## M.Sc. Digital Engineering

### Faculty Welcome for Master's Students Digital Engineering

Monday, 9<sup>th</sup> October 2023, 1 p.m., Schwanseestraße 143, room 2.16

### Project fair

Monday, 9<sup>th</sup> October 2023, 5 p.m., Steubenstraße 6, Audimax

## Fundamentals (F)

### Algorithms and Datastructures

### Applied Mathematics and Stochastics

#### 2301012-1 Applied mathematics (Lecture)

**B. Rüffer, N. Gorban**

Veranst. SWS: 2

Vorlesung

Mo, wöch., 15:15 - 16:45, Marienstraße 13 C - Hörsaal B

#### Beschreibung

#### Applied mathematics:

Fundamentals of linear algebra, eigenvalue problems, fixed point principles, solvers; Fourier series, convergence, Fourier transform, Laplace transform; Solution of initial value problems, boundary value problems and eigenvalue problems for ordinary differential equations; All topics are discussed from the mathematical point of view and their implementation will be studied.

#### Leistungsnachweis

#### 1 written exam

"Applied mathematics and stochastics for risk assessment" / 180 min (100%) / **WiSe** + SuSe

#### 2301012-2 Applied mathematics (Exercise)

**B. Rüffer, N. Gorban**

Veranst. SWS: 1

Seminar

1-Gruppe Fr, gerade Wo, 07:30 - 09:00, Coudraystraße 13 A - Hörsaal 2

2-Gruppe Fr, unger. Wo, 07:30 - 09:00, Coudraystraße 13 B - Hörsaal 3

#### Beschreibung

#### Applied mathematics:

Fundamentals of linear algebra, eigenvalue problems, fixed point principles, solvers; Fourier series, convergence, Fourier transform, Laplace transform; Solution of initial value problems, boundary value problems and eigenvalue problems for ordinary differential equations; All topics are discussed from the mathematical point of view and their implementation will be studied.

**Leistungsnachweis****1 written exam**

"Applied mathematics and stochastics for risk assessment" / 180 min (100%) / **WiSe** + SuSe

**2301012-3 Stochastics for risk assessment (Lecture) / Mathematics for risk management (MBM)**

**T. Lahmer, Z. Jaouadi, R. Das, N. Hazrati**

Veranst. SWS: 2

Vorlesung

Di, wöch., 11:00 - 12:30, Marienstraße 13 C - Hörsaal B

**Beschreibung****Stochastics for risk assessment:**

Introduction to probability theory with focus on situations characterized by low probabilities. Random events, discrete and continuous random variables and associated distributions. Descriptive statistics, parameter estimation. Risk Assessment by means of FORM and Monte Carlo Simulations. Introduction to reliability theory: Extreme value distributions; stochastic modeling with software tools e.g. MATLAB, Octave, Excel, R. Reliability Analysis of Systems. Catastrophic events + risk problems, Applications

**Leistungsnachweis****1 written exam**

"Applied mathematics and stochastics for risk assessment" / 180 min (100%) / **WiSe** + SuSe

**2301012-4 Stochastics for risk assessment / Mathematics for risk management (MBM) (Exercise)**

**T. Lahmer, Z. Jaouadi, R. Das, N. Hazrati**

Veranst. SWS: 1

Seminar

1-Gruppe Mi, wöch., 17:00 - 18:30, Marienstraße 7 B - Seminarraum 104, Tutorium for NHRE (Group 1) and DE

1-Gruppe Fr, unger. Wo, 07:30 - 09:00, Coudraystraße 13 A - Hörsaal 2, Exercise for NHRE (Group 1) and DE

2-Gruppe Mi, wöch., 17:00 - 18:30, Marienstraße 7 B - Seminarraum 105, Tutorium for NHRE (Group 2) and DE

2-Gruppe Mi, wöch., 17:00 - 18:30, Marienstraße 7 B - Seminarraum 205, Tutorium - Online-Tutors

2-Gruppe Fr, gerade Wo, 07:30 - 09:00, Coudraystraße 13 B - Hörsaal 3, Exercise for NHRE (Group 2)

**Beschreibung****Stochastics for risk assessment:**

Introduction to probability theory with focus on situations characterized by low probabilities. Random events, discrete and continuous random variables and associated distributions. Descriptive statistics, parameter estimation. Risk Assessment by means of FORM and Monte Carlo Simulations. **Introduction to Mechanics**

## 420160001 Introduction to Mechanics

**T. Rabczuk, L. Nguyen Tuan**

Veranst. SWS: 4

Vorlesung

Do, wöch., 13:30 - 15:00, Marienstraße 7 B - Seminarraum 103, Lecture, ab 12.10.2023

Fr, wöch., 09:15 - 10:45, Marienstraße 7 B - Seminarraum 205, Lab class, ab 20.10.2023

### Beschreibung

Einführung in die Mechanik

1. Einführung in die Statik:
  - 1.1 Kräfte und Momente
  - 1.2 Auflagerkräfte statisch bestimmter Systeme
  - 1.3 Schnittkräfte in Fachwerken und Balken
2. Einführung in die Elastostatik
  - 2.1 Spannungszustand
  - 2.2 Verzerrungszustand
  - 2.3 Berechnung von Spannungen und Verschiebungen unter axialer und Biegebeanspruchung
  - 2.4 Prinzip der virtuellen Arbeit

### engl. Beschreibung/ Kurzkomentar

1. Introduction to statics:
  - 1.1 Forces and moments
  - 1.2 Reaction forces of statically determinate systems
  - 1.3 Internal actions in pin-jointed frames and beams
2. Introduction to elastostatics
  - 2.1 Stresses
  - 2.2 Strains
  - 2.3 Stresses and displacements under axial and bending loading.
  - 2.4 Principle of Virtual Work

### Leistungsnachweis

Schriftliche Klausur, 150 Minuten

## Mathematics for Data Science

### Object-oriented Modeling and Programming in Engineering

## 303005 Object-oriented Modeling and Programming in Engineering

**C. Koch, M. Artus**

Veranst. SWS: 4

Vorlesung

Di, wöch., 15:15 - 16:45, Marienstraße 7 B - Projektraum 301, Exercise NHRE

Di, wöch., 15:15 - 16:45, Marienstraße 7 B - Projektraum 302, Exercise NHRE

Do, wöch., 11:00 - 12:30, Marienstraße 13 C - Hörsaal B, lecture

Fr, wöch., 11:00 - 12:30, Marienstraße 7 B - Projektraum 301, Exercise DEM

Fr, wöch., 11:00 - 12:30, Marienstraße 7 B - Projektraum 302, Exercise DEM

### Beschreibung

Objektorientierte Modellierung und Programmierung für Ingenieure

In diesem Modul wird fundamentales Wissen vermittelt, um objektorientierte Softwarelösungen für Ingenieuraufgaben zu konzipieren und zu implementieren. Dies beinhaltet Fähigkeiten zur Analyse von

Ingenieurproblemen, um entsprechende objektorientierte Modelle zu erzeugen und geeignete Algorithmen auszuwählen. Die verwendete Programmiersprache ist Java. Da die Basiskonzepte allgemeingültig beschrieben werden, werden die Studierenden in die Lage versetzt, auch andere modernen Programmiersprachen zu einzusetzen.

Inhalte:

- Kontrollstrukturen (alternatives, loops, sequences)
- Grundlegende Datenstrukturen und Algorithmen
- Prinzipien der objektorientierten Softwareentwicklung (Datenkapselung, Vererbung, Polymorphie)
- Unified Modeling Language als Werkzeug für Softwareentwurf und –dokumentation
- Entwicklung grafischer Nutzerschnittstellen mithilfe des Model-View-Controller-Entwurfsmusters

#### engl. Beschreibung/ Kurzkomentar

Object-oriented Modeling and Programming in Engineering

This module covers the basic knowledge needed to develop and implement object-oriented software solutions for engineering problems. This includes the ability to analyse an engineering problem, so that corresponding object-oriented models can be created and suitable algorithms can be selected. The programming language used in this module is Java. However, the since fundamental concepts are described in general, students will be able to program in other modern programming languages.

Content:

- Essential programming constructs (alternatives, loops, sequences)
- Fundamental data structures and algorithms
- Principles of object oriented software development (encapsulation, inheritance and polymorphism)
- The Unified Modeling Language as a tool for software design and documentation

Development of graphical user interfaces using the Model-View-Controller pattern

#### Leistungsnachweis

schriftliche Klausur

## Software Engineering

### Statistics

### Structural Dynamics

#### 2401014 Structural Dynamics (Lecture)

**T. Most**

Veranst. SWS: 2

Vorlesung

Di, wöch., 09:15 - 10:45, Marienstraße 13 C - Hörsaal B, \* dates by arrangement

#### Beschreibung

**Structural Dynamics:** (50% of semester course time)

- SDOF systems:

- free vibrations, harmonic, impulse and general excitation for undamped and damped systems,

- Impulse response function, frequency response function, base excitation,
  - Time step analysis: Duhamel integral, central difference and Newmark methods;
- MDOF systems: modal analysis, modal superposition, modal damping, Rayleigh damping, Frequency response functions
- Continuous systems

### Voraussetzungen

Bachelor Civil Engineering

### Leistungsnachweis

**1 written exam:** „Fundamentals of structural dynamics“/ 90 min (50%)

## 2401014 Structural Dynamics (Exercise)

**T. Most, M. Ansari**

Veranst. SWS: 1

Seminar

1-Gruppe Di, wöch., 07:30 - 09:00, Marienstraße 7 B - Projektraum 301, Tutorium - Group 1

2-Gruppe Mi, wöch., 07:30 - 09:00, Marienstraße 7 B - Projektraum 301, Tutorium - Group 2

Di, wöch., 15:15 - 16:45, Marienstraße 13 C - Hörsaal D, Group 1

### Bemerkung

- Complementary to the lectures

## 2401011 Applied structural dynamics

**A. Athanasiou**

Veranst. SWS: 2

Vorlesung

Mi, wöch., 09:15 - 10:45, Marienstraße 13 C - Hörsaal D

### Beschreibung

Appl. SD (winter semester): The students will be introduced to the theory of structural dynamics and apply such theory to solve problems occurring in engineering practice. In particular, the students shall: (i) learn how to formulate the dynamic equilibrium of idealised structural systems, (ii) implement analytical and numerical methods for dynamic response simulations under earthquake and wind excitation, and (iii) predict and evaluate the performance of single- and multi- story buildings in seismic and wind environments, excited in the linear and nonlinear range of response.

### Course content:

free and forced vibrations, dynamic equilibrium, analytical and numerical solutions, modal analysis, response spectrum, vibration of buildings under earthquake and wind excitation, seismic response of linear and nonlinear systems, dynamic wind response simulation, comprehensive and realistic in-class examples.

### Leistungsnachweis

**1 written exam:** "Applied structural dynamics" /

90 min (50%) / WiSe + SuSe

## Structural Engineering Models

## Modelling (M)

### Advanced Building Information Modeling

#### Complex Dynamics

#### Computer models for physical processes - from observation to simulation

##### 420250037 Computer Models for Physical Processes - from observation to simulation

**C. Könke**

Veranst. SWS: 4

Vorlesung

Mo, Einzel, 13:30 - 15:00, Seminarraum ISM (R.010, M15) -first meeting to agree on regular appointments-, 09.10.2023 - 09.10.2023

#### Beschreibung

Mechanical formulation of physical problem via energy principles or conservation laws. Strong and weak formulation of the physical form. Finite difference solution of ordinary and partial differential equations. Finite element solution of the weak form of a physical problem statement (heat flow problem or structural mechanics). Error estimates for numerical solution techniques, Zienkiewicz/Zhu and Babushka/Rheinboldt approach

#### Voraussetzungen

Applied Mathematics, Fundamental Mechanics

#### Leistungsnachweis

written test, 120 min duration

## Macroscopic Transport Modelling

##### 2909020 Macroscopic Transport Modelling

**K. McFarland, L. Thiebes, U. Plank-Wiedenbeck, J. Uhlmann** Veranst. SWS: 4

Integrierte Vorlesung

Di, wöch., 11:00 - 15:00, Marienstraße 7 B - Student Design Studio – SDS 303

Di, wöch., 11:00 - 15:00, Marienstraße 7 B - Projektraum 302

#### Beschreibung

##### Part A: Principles

Transport planning framework, methodology and procedures, Land-Use-Data, behavioral data, operational and network data. 4-step modelling approach, methods and algorithms. Calibration and validation, Forecasting and scenario calculations. Empirical traffic data for model validation and calibration. Strengths and weaknesses of different model approaches.

##### Part B: Model Development

Model setting up - traffic generation, traffic destinations, mode choice and route choice calculation methods. Agent based demand models. Modelling transport demand side and supply side (e.g. network, transport modes, infrastructure, operation) for individual and public transport.

##### Part C: Transport Model Application

Application of transport models in transport planning. Model setup and configuration according to different planning tasks. Student presentation (group work). Modelling exercises based on PTV Visum software application. Application of learned methodological approach(es) and critical reflection of the model outputs. Perspectives in transport modelling.

**Voraussetzungen**

Teilnehmeranzahl auf 15 begrenzt. Bestätigung der Professur Verkehrssystemplanung notwendig

Bewerbung bis 12.10.2023 ausschließlich per Mail an [vsp@bauing.uni-weimar.de](mailto:vsp@bauing.uni-weimar.de). Bitte kurz den fachlichen Hintergrund und die Motivation für die Kursteilnahme schildern.

Notwendig: Vorkenntnisse in der Modellierung/ Simulation und Verkehrsplanung und-technik. **Sollten keine Vorkenntnisse im Bereich der Verkehrsplanung vorliegen muss zuerst der Kurs "International Case Studies in Transportation" belegt werden.**

**Leistungsnachweis**

Teil A:

Klausur (120 Min), Englisch, 50%

Teil B:

Beleg, Bericht und Präsentation, Englisch, 50%

**Die Belegabgabe ist Voraussetzung für die Klausurteilnahme**

**909020 Prüfung: Macroscopic Transport Modelling**

**U. Plank-Wiedenbeck**

Prüfung

Fr, Einzel, 09:00 - 11:00, R 305 M13, 23.02.2024 - 23.02.2024

**Modelling in the development process****Optimization****Raumbezogene Informationssysteme/ Spatial information systems (GIS)**

**439100/ 904003 Prüfung: Spatial information systems/ Raumbezogene Informationssysteme (GIS)**

**T. Gebhardt, V. Rodehorst**

Prüfung

Di, Einzel, 13:00 - 15:00, 13.02.2024 - 13.02.2024

**904003/ 439100 Raumbezogene Informationssysteme/ Spatial information systems (GIS)**

**T. Gebhardt, V. Rodehorst**

Veranst. SWS: 4

Integrierte Vorlesung

Fr, wöch., 13:30 - 15:00, Marienstraße 13 C - Hörsaal B, Übungen, ab 20.10.2023

Mi, wöch., 09:15 - 10:45, Marienstraße 13 C - Hörsaal B, Vorlesungen

**Beschreibung**

Die Vorlesung vermittelt vertiefte Grundlagen raumbezogener Informationssysteme, wie z.B. die Aufnahme, Organisation, Analyse und Präsentation raumbezogener Daten. Die Themen umfassen geographische Daten und frei verfügbare Ressourcen, Referenzsysteme und Kartennetzentwürfe, Geo-Datenbanken und effiziente Datenstrukturen, geometrische und topologische Datenanalyse, kartographische Generalisierung und Visualisierung sowie GIS im Planungskontext.

#### Bemerkung

Für die Selbsteinschreibung in den zugehörigen MOODLE-Lernraum (Hyperlink siehe oben!) lautet das Passwort: **spatial23**

#### Leistungsnachweis

Erfolgreiche Bearbeitung der Übungen und des Projektes mit abschließender Klausur

## Simulation and Validation (SaV)

### Design and Interpretation of Experiments / Signal Processing

#### 2205014 Design and interpretation of experiments: Experiments in Structural Engineering

**M. Kraus, S. Ibañez Sánchez, S. Mämpel**

Veranst. SWS: 2

Integrierte Vorlesung

Di, wöch., 13:30 - 15:00, Marienstraße 13 C - Hörsaal C, Experiments in structural engineering

#### Beschreibung

Students will be familiar with following: Design and setup as well as evaluation and interpretation of experimental testing in structural engineering. Provision of techniques linking experimental and mathematical / numerical modelling. Parallel assessment of steps being part of any verification and validation procedure. Discussion of common techniques of optimal experimental designs

#### Bemerkung

The course gives an overview on experiments and their evaluation regarding different tasks and scopes of structural engineering. Next to different testing techniques applied for diverse aims, the equipment and measuring devices employed for testing are treated as well.

Besides the experiment itself, it is an important question, how we can use the experimental data for the calibration and validation of models in engineering. In this course, we give insights to techniques called parameter and system identification.

As often signals are not useable directly, transforms are necessary, like filtering, Fourier Transform, Wavelet Transform and, in particular for signals with noise, averaging techniques. Having models at hand, the experiment can be designed virtually by means of nonlinear optimization.

#### Leistungsnachweis

**1 written exam / 120 min / WiSe + SuSe** including

"Experiments in Structural Engineering" and

"Signal Processing, Design of Experiments and System Identification"

#### 2205014 Design and interpretation of experiments: Signal Processing, Design of Experiments and System Identification

Fr, wöch., 15:15 - 16:45, Marienstraße 13 C - Hörsaal D, Lab class

**Beschreibung**

Das Ziel der Veranstaltungen ist die interdisziplinäre Vermittlung ästhetischer und technischer Aspekte der Computergrafik und -Animation von der Theorie bis in die Praxis.

Die Veranstaltung besteht aus einer eigens für Medienkünstler / Gestalter entwickelten Vorlesung und einer Übung, in der Künstler und Informatiker interdisziplinär zusammen arbeiten können.

In der Vorlesung werden die Studenten mit den nötigen technischen Details versorgt.

Die Übung wird von M.F.A Gianluca Pandolfo geleitet und deckt sowohl technische als auch ästhetische Grundlagen ab (Modellieren, Rendern, Animieren). Gearbeitet wird mit Blender 3D. Ziel der Übung ist die Fertigstellung eines einminütigen 3D-Animationsfilms als finale Abgabe.

**engl. Beschreibung/ Kurzkomentar**

Computer Animation

Three-dimensional Computer Graphics and Computer Animation are now widely used in the Arts and in Design. Aim of this is to allow students to understand the modelling and rendering techniques used in common high level animation programs.

Successful students in this course should be able to conceive and produce a 3D animation and should be able to cooperate with Computer Scientists on a common 3D animation project, which might at times involve the specification of requirements for programming plugins for the animation system. At the end of the course they should master the steps required for the conception, design and rendering of a 3D animation software.

Do, unger. Wo, 11:00 - 13:00, Marienstraße 13 C - Hörsaal A, Lab class, ab 26.10.2023

**Beschreibung**

In this course students will learn to understand machine learning as a guided search in a space of possible hypotheses. The mathematical means to formulate a particular hypothesis class determines the learning paradigm, the discriminative power of a hypothesis, and the complexity of the learning process.

The lecture covers hypothesis spaces, model bias, regression for classification, logistic regression, effectiveness computation, loss function derivation, gradient descent, regularization, neural networks, decision trees, impurity functions, Bayesian learning. The lecture introduces concepts, algorithms, and theoretical backgrounds.

The accompanying lab treats both theoretical and applied tasks to deepen the understanding and hands-on experience of the field. Team work (2-3 students) is appreciated.

**Bemerkung**

Zeit und Ort werden zu Projektbörse bekannt gegeben!

#### Beschreibung

Die Entwicklung sicherer und vertraulicher Systeme ist eine Herausforderung für System-Architekten als auch für Software-Entwickler. Die IT-Sicherheit wird durch das immer größer werdende Bewusstsein in der Politik und den Massenmedien zu einem stetig wachsenden und wichtigen Aspekt in der IT-Industrie.

In dieser Vorlesung wird die Programmiersprache Ada'05 (bzw. Ada'12) eingeführt, welche heutzutage als geeignete Sprache für die Implementierung sicherer und vertraulicher Systeme betrachtet wird.

Desweiteren werden Methoden aus dem Feld des Software-Engineering präsentiert, welche es ermöglichen, Software-Systeme sicher, vertraulich und benutzbar zu gestalten.

#### engl. Beschreibung/ Kurzkomentar

Security Engineering

The development of safe and reliable systems is a challenging task for both system architects and software developer.

Due to the raising awareness of the politics and mass media, IT-security is becoming an increasingly important aspect of the IT industry.

The course introduces the programming language Ada'05, which is considered particularly suitable for implementing secure and reliable systems. In addition, methods from the field of software engineering are presented, which serve the safety, reliability and maintainability of software systems.

### 422250037 Formal Methods for Software Engineering

**J. Ringert, .. Soaibuzzaman**

Veranst. SWS: 4

Vorlesung

Di, wöch., 09:15 - 10:45, Schwanseestraße 143 - Seminarraum 3.09, Vorlesung, ab 10.10.2023

Fr, wöch., 11:00 - 12:30, ab 13.10.2023

Fr, Einzel, 11:00 - 12:30, Schwanseestraße 143 - Seminarraum 3.09, 01.12.2023 - 01.12.2023

#### Beschreibung

Formal methods are rigorous techniques for the mathematical analysis of software and hardware systems. This course introduces aspects of formal methods with applications to software engineering problems.

The topics covered in the course include:

- Introduction to Formal Methods
- Formal methods tools, e.g.,
  - SMT solvers on the example of Z3
  - Relational models and the Alloy Analyzer
  - Model Checking using SMV
- Applications of formal methods in practice

After completion students will be able to

- Model problems in different formalisms
- Analyze software models using formal method tools
- Evaluate formal methods for software engineering problems

#### Leistungsnachweis

Participation in exercises

Marked homework project including a presentation

### 423250031 Symmetric Cryptography Conference

**S. Lucks, N. Lang, J. Leuther**

Veranst. SWS: 2

Seminar

Do, wöch., 17:00 - 18:30, Schwanseestraße 143 - Seminarraum 3.09, ab 19.10.2023

#### Beschreibung

Studierende bekommen eine Sammlung aktueller Veröffentlichung zu einem Thema im Bereich der symmetrischen Kryptographie.

Nach einer gemeinsamen Einarbeitung erarbeiten die Studierenden ihre ausgewählte Veröffentlichung selbstständig und erstellen eine Zusammenfassung sowie Präsentation darüber.

In einer Zwischenpräsentation im Semester kann Feedback eingeholt werden und die Struktur der Präsentation geübt werden.

Am Ende des Semesters (vorlesungsfreie Zeit) werden die Studierenden ihre Beiträge in einer „Konferenz“ vorstellen. Diese Mini-Konferenz ist so modelliert, wie es im wissenschaftlichen Forschungskontext üblich ist (inklusive reichlicher Kaffeepausen).

Das Seminar gibt neben der thematischen Auseinandersetzung mit einem spezifischen Thema einen Einblick in die wissenschaftliche Arbeitswelt, in der auch Selbstorganisation und Vernetzungen eine Rolle spielen.

### Leistungsnachweis

Eigenständige Bearbeitung eines Themas, Mündliche Präsentation zu einem Thema, Teilnahme an Diskussion zu den präsentierten Themen.

## 4345600 Computer Graphics II: Computer Animation

**C. Wüthrich, G. Pandolfo**

Veranst. SWS: 3

Vorlesung

Mo, wöch., 15:15 - 16:45, Schwanseestraße 143 - Seminarraum 2.16, Lecture

Fr, wöch., 15:15 - 16:45, Marienstraße 13 C - Hörsaal D, Lab class

### Beschreibung

Das Ziel der Veranstaltungen ist die interdisziplinäre Vermittlung ästhetischer und technischer Aspekte der Computergrafik und -Animation von der Theorie bis in die Praxis.

Die Veranstaltung besteht aus einer eigens für Medienkünstler / Gestalter entwickelten Vorlesung und einer Übung, in der Künstler und Informatiker interdisziplinär zusammen arbeiten können.

In der Vorlesung werden die Studenten mit den nötigen technischen Details versorgt.

Die Übung wird von M.F.A Gianluca Pandolfo geleitet und deckt sowohl technische als auch ästhetische Grundlagen ab (Modellieren, Rendern, Animieren). Gearbeitet wird mit Blender 3D. Ziel der Übung ist die Fertigstellung eines einminütigen 3D-Animationsfilms als finale Abgabe.

### engl. Beschreibung/ Kurzkomentar

Computer Animation

Three-dimensional Computer Graphics and Computer Animation are now widely used in the Arts and in Design. Aim of this is to allow students to understand the modelling and rendering techniques used in common high level animation programs.

Successful students in this course should be able to conceive and produce a 3D animation and should be able to cooperate with Computer Scientists on a common 3D animation project, which might at times involve the specification of requirements for programming plugins for the animation system. At the end of the course they should master the steps required for the conception, design and rendering of a 3D animation software.

## 4526501 Academic English Part One

**G. Atkinson**

Veranst. SWS: 2

Kurs

Mi, wöch., 15:30 - 16:45, Consultations, R.218, S143 (indiv.appointments), ab 01.11.2023

Mi, wöch., 17:00 - 18:30, Schwanseestraße 143 - Seminarraum 3.09, Academic English Part I+II (alternating), ab 01.11.2023

### Beschreibung

This is the first part of a two-part course which aims to improve your ability to express yourself clearly in written English and to develop a suitably coherent academic writing style. Part One concentrates mainly on structure in writing academic articles, essays and reports. We begin by examining the structure of individual paragraphs and

move on to extended texts of various types (e.g. process essays, cause/effect, comparison/contrast, etc.). Particular attention is paid to connectives, i.e. transitional phrases and constructions which help you link ideas and paragraphs in a logical, systematic way.

### Bemerkung

You are advised to take Part One first, although it is possible to take both parts in reverse order or concurrently (i.e. in the same semester). You may only do the latter on the authority of the course leader (Atkinson).

### Voraussetzungen

Registration (compulsory)

**All students must register.** First time participants are required to present a B2 English Level certificate along with their email registration. All students, **including those who have already taken Academic English Part Two and those who need to repeat Academic English Part One**, must register by contacting Howard Atkinson at: howard.atkinson@uni-weimar.de.

**You will be informed by email when registration opens and when the deadline is. Please do not attempt to register until you have received this Email. Registration Emails should be given the subject heading: AE I Registration.**

## 4526502 Academic English Part Two

### G. Atkinson

Veranst. SWS: 2

Kurs

Mi, wöch., 15:30 - 16:45, Consultations, R.2.18, S143 (indiv.appointments), ab 01.11.2023

Mi, wöch., 17:00 - 18:30, Academic English Part I+II alternating, ab 01.11.2023

### Beschreibung

Part Two of the Academic English course concentrates on improving and refining aspects of academic writing style. It includes sections on clause and sentence structure, punctuation rules and how to incorporate quotations, statistics and footnotes into academic texts.

### Bemerkung

You are advised to take Part One first, although it is possible to take both parts in reverse order or concurrently (i.e. in the same semester). You may only do the latter on the authority of the course leader (Atkinson).

### Voraussetzungen

Registration (compulsory)

**All students must register.** First time participants are required to present a B2 English Level certificate along with their email registration. ## Project

### 423210013 Let's Talk to the Lecture Slides

**B. Stein, M. Gohsen, T. Gollub, J. Kiesel**

Projekt

#### Beschreibung

Teaching materials usually contain a lot of knowledge on various topics, but it is often difficult to find the relevant information when you need it, for example when you read about the latest developments in artificial intelligence in the news.

With this project, we want to open up and improve information access to our teaching material. In this project, we will develop an artificial assistant that will answer questions in natural language based on our lecture material and point you to the relevant slides for illustration.

Participants will learn about and apply technologies from Information Retrieval and Natural Language Processing (especially large language models like ChatGPT).

#### Bemerkung

#### Leistungsnachweis

Abschlusspräsentation und Ausarbeitung

### 423210015 Social Engineering – das Abenteuer!

**S. Lucks, A. Jakoby, J. Ehlers, N. Lang, J. Leuther**

Projekt

#### Beschreibung

Viele Cyber-Angriffe basieren auf Techniken des Social Engineering. Dazu gehören das Vortäuschen von Autorität, das Schreiben von Phishing-Mails, „Dumpster-Diving“ (das Durchsuchen von Abfällen nach nützlichen Informationen, die aus Leichtsinn weggeworfen wurden), usw.

Social Engineering nutzt menschliche Charakterzüge aus, zum Beispiel den Respekt für Autorität, die Bereitschaft anderen zu helfen, aber auch Leichtgläubigkeit und Faulheit. Ebenso setzt Social Engineering auf das Auslösen und Ausnutzen von menschlichen Emotionen, z.B. Furcht, Neugier, Hoffnung oder Schuldgefühle.

In dem Projekt geht es darum, Techniken des Social Engineering zunächst zu beschreiben und zu verstehen und nachfolgend ein (Computer-)spiel daraus zu entwickeln.

Der Spieler bzw. die Spielerin soll sich in eine Organisation „einhacken“. Dazu muss er oder sie nach und nach verschiedene Zugangsdaten in Erfahrung bringen und in verschiedene IT-Systeme einbrechen – natürlich unter Anwendung immer anderer Techniken des Social Engineering.

Das Spiel soll zunächst einmal als Text-Adventure gespielt werden. Bei einem erfolgreichen Projektverlauf könnte ein Folgeprojekt das Spiel zu einem graphischen Abenteuerspiel weiterentwickeln.

**423210016 AI-Assisted Argumentative Writing****B. Stein, K. Heinrich, J. Kiesel, N. Mirzakhmedova**

Projekt

**Beschreibung**

The goal of this project is to develop an AI-assisted argumentative writing system that helps users write well-supported argumentations.

The system will utilize a comprehensive database of arguments to identify relevant arguments covering different aspects and suggest these to the user.

By leveraging a large language model, the system will provide accurate and coherent suggestions while using the database to avoid the pitfall of "hallucinations" often found in such models.

The project offers an excellent opportunity for students to delve into the fields of natural language processing, large language models, argumentation theory, and user interface design. It encourages the exploration of advanced AI techniques to create a valuable tool that facilitates persuasive writing and critical thinking.

**423210018 Analyses of Behavior Trees****J. Ringert, .. Soaibuzzaman**

Projekt

**Beschreibung**

Behavior Trees are emerging as descriptions for autonomous and adaptive system behaviors, e.g., in the domain of robotics. We will take a closer look into working with behavior trees and how to formally analyze them to support (software) engineers.

**Voraussetzungen**

Digital Engineering students must have completed their foundations.

**Leistungsnachweis**

Projektbericht und Ergebnisse in Form von Software.

**423210019 Automated Migration of Building Information Models****J. Ringert, B. Burse**

Projekt

**Beschreibung**

We investigate the use of Building Information Models on the example of Industry Foundation Classes. As standards evolve and BIMs age there is a need for automated migration of BIMs to recent standards. The Software Engineering methods we apply may range from domain-specific languages to model transformation systems.

#### Voraussetzungen

Digital Engineering students must have completed their foundations.

#### Leistungsnachweis

Projektbericht und Ergebnisse in Form von Software.

### 423210020 Challenging the SPHINCS

**S. Lucks, N. Lang, J. Leuther**

Veranst. SWS: 10

Projekt

#### Beschreibung

Hash-based signature algorithms are promising candidates for securing communication in the age of quantum computers. SPHINCS+ is an example of such a stateless signature algorithm that gained popularity from the recent „Post-Quantum Cryptography Standardisation Competition“.

A major downside of hash-based signature algorithms like SPHINCS+ is the size of the signature itself, which is magnitudes larger than what other algorithms provide. However, there are recent alternatives to SPHINCS+ that are being developed to reduce the downsides while still maintaining the benefits of the hash-based approach.

In this project, you will work with experts on this subject to get to know some of these alternatives. Your task is to implement prototypes of these algorithms and analyse them regarding some of their benefits or downsides.

#### Bemerkung

The time and place will be announced at the project fair!

#### Voraussetzungen

Introduction to Modern Cryptography (or equivalent)

#### Leistungsnachweis

Zwischenpräsentationen, Abschlusspräsentation, Abschlussbericht.

### 423210021 Kryptographie im Kopf -- Single-Page Crypto Challenge WISE

**S. Lucks, J. Leuther, N. Lang**

Projekt

#### Beschreibung

Does a cryptosystem need to be complex in order to be secure? No! We want to create a simple state-of-the-art cryptosystem whose source code can fit easily onto one single page in print, or even on two slides for a presentation -- without referring to a crypto library.

Simplicity does not mean that the computations will be trivial or that users have to make compromises about the security. Simplicity means that independent implementations "from memory" will be compatible with each other: when

a "sender" encrypts a message  $M$  under a key  $K$  and a "receiver" decrypts the ciphertext under the same key  $K$ , then the receiver will get  $M$  again, even when both sender and receiver are using their own implementation of the scheme they both memoized.

This essentially means that people can "smuggle" state-of-the-art crypto into secure computing environments, thereby bypassing any prohibition to carry or download any electronic or printed copies of software.

**Bemerkung**

time and place to be announced at the project fair.

room:S143 Medsec/Webis-Lab

Abschlusspräsentation, Abschlussbericht

**423210028 Hot Topics in Computer Vision WiSe 23/24****V. Rodehorst, M. Kaisheva**

Projekt

**Beschreibung**

Die Teilnehmer werden an ein aktuelles forschungs- oder industrierelevantes Thema herangeführt. Es ist nicht beabsichtigt einen festgelegten Bereich in voller Breite zu explorieren. Stattdessen werden die Teilnehmer mit der vollen Komplexität eines begrenzten Themas konfrontiert und die Eigeninitiative gefördert. Es ermöglicht einen Einblick in die Forschungs- und Entwicklungsprojekte des Fachgebiets.

**Bemerkung**

Ort und Zeit werden zur Projektbörse bekanntgegeben.

**Voraussetzungen**

Gute Programmierkenntnisse (z.B. C/C++, MATLAB, OpenCL/CUDA)

**Leistungsnachweis**

Aktive Mitarbeit, Einführungsvortrag, Abschlusspräsentation, Dokumentation
