

# COIL virtual exchange

## TRAINING SERIES OVERVIEW

17. December, 2021 / 12.30 – 2.30 p.m

**Webinar: What is COIL?**

4. February, 2022 / 12.30 – 2.30 p.m

**Workshop: introduction to COIL**

April – Mai 2022 (t.b.a.)

**COIL Design Course**

## TRAINER

**Eva Haug** is the Educational Advisor for Internationalisation of the Curriculum & COIL and senior lecturer of Intercultural Competence at the Amsterdam University of Applied Sciences. She's an elected member of the EAIE Internationalisation at Home Expert Community. Since November 2019, Eva is a working group leader for the iKUDU Erasmus+ capacity building project, collaborating with 5 South African and 5 European partners on the topic of transforming the curriculum through COIL.

## Collaborative Online International Learning

(COIL, sometimes also referred to as "Virtual exchange") is an innovative pedagogical approach, that deepens global engagement by bringing together faculty and students from around the globe to collaborate within and across academic disciplines on a **joint virtual project**. COIL experiences involve no travel costs and no credit transfer or curriculum modification as assignments are part of an existing course. COIL projects reinforce the development of the digital, intercultural, and social skills necessary for success in the 21st Century workplace and are an efficient tool for internationalisation@home, enhancing equality and diversity for all students.

This Training series is offered as part of the DAAD funded **INTeach** project of the International Office, which aims at promoting and supporting international teaching and learning at Bauhaus-Universität Weimar.

## 1 WHAT IS COIL? – *Webinar*

**Date:** 17. December, 2021 / 12.30 – 2.30 p.m

**Target group:** Teaching staff, educational developers and everyone responsible for and interested in internationalisation and curriculum development.

**No. participants:** max. 100.

**Trainer:** Eva Haug, Amsterdam University of Applied Sciences.

In this interactive webinar COIL expert Eva Haug provides an **introduction to the Why, What and How of COIL** and how it supports internationalization of the curriculum, innovation in teaching and learning and linking course content to the United Nations Social Development Goals.

## 2 INTRODUCTION TO COIL – *Workshop*

Incorporating a COIL collaboration into your existing course does not require an expensive technology platform or extensive redesign of your course. All you need is an interest in innovative pedagogy, a bit of flexibility and enthusiasm, and some thoughtful preparation. In this introductory workshop we will explore in more detail the **pedagogical design of COIL projects and how to get started**.

After this workshop, you will be able to describe learning outcomes for a module you would like to internationalise, you will have ideas for a collaborative task, and can **create a profile to be matched with an international partner** for a COIL.

**Date:** 4. February, 2022 / 12.30 – 2.30 p.m

**Target group:** Teaching staff, educational developers and administrative staff who may be interested in or involved in COIL/ Virtual exchange activities.

**No. participants:** max. 30.

**Trainer:** Eva Haug, Amsterdam University of Applied Sciences.

## 3 COIL DESIGN COURSE – *With your partner*

**Date:** April – Mai 2022 (t.b.a.)

**Target group:** Teaching staff with their international teaching partner.

**Workload:** +/- 20 h

**Format:** 4 modules (2 h online workshop + 1 h individual preparation; 1 h discussions with your international partner).

**No. participants:** max. 30.  
(15 staff + 15 partners)

**Trainer:** Eva Haug, Amsterdam University of Applied Sciences.

This professional development course covers all the topics and issues required to set up and implement a COIL project into existing courses and curricula.

**You and your international partner** will participate and work together in 4 modules and develop your ideas into a **COIL project ready to be implemented**. From learning outcomes and collaborative activities, to assessment and reflection: all COIL design elements will be explained, designed and reviewed.

The training requires **no previous experience** with COIL or Virtual exchange, but you need a professor or teaching staff member from an international university who is willing to participate and collaborate with you. Contact the international office if you need assistance in finding a partner.

*Are you  
interested  
in joining?*
