Beschreibung

The lecture focuses on recent debates in urban research deriving from the perspectives of urban planning, urban design and landscape planning and architecture. Starting from these debates, it discusses methodological questions applied in different fields and contexts of urban and planning research.

119222903 Social Housing Policy in Europe from a City Perspective**A. Bertini Schuldt**

Veranst. SWS: 2

Seminar

Do, wöch., 11:00 - 12:30, Belvederer Allee 5 - Seminarraum 008, 17.10.2019 - 06.02.2020

Beschreibung

The seminar will attempt to give a general overview of the different social housing models in Europe, as well as developments in terms of discussion related to the topic inside of the European Union. After the general overview, the discussion will focus on specific cities in order to understand the impact of the different models at local level, especially over housing supply and social mix. It will also look into ways in which the European Union influences the housing policies of its Member States, despite the fact that in reality there is no European housing policy. Does it contribute social and affordable housing provision or is it rather on the way? Emphasis will be given here to EU competition law, State aid regulation, and its influence over the Netherlands and Sweden, based on the State aid cases against these countries and what it meant to Amsterdam and Stockholm in terms of policy changes. Overall, the approach to social housing will be a multidisciplinary one, combining legal, economic, and governance issues.

The exercise seminar will deepen knowledge about the process of the production of scientific knowledge, basic 'rules' of scientific work and proceedings of academic research such as different methods in urban studies. Students will be enabled to formulate an own research interest and research topic. They will define their own research question and develop a research concept step by step going from a proper wording of the research question to the selection of fitting research methods.

The seminar is based on exercises and the active involvement of students, who will shape the content according to their research interests and required methods.

Di, Einzel, 13:30 - 16:45, Belvederer Allee 5 - Seminarraum 008, 04.02.2020 - 04.02.2020

Beschreibung

"Introduction to European Cities" is a reading seminar that is closely linked to the lecture "European Cities I". It provides comprehensive knowledge of European city development and introduces students to key texts in urban studies. The seminar systematically deepens the topics introduced in the lecture. We will read selected texts, critically reflect upon them, and use them as the basis for group works and discussions. Doing so we will familiarize ourselves with relevant current and historical positions and research on European cities. Topics to be discussed include the European city as analytical and normative concept, neoliberal urbanism, postsocialist urban transformation, material and immaterial urban heritage. The seminar is held every two weeks.

Mo, Einzel, 09:15 - 12:30, Geschwister-Scholl-Str.8A - Seminarraum 002, 16.12.2019 - 16.12.2019

Beschreibung

Sizilien ist nicht nur die größte Insel des Mittelmeers, auf ihr haben auch alle mediterranen Kulturen ganz wesentliche bauliche Zeugnisse hinterlassen, die den transkulturellen Austausch seit Jahrtausenden bezeugen. Der Überlieferung dieser Zeit- und Kulturschichten und dem Umgang mit ihnen wollen wir auf der Exkursion nachspüren. Schwerpunkte sind (voraussichtlich) Palermo mit hauptsächlich normannischen und barocken Bauten, Agrigent als ehemals griechische Kolonie und Gibellina Nuova als Neustadt, in der sich nach dem Erdbeben von 1968 Künstler und Architekten aus aller Welt an der Neugründung beteiligten.

Das Vorbereitungsseminar wird in drei Blockveranstaltungen durchgeführt, die Exkursion findet im Frühjahr vor Beginn des Sommersemesters statt.

Beschreibung

Augmented reality (AR) is gaining importance rapidly in all spheres of our collective existence. A rendered design proposal – until now existing only in virtual or on paper, and the urban environment where this proposal should be implemented, can now exist in one reality. With the rise of smartphone devices capable of producing and displaying interactive augmented reality environments, the vast potential of AR has become available to anyone at any place at any time. On one side, there are many concerns and critiques forecasting that AR will become a real-world amplification of what we are seeing online as an advertisement and social media. On the other, a 2017 study of the game's play, found that AR added depth to player's experience of public space.

In this seminar, we will be joining the debate and exploration of this new field under the question: what are the actual possibilities of augmented reality in urban design? Is it just a playground for the companies to project advertisements onto the soccer field during a match or visually recreate dead artists to appear on a concert stage? Or, is the democratization of the urban design and city planning through AR and smartphones a significant shift in the agency when negotiating over the urban?

In the first part of the seminar, we will read texts, which will set up a theoretical base and frame the scope of our discussions. Once we have outlined the issues, we will utilize AR tools to address these issues. For this reason, students interested in this course should have curiosity and interest in the use of apps and smartphones. However, previous knowledge of coding or any developer programs is not necessary. An instructional workshop will be provided during the course. Additionally, you should have or be able to acquire for the duration of the course either an android or iOS-operated smartphone (alternately a tablet), and a laptop.

119222604 Urban Landscapes - reading urban structures. Linear open spaces

S. Signer

Veranst. SWS: 2

Seminar

Di, wöch., 11:00 - 12:30, Belvederer Allee 5 - Seminarraum 005, 15.10.2019 - 28.01.2020

Beschreibung

Streets, alleys, promenades and boulevards together form the group of linear public spaces. They characterize the appearance of the cities like hardly any other free space typology. In contrast to parks and squares, which, because of their limited space and bundling function, are usually special spaces, roads form the basic framework of a city. In addition to the general characteristics of roads, to connect places and to ensure the transport of people and goods, they are used above all for living, trade and work. For this reason, they influence the cultural, social, economic and increasingly ecological nature of cities and undergo continuous change processes. In particular, the seminar deals with the reasons, aims and results of this transformation and attempts to derive general topics through documentation, categorization and interpretation that could be of importance in the current urban discourse (Conversion of the car-friendly city, Development of environmentally friendly mobility, productive City, roads as green infrastructures). Against the background of historical circumstances, social circumstances and spatial factors, selected linear public spaces are analyzed and reflected on both textually and graphically.

119222804 Seeking Spatial Justice: Transformations of the US-American Ghetto

B. Zamzow

Veranst. SWS: 2

Seminar

Mo, wöch., 13:30 - 15:00, Belvederer Allee 5 - Seminarraum 005, 14.10.2019 - 27.01.2020

Beschreibung

There is the invention of a place in the inner city that restricts its citizens from free movement spatially, economically, politically and socially. And there is paternalistic urban theory and planning outcomes on how to achieve an orderly citizen who aspires social uplift and a middle-class lifestyle. Both shaped the modern metropolis of the 20th century. What comes after it? What is postmodern city planning in a setting like the U.S. based upon from a sociology

perspective? Investigating how to achieve a good life for all in social housing transformations, the seminar will conclude what urban revitalization needs to be based upon in order to work: Spatial Justice (Edward Soja, 2010). This is a seminar conceptualized as mainly rigorous scientific text analysis, which is a skill that will be helpful for the students' research projects in the next semesters.

How can we create cities that are inclusive – especially for those who are excluded from public services or even excluded from a city (and a country)? The seminar "Solidarity Cities" aims to explore the interrelations between urban spaces, migration and political and activist strategies for an inclusive and humanitarian city. Conceived as a cooperation between the MFA program of "Public Art and New Artistic Strategies" and the Bachelor of "Urbanistik", it prepares students to better understand urban politics within the EU's migration regime from a social science perspective. Additionally, it engages students in the critical reflection and artistic production around the subject of solidarity cities. Students are free to join an interdisciplinary group focussing on a theoretical or an artistic approach. "Solidarity Cities" tackles questions of national and transnational migration regimes and cities' agencies as well as intermunicipal networks of social movements and political actors. There is the chance to discuss the topic with international examples as well as within the local context of Thuringia. The seminar is embedded in the so called "Urban Thinkers Campus". This includes a conference in cooperation with the UN Habitat and the Thuringia State Ministry of Migration, Justice and Consumer Protection that will take place in December 2019. The students will get the opportunity to participate at the conference with a theoretical or artistic project.

The seminar consists of three parts:

x Input sessions in October

x Mentored group work in November

x "Urban Thinkers Campus" Conference in December

Students are requested to produce a theoretical or artistic output for the conference. Eventually, there is the opportunity to exhibit the works at the Bauhaus Museum. The seminar will be taught in English or German (according to the students' needs there is the possibility to split up into groups).

119223302 Evolutionary Design Methods (EDM) - Advanced

R. König

Veranst. SWS: 2

Seminar

Di, wöch., 13:30 - 15:00, Belvederer Allee 1a - Allg. Medienpool 003, 15.10.2019 - 28.01.2020

Beschreibung

Voraussetzung für die Belegung dieses Kurses ist die Teilnahme an einem Kurs der Professur Computational Architecture in einem der letzten Semester, oder gute Programmierkenntnisse. In diesem Seminar werden vor allem die Programmier-Fähigkeiten und deren kreative Anwendung vertieft.

Inhaltlich befassen wir uns mit der Kombination verschiedener räumlicher Analysemethoden mit innovativen generativen Methoden und evolutionären Algorithmen zur Optimierung bestimmter Aspekte urbaner Planungen, städtebaulicher oder architektonischer Entwürfe. Die im Rahmen von Online-Seminaren vermittelten Kenntnisse werden in Konsultationen vertieft. Neben regelmäßigen Übungsaufgaben besteht die Semesterleistung in der Implementierung einer selbst definierten Aufgabe, welche die im Rahmen des Seminars erlernten Fähigkeiten anhand eines praktischen Beispiels anwendet.

119223303 Urban Modeling and Simulation (UMS) - Introduction**R. König**

Veranst. SWS: 2

Seminar

Mi, wöch., 11:00 - 12:30, Belvederer Allee 1a - Allg. Medienpool 003, 16.10.2019 - 05.02.2020

Beschreibung

Im Rahmen des Seminars werden die Teilnehmer in Methoden der Stadtsimulation eingeführt. Wir werden uns mit der Modellierung komplexer räumlicher Systeme auf regionaler und urbaner Ebene befassen. Es werden Analyse zur Nutzung urbaner Strukturen eingeführt (z.B. Fußgängerströme oder ökonomische Potentiale) sowie Modelle für Interaktionen von Flächennutzungen vorgestellt. Es wird vorgestellt, wie mittels System Dynamics Modellen zeitliche Veränderungen von „Stocks and Flows“ simuliert werden können.

Bemerkung

Die im Rahmen von Online-Seminaren vermittelten Kenntnisse werden in Konsultationen vertieft und anhand mehrerer Übungsaufgaben belegt. Es sind keine technischen Vorkenntnisse erforderlich.

Vorlesung

Do, wöch., 17:00 - 18:30, Coudraystraße 9 A - Hörsaal 6, 17.10.2019 - 06.02.2020

Do, Einzel, 13:30 - 15:00, Marienstraße 13 C - Hörsaal D, 20.02.2020 - 20.02.2020

Beschreibung

What is the "European City"? How did cities in Europe develop historically? And what are trends and challenges that characterize contemporary European urban development?

By engaging with these questions, the lecture provides basic and interdisciplinary knowledge on European urban development. It discusses central concepts related to the "European City", provides an overview of foundational research, and explores new strands in urban studies. It illustrates these developments with case studies from different European cities. In the first part, the lecture reflects on the history of urban development and the material and immaterial urban heritage in European cities, and engages with the analytical and normative dimensions of the "European City". In the second part, it confronts the conceptual and theoretical concepts with current socio-spatial, economic and political developments in different European cities, such as neoliberal urbanism, processes of postsocialist urban transformation or the construction of heritage.
