

# Computational Argumentation at Webis

Winter term 2018

Yamen Ajjour, Henning Wachsmuth, Benno Stein

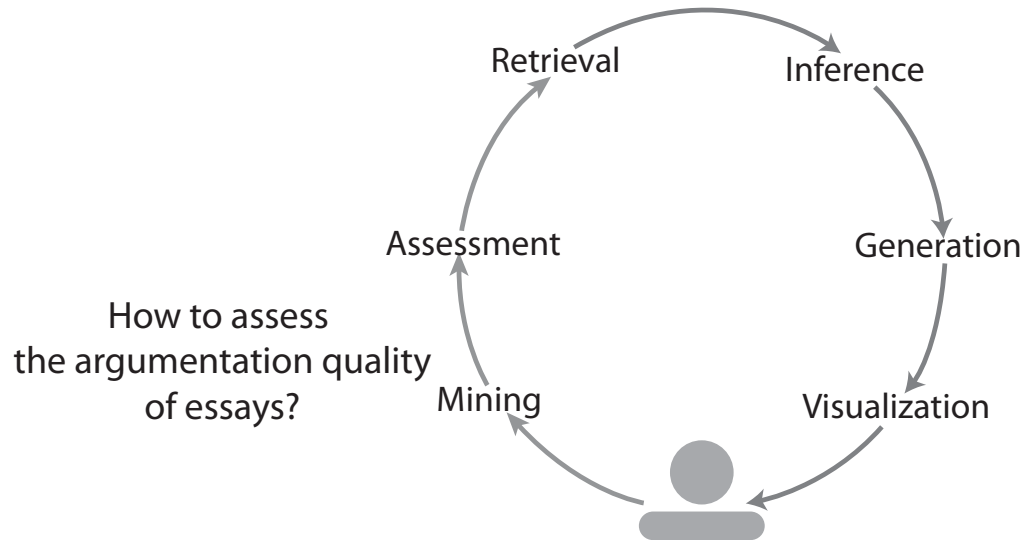

# Computational Argumentation at Webis

## Overview

# Computational Argumentation at Webis

## Overview

# Computational Argumentation at Webis

## Essay Scoring

Essay scoring task: given a prompt and an essay written against it how to automatically assess the quality of the essay ?

Prompt: Using computer daily can have more negative than positive effects on your children? do you agree or disagree?

Quality dimensions:

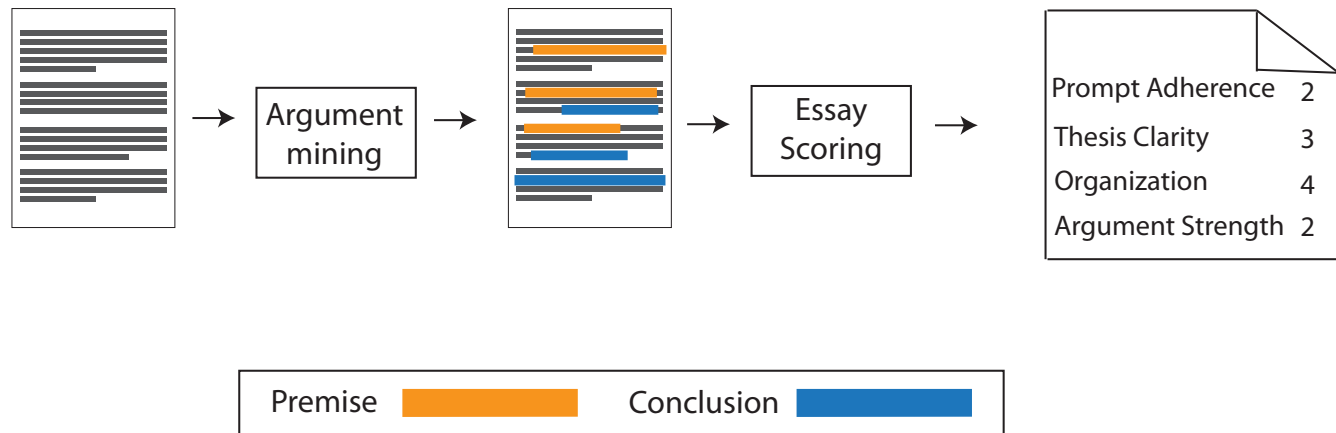

- ☐ Prompt Adherence
- ☐ Organization
- ☐ Thesis Clarity
- ☐ Argument Strength
- ☐ ..

# Computational Argumentation at Webis

## Argument mining for essay scoring

How to use the output of argument mining for essay scoring ?

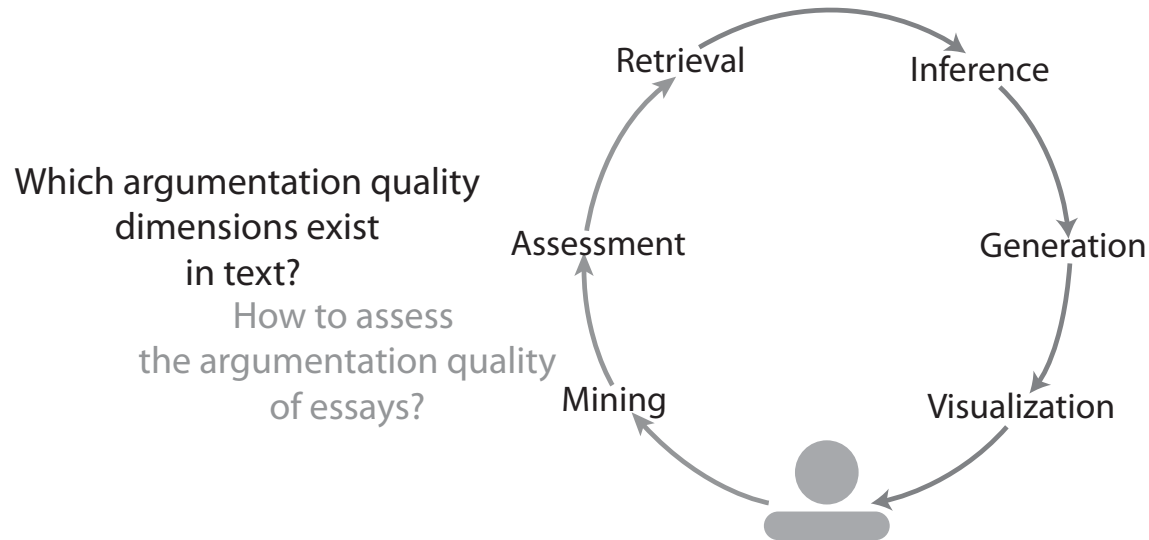

## Contributions

- ❑ State-of-the-art approaches for scoring the organization and argument strength of an essay

# Essay scoring demo

# Computational Argumentation at Webis

## Overview

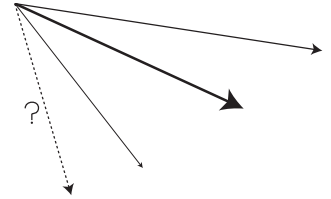

# Computational Argumentation at Webis

## Argumentation Quality in Natural Text

Which quality dimensions are there for argumentation in natural text ?

How do these dimensions relate to each other ?

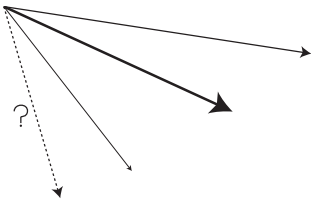

# Computational Argumentation at Webis

## Argumentation Quality in Natural Text

Which quality dimensions are there for argumentation in natural text ?

How do these dimensions relate to each other ?

Which level of granularity are these dimensions associated with ?

Argumentation Granularity

Argument Granularity

Argument Unit Granularity

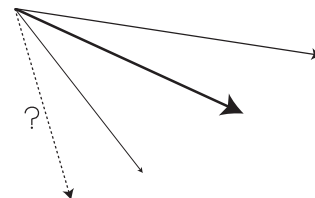

# Computational Argumentation at Webis

## Argumentation Quality in Natural Text

Which quality dimensions are there for argumentation in natural text ?

How do these dimensions relate to each other ?

Which level of granularity are these dimensions associated with ?

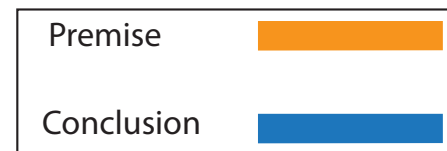

Argumentation Granularity

Argument Granularity

Argument Unit Granularity

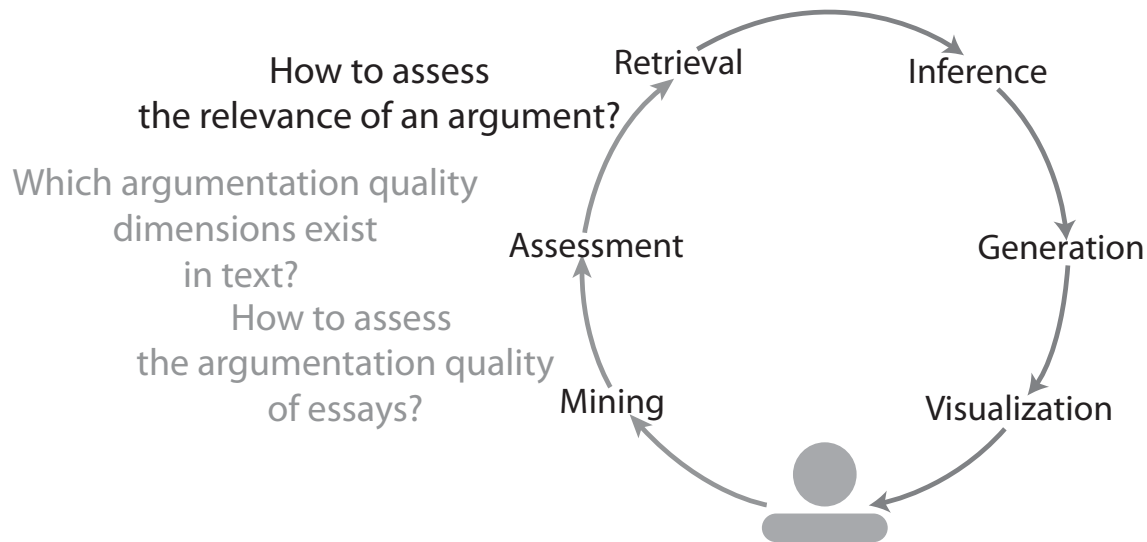

## Contributions

- ❑ Comprehensive survey of argumentation quality dimension
- ❑ Holistic taxonomy of quality dimensions and their relations
- ❑ Annotated corpus for computational argumentation quality

# Computational Argumentation at Webis

## Overview

# Computational Argumentation at Webis

## Argument Relevance Assessment

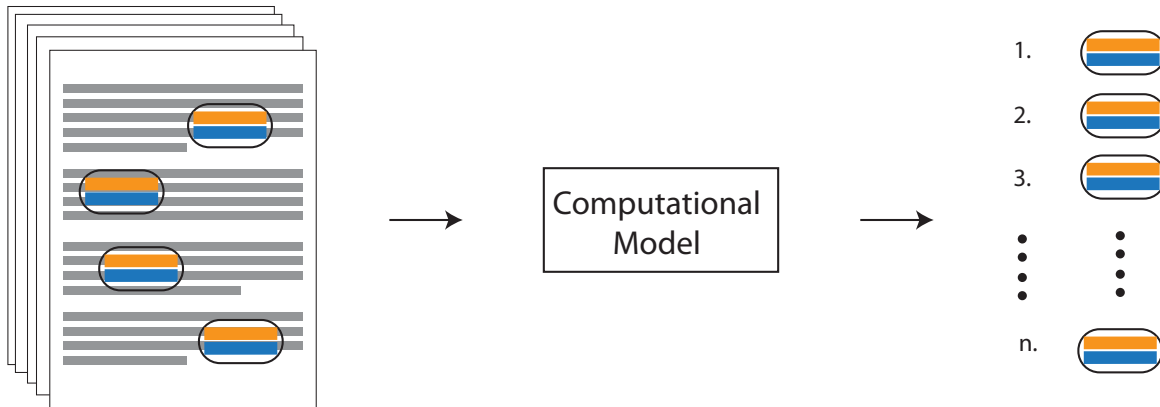

Argument relevance is one dimension of argument quality and measures the contribution an argument makes in resolving a debate.

# Computational Argumentation at Webis

## Argument Relevance Assessment

Argument relevance is one dimension of argument quality and measures the contribution an argument makes in resolving a debate.

How to computationally assess argument relevance ?

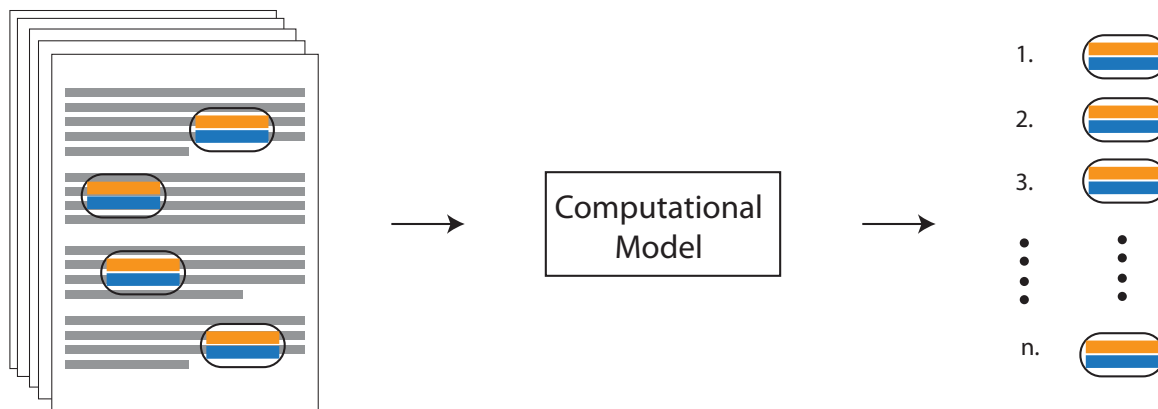

# Computational Argumentation at Webis

## Argument Relevance Assessment

Argument relevance is one dimension of argument quality and measures the contribution an argument makes in resolving a debate.

How to computationally assess argument relevance ?

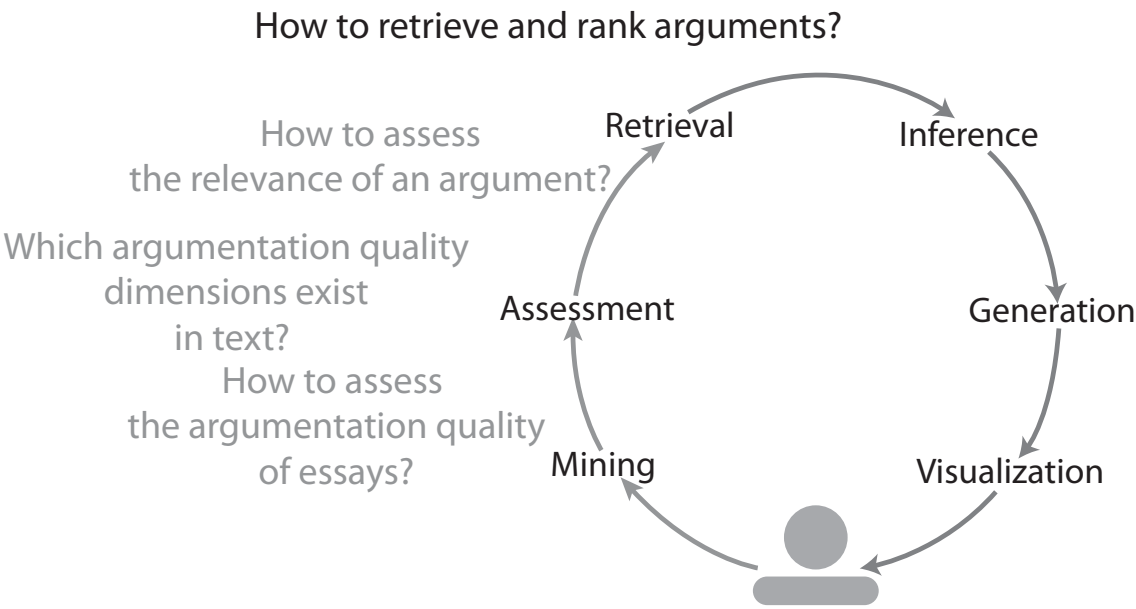

## Contributions

- ❑ Computational model to assess argument relevance objectively
- ❑ Benchmark ranking dataset for argument relevance

# Computational Argumentation at Webis

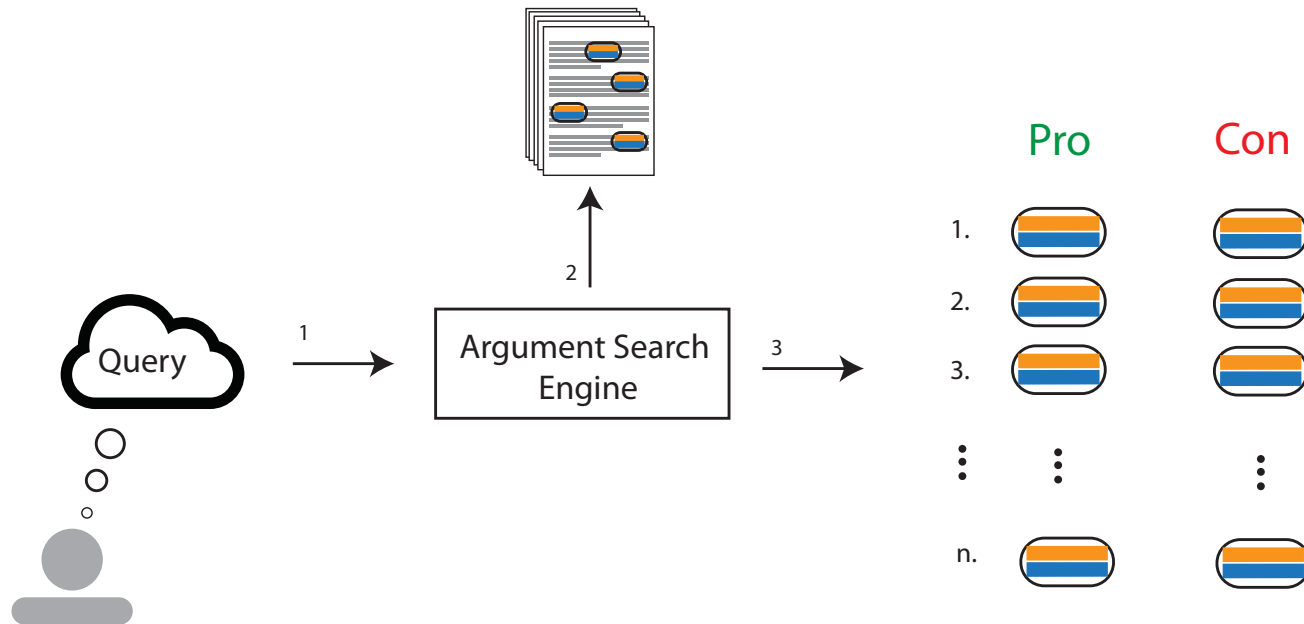

## Overview

# Computational Argumentation at Webis

## Argument Search Engine

Argument search engine retrieves the best arguments which support or attack a given query

# Argument search engine demo

# Computational Argumentation at Webis

## Challenges in argument search

### Query identification and comprehension

- ❑ How to find whether a query requires an argument?  
Examples: **banning burqa** , **earth is round**
- ❑ How to retrieve relevant arguments to the query?
- ❑ How to find whether an argument is for or against the query ?

# Computational Argumentation at Webis

## Challenges in argument search

### Query identification and comprehension

- ❑ How to find whether a query requires an argument?  
Examples: **banning burqa** , **earth is round**
- ❑ How to retrieve relevant arguments to the query?
- ❑ How to find whether an argument is for or against the query ?

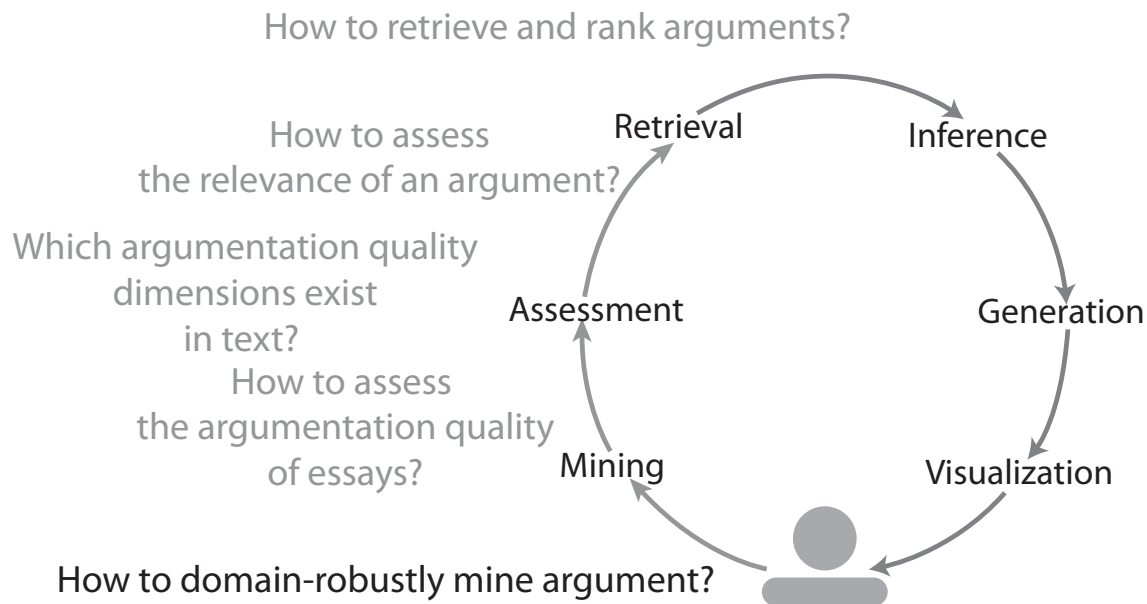

### Argument Ranking

- ❑ Should arguments be ranked objectively or subjectively?
- ❑ Which quality dimensions should be considered for argument ranking?

# Computational Argumentation at Webis

## Overview

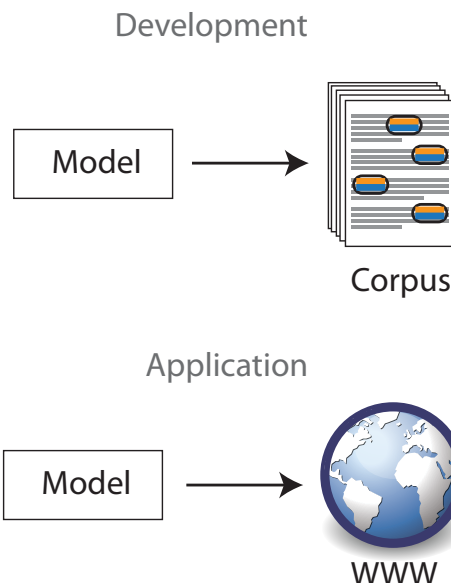

# Computational Argumentation at Webis

## Domain Robustness in Argument Mining

Computational models for argument mining rely on an annotated corpus to acquire the knowledge needed to extract arguments in real world applications

- ❑ Existing models are developed for one domain, e.g. essays
- ❑ Models are domain-dependent and fail to generalize to other domains
- ❑ Corpora creation is very expensive

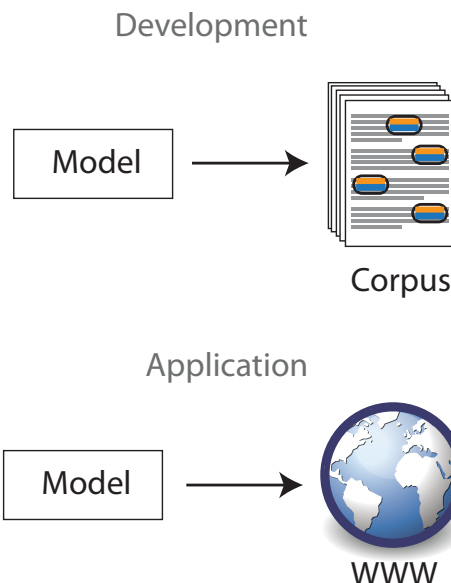

# Computational Argumentation at Webis

## Domain Robustness in Argument Mining

Computational models for argument mining rely on an annotated corpus to acquire the knowledge needed to extract arguments in real world applications

- ❑ Existing models are developed for one domain, e.g. essays
- ❑ Models are domain-dependent and fail to generalize to other domains
- ❑ Corpora creation is very expensive

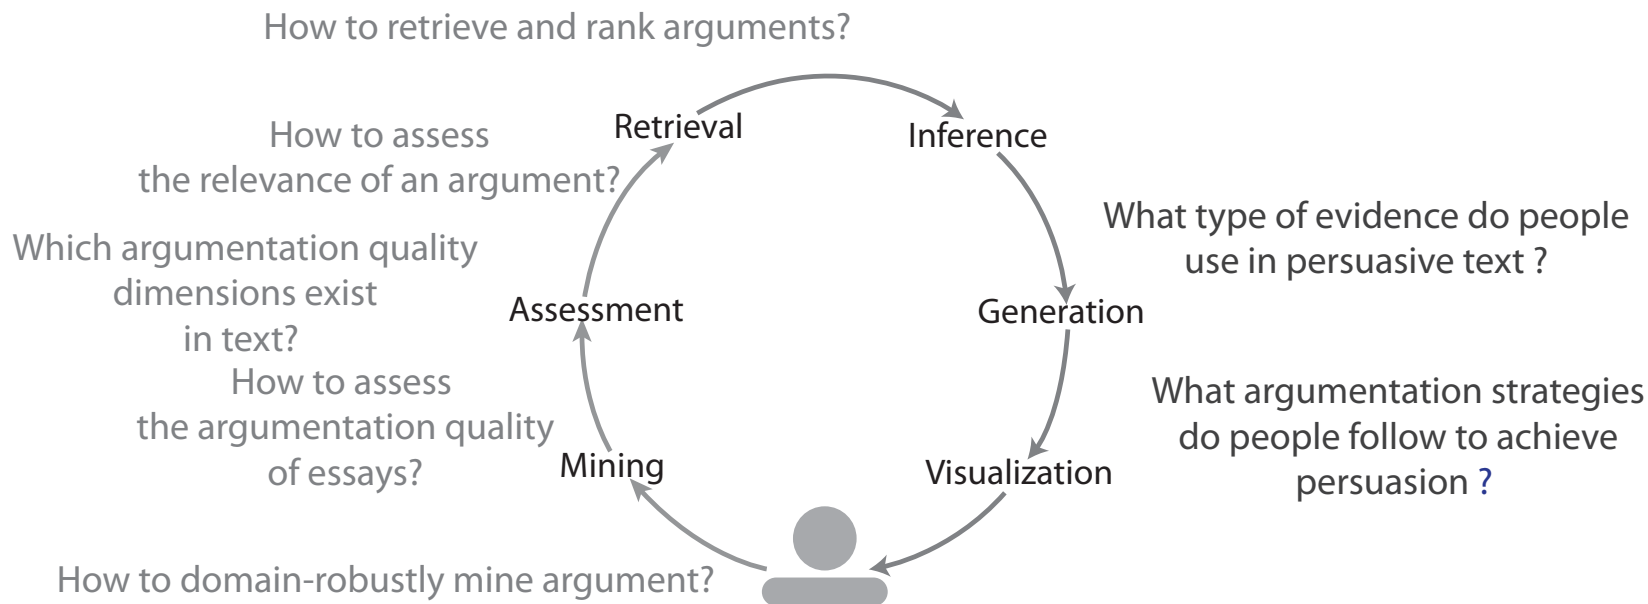

How to model argumentation on the Web ?

How to domain-robustly mine the Web for arguments ?

# Computational Argumentation at Webis

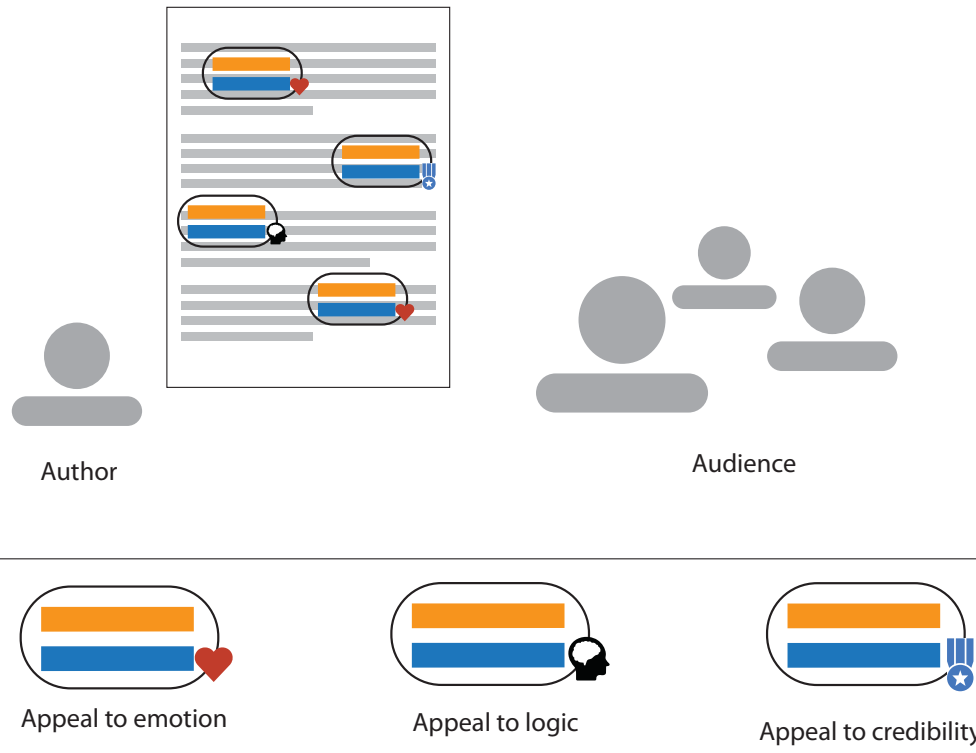

## Overview

# Computational Argumentation at Webis

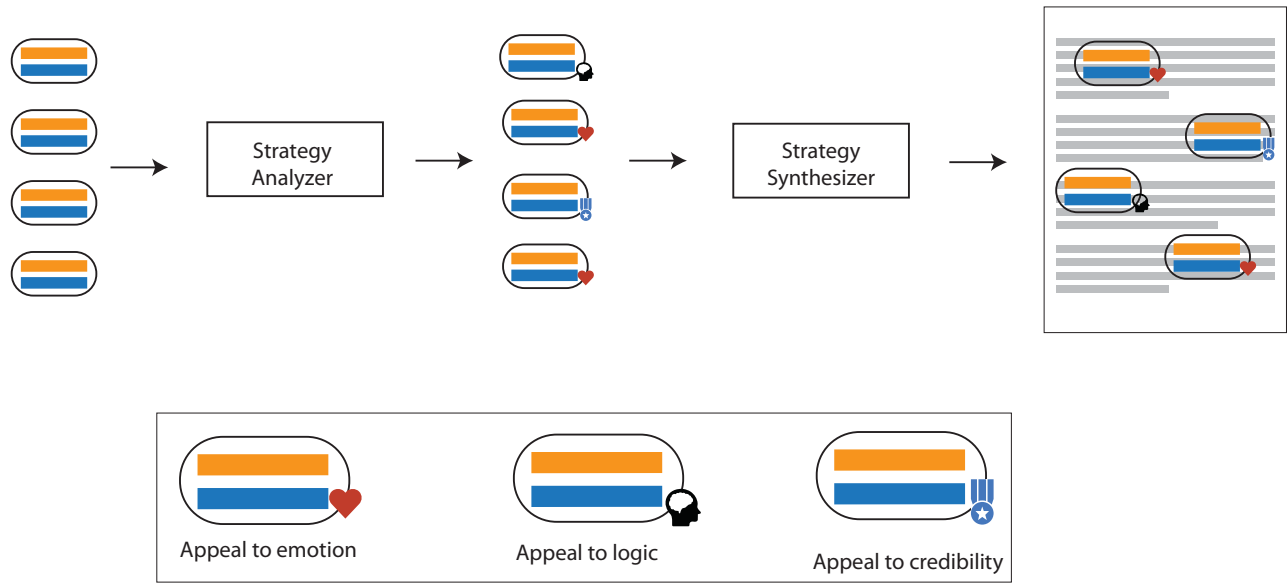

## Argumentation Strategies

Argumentation strategies are guiding principles to choose, arrange and phrase arguments to achieve persuasion

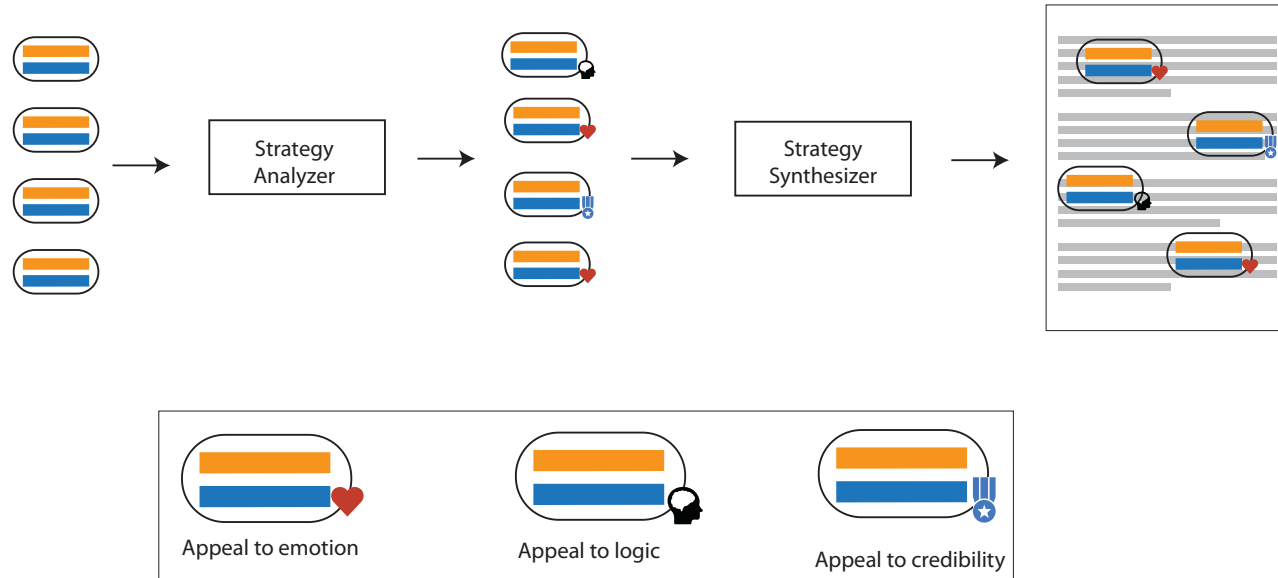

# Computational Argumentation at Webis

## Argumentation Strategies

# Computational Argumentation at Webis

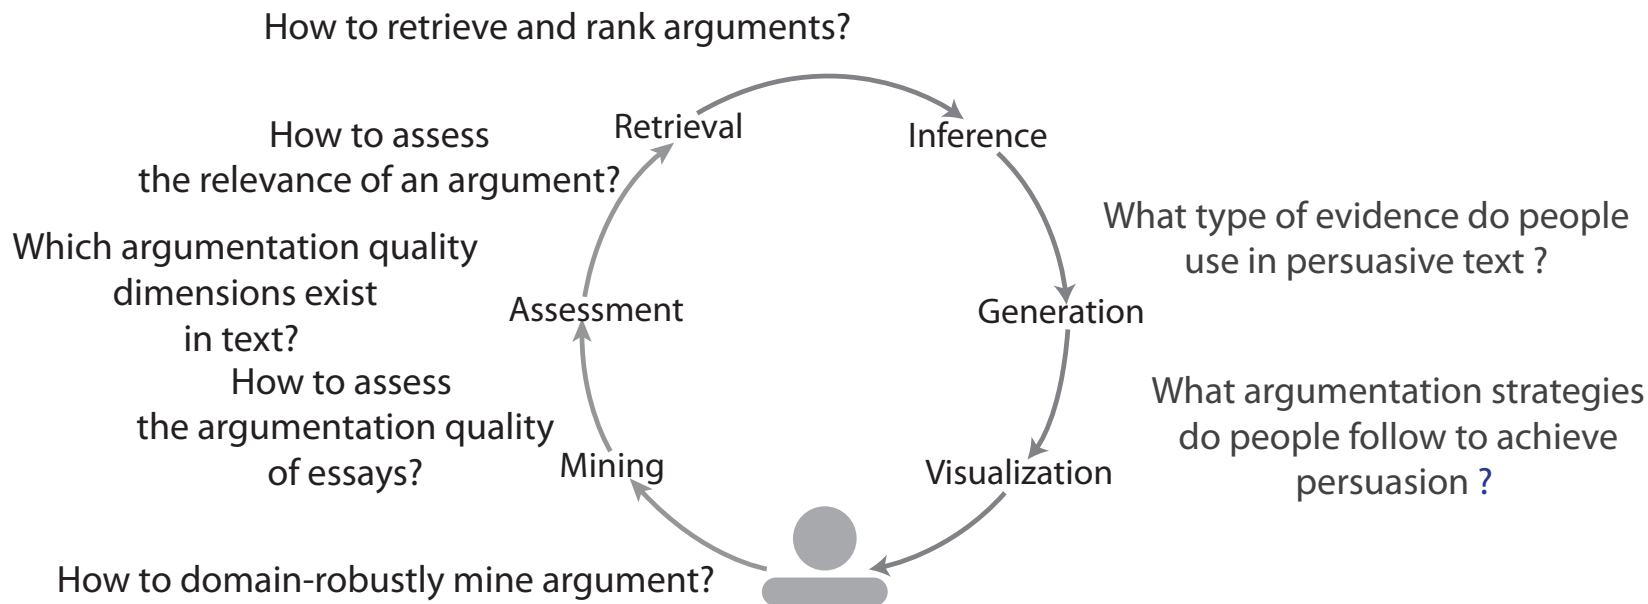

## Argumentation Strategies

- ❑ What type of evidence do people use for persuasion? e.g. testimony, anecdotes
- ❑ How to model argumentation strategies in text? e.g. sequence vs tree
- ❑ Do people use different argumentation strategies in different topics?

# Computational Argumentation at Webis

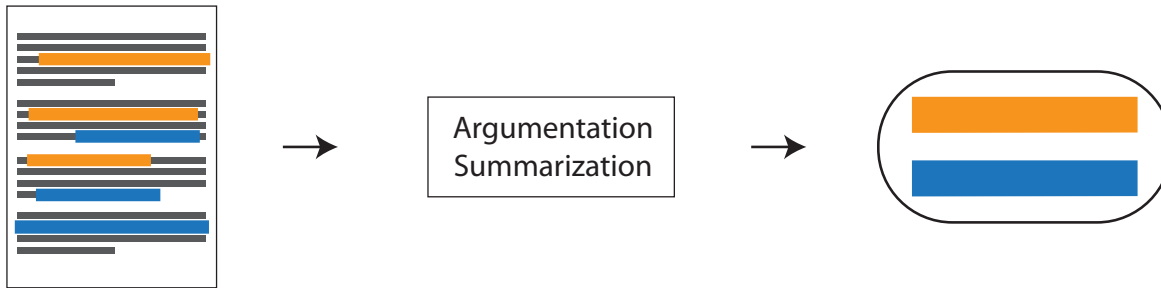

## Conclusion

# Computational Argumentation at Webis

## Future Work: Argumentation Summarization

Monological argumentation summarization aims at simplifying the argumentation of a text into one argument

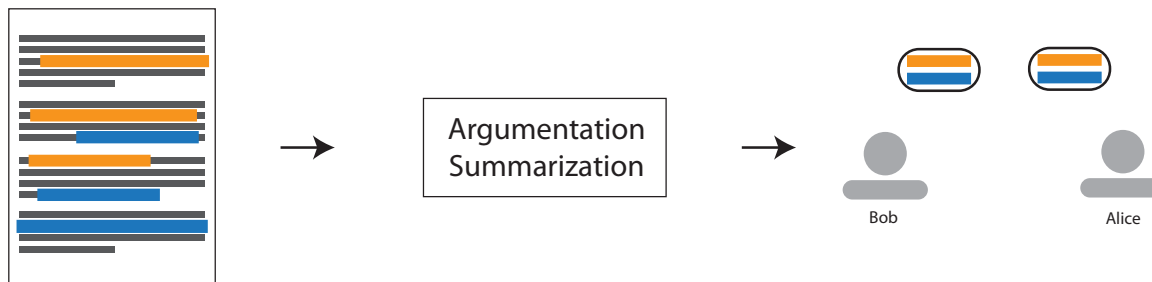

# Computational Argumentation at Webis

## Future Work: Argumentation Summarization

Monological argumentation summarization aims at simplifying the argumentation of a text into one argument

Dialogical argumentation summarization aims at extracting the main arguments of the contending participants

# Computational Argumentation at Webis

## Future Work: Interactive Argument Search
