser Fach erreicht, aber auch ein Problembewusstsein über die Tücken des Schreibens fachwissenschaftlicher Texte erlangt und ein Spektrum möglicher Textstrategien kennengelernt haben.

Die LV ist leseintensiv und erfordert die Bereitschaft zur theoretischen Anstrengung. Die Teilnahme Studierender anderer Studiengänge ist nur nach Absprache möglich.

Real Estate Project development - Group A

K. Hoffmann, B. Nentwig

Veranst. SWS: 2

Seminar

Mi, gerade Wo, 11:00 - 15:00, Belvederer Allee 5 - Seminarraum 007, 16.10.2013 - 05.02.2014

Real Estate Project development - Group B

K. Hoffmann, B. Nentwig

Veranst. SWS: 2

Seminar

Mi, unger. Wo, 11:00 - 15:00, Belvederer Allee 5 - Seminarraum 007, 23.10.2013 - 31.01.2014

Kommentar

Constitutive on the course Basics and Methods of Real Estate Project Development a development task is the main topic of this course. Characteristics are market and location analysis, concepts for estimated usage and economic calculations. Additional information will be given in the first course.

Städtebauliche Denkmalpflege - Buchenwald als städtebauliches Denkmal? Erkundung zwischen Stadt und Gelände

H. Meier

Veranst. SWS: 3

Seminar

Mi, Einzel, 11:00 - 12:30, Belvederer Allee 5 - Seminarraum 008, ACHTUNG! Raum: IfEU R 008, 23.10.2013 - 23.10.2013
Mi, Einzel, 13:00 - 16:45, Treffpunkt Buchenwaldinformation, 20.11.2013 - 20.11.2013

Mi, Einzel, 13:00 - 16:45, Treffpunkt Buchenwaldinformation, 27.11.2013 - 27.11.2013
 Mi, Einzel, 13:00 - 16:45, Treffpunkt Buchenwaldinformation, 11.12.2013 - 11.12.2013
 Mi, Einzel, 13:00 - 16:45, Treffpunkt Buchenwaldinformation, 15.01.2014 - 15.01.2014
 Mi, Einzel, 13:00 - 16:45, Treffpunkt Buchenwaldinformation, 29.01.2014 - 29.01.2014

Bemerkung

Die Einführungsveranstaltung findet statt am 23.10., 11.00 Uhr im IfEU, Raum 008.

Das Seminar wird in 5 Blöcken a 6 SWS angeboten.

Kommentar

Ziel des Seminars ist die Vertiefung der Grundlagen zur städtebaulichen Denkmalpflege aus der Denkmalpflegevorlesung. Dazu soll am Beispiel der Gedenkstätte Buchenwald die Frage erörtert und diskutiert werden, ob und wann Buchenwald eine Stadt war bzw. städtische Strukturen aufwies, inwieweit diese überliefert sind und welche Bewertungs- und Umgangsoptionen aus Sicht der Denkmalpflege daraus abzuleiten wären.

Voraussetzungen

begleitender Besuch aller Vorlesungen Denkmalpflege und Heritage Management.

Leistungsnachweis

Vorbereitung und Vorstellung eines Themengebietes in Gruppenarbeit und aktive Beteiligung an den Diskussionen.

Referat

Streetphotography History, composition, practice

S. Rudder, I. Brückner, C. Oppen

Veranst. SWS: 2

Seminar

Mi, wöch., 11:00 - 12:30, Geschwister-Scholl-Str.8A - Seminarraum 105, 23.10.2013 - 31.01.2014

Voraussetzungen

Abschluss Bachelor

Kommentar

Das Institut für Europäische Urbanistik führt in diesem Wintersemester erstmals die öffentliche Ringvorlesung Urbanistik durch. Interdisziplinär und international angelegt, widmet sich die Ringvorlesung einem aktuellen Thema der Stadtentwicklung ganz im Sinne des Instituts für europäische Urbanistik. In diesem Sinne wollen wir aktuelle Debatten und Diskurse in die Universität tragen und diese auch über die Universitätsöffentlichkeit hinaus zugänglich machen.

Wir beschäftigen uns in diesem Semester an den Professuren für Stadtplanung (Prof. Dr. Schöning), für Städtebau I (Prof. Dr. de Rudder) und für Denkmalpflege (Prof. Dr. Meier) mit der Bahn, da die Entwicklung der Schieneninfrastruktur in Thüringen – als Stichworte sollen das Verkehrsprojekt Deutsche Einheit Berlin/München via Erfurt und die Debatte um eine „S-Bahn“ zwischen Erfurt, Weimar und Jena genügen – Auswirkungen auf Siedlungsgebiete, Bahnhofsumfelder und Bahnhöfe als Bauten haben werden. Dieses soll durch die Ringvorlesung begleitet, die entstehenden Planungskonzepte und Entwürfe in die Debatte eingebettet und die Lehre in Urbanistik und Architektur miteinander verwoben werden.

Urban traces of violence

H. Meier

Veranst. SWS: 2

Seminar

Do, wöch., 15:15 - 16:45, Geschwister-Scholl-Str.8A - Seminarraum 002, 24.10.2013 - 31.01.2014

Bemerkung

Es findet eine Blockveranstaltung statt, deren Tag gemeinsam festgelegt wird:

ein Nachmittag von 13.00 - 18.00 Uhr und der anschließende Tag von 9.00 - 19.00 Uhr

Kommentar

1. inhaltliche Beschreibung

In the context of the recent 10th anniversary of 9/11, this course proposes to re-evaluate the role of often-ignored destroyed architecture in the current cultural heritage discourse. Destroyed architecture as well as the process of destruction is usually written out of the histories of urban production and discussed only as a by-product of violence, assumed to be foreign to the contemporary city. In her book *Enduring Innocence* (2005), Keller Easterling argues that destruction (or what she calls “subtraction”) has been “at least as important as the making of building during

the last half-century” but that surprisingly architecture as a discipline “has not institutionalized special studies of subtraction.”

What is the place of destruction and indeed of violence in the 21st century city? What architectural forms bear traces of violence and how do we commemorate those traces? Do plaques, tablets or monuments in our cities help remember a civic or military resistance to violence or do they reinforce the violence itself? What is the relationship between violence, architecture and a city’s memorial landscape? Which institutions determine acceptable heritage practices and how do these practices function within a larger academic discourse on modernity and modernism?

These broad questions will guide students through a series of lectures and design workshops that study post-war/ industrial/colonial urban traces of violence: their materiality, morphology and tectonic specificity. Students will address the ruin and its place in modernist planning in aesthetic, architectonic and cultural terms. They will engage with the discourse on violence and culture by tracking how the ruin (and its representation) entered public aesthetic sensibilities in the form of artificial and authentic ruins, reconstructions, memorials, models, photographs and films. From wartime and post-industrial decay, to heritage zones and holocaust memorials, students will survey current literature on the representation of violence on architecture. They will examine heavily destroyed Eastern and Central European cities such as Warsaw, Berlin and Dresden as well as North American cities such as New York (World Trade Center commemoration) and Detroit (commodification of the post-industrial ruin).

During a final two-day design *charrette* students, working in small groups, will propose, situate and document their own architectural interventions within the fabric of Weimar.

Leistungsnachweis

Attendance and participation:	20% (including student-led sessions and peer review)
Blog posts (3):	20% (including presentations)
Design <i>charrette</i>	30% (entire group graded)
Critical essay:	30%

Whose Public Spaces?

Kommentar

The course is given by the two PhD Candidates Andrea Variale and Sandra Schindlauer on behalf of the chair for Spatial development and planning

“Public spaces” is a relevant topic in urban studies for both its salience in urban studies and for the political sensitivity of the issue. In our opinion, these two aspects are closely interrelated. The recent protests on Taksim Square in Istanbul, e.g., can be seen as an evidence of this assumption. Furthermore protests on public spaces can be

easily integrated in the ongoing “Right to the City” debate initiated by Don Mitchell (2003) and Neil Smith (1996). In Germany, this debate was prompted by the so called “SOS” strategy (Sicherheit, Ordnung, Sauberkeit) of the Deutsche Bahn, a concept being now used as a legitimation for the exclusion of undesired groups in public spaces.

We would like to cover these issues by emphasizing how political authorities may take advantage of subjective feelings such as insecurity, which is often amplified by the media. We also wish to discuss the effectiveness and reasonableness of strategies like the famous “Zero Tolerance Policy”, which supposedly reduces crime rates in the city and make its areas, including public spaces, allegedly safer. We would also like to offer an overview of different practices which aim to limit the access to public spaces. Privatization processes, conflicts of interest, the purposeful design of public spaces, the 24/7 surveillance and other restrictive mechanisms will be discussed with regard to their obvious, hidden and unintended (side)effects.

At the same time, we will stress the role of citizens. It is too easy to hand over the responsibility for restrictive actions solely to the authorities, since policies can and must somehow be accepted and justified by the public. Hence, we will also draw attention on the behavior and reactions of citizens to different policies regarding public spaces. This part will deal with questions such as: Why are some restrictions of public spaces accepted, while others trigger massive protests? Why do we sometimes accept exclusion or even ask for it? Are some restrictions perhaps necessary for the upkeep of public spaces, or is this a contradiction in itself? How do personal concerns about security affect our expectations on public spaces?

In this manner we would like to encourage students to question their own thinking and behavior. We thus also hope to raise the students’ awareness about the importance of people’s preconception to understand why certain uses of public space are perceived as more legitimate than others.

Leistungsnachweis

Altogether, the students will have to perform three tasks in order to successfully complete the semi-nar: (1) presentation of one of the provided texts and active participation during the workshop phase, (2) choose and analyze a public space in Erfurt and present the results during the excursion and (3) write a short paper (5-6 pages). The paper may consist of: (a) a critical commentary/reflection on two of the texts provided, (b) a summary or further reflection about the public space presented in Erfurt or (c) they may write about a new public space, i.e. a public space neither dealt with in the workshop, nor in the excursion.
