6 October 2018

After listening to your feedback about the grading of the Assignments and consulting Prof. Wüthrich, I decided to **revise the Grading Criteria for the Assignments**. The current method is **official** and **definitive**.

Current Criteria

- The Exercises Mark will be computed from the average between the marks of the Assignments 1 to 5.

- If the average is <=**80%** the Mark will be linearly mapped in an interval where **50% = 4.0** and **80% = 1.0**.

- The Student will reach the **1.0** with an average >**80%**.

- The Student, who has an average >=**85%**, will be awarded with a 0.3 bonus on the Final Grade.

- The Student, who will successfully complete also the Bonus Assignment, will receive an additional 0.3 bonus on the Final Grade.

- The two bonuses are **NOT** related in any way.
