M.Sc. Integrated Urban Development and Design (PO 2020)**118220205 Real Estate Development - Lecture****B. Nentwig**

Veranst. SWS: 2

Vorlesung

Di, wöch., 09:15 - 10:45, Bauhausstraße 9c - Arbeitsraum 004, 22.10.2024 - 04.02.2025

Beschreibung

This course consists of lecture series and seminar, which offers an opportunity integrating architects, urban planners, developers to explore different topics of real estate development together with various aspects.

The lecture series will focus on the main topics of urban development and real estate, such as analyzing trends of the real estate market, offering economic perspectives in various phases of project development, introducing different property types together with different social milieus.

Additional to this lecture series, there is a complementary seminar which allows you to exercise the knowledge which you collect from the lectures. In this semester, we will offer you an opportunity to explore one specific real estate typology from these two: Retail or Hotel. The seminar will guide you through the tasks which you have to accomplish by broadening and deepening the insight of how an evaluation research report is composite at an early project development stage.

In order to acquire 6 Credit Points in total, you must attend both lectures and seminars.

118220206 Real Estate Development - Seminar**S. Eipper, K. Brüske**

Veranst. SWS: 2

Seminar

Di, wöch., 11:00 - 12:30, Bauhausstraße 9c - Arbeitsraum 004, 22.10.2024 - 04.02.2025

Veranst. SWS: 2

Vorlesung

Di, wöch., 17:00 - 18:30, Marienstraße 13 C - Hörsaal A, 15.10.2024 - 04.02.2025

Beschreibung

Die Vorlesung vermittelt eine für das Studium der Architektur spezifische Einführung in das komplexe Themenfeld der Denkmalpflege und vermittelt einen Überblick über Inhalte, Aufgaben, Methoden und Institutionen des Fachs. Mit der Vermittlung denkmaltheoretischen Grundlagenwissens dient sie der Kompetenzbildung innerhalb des in der Architekturausbildung immer wichtiger werdenden Bauens im Bestand. Ziel ist, ein Verständnis für das komplexe Zusammenspiel der unterschiedlichen Parameter zu erzeugen, die für das Bauen im Bestand relevant sind.

In der Vorlesung werden u.a. folgende Themen betrachtet: Geschichte der Denkmalpflege; Denkmalbegriffe und -werte; Gesetze und Institutionen, städtebauliche Denkmalpflege; denkmalpflegerische Methoden von der Befundanalyse und -dokumentation über Konservierung und Reparatur bis zur Umnutzung und Erweiterung; architektonische Interventionen im Denkmal; inter- und transnationale sowie interkulturelle Aspekte der Denkmalpflege. Darüber hinaus werden aktuelle Fragen, Debatten und Ansätze diskutiert.

Veranst. SWS: 2

Übung

Di, wöch., 13:30 - 15:00, Bauhausstraße 9c - Arbeitsraum 004, 15.10.2024 - 04.02.2025

Beschreibung

This class introduces students to the world of urban studies, scientific research and practice. It provides an overview of the interdisciplinary field of urban studies and current debates. The module aims to equip students with a set of academic skills that enables them to gain a structured a sound understanding of the practices of social research. This encompasses carrying out a literature review, developing a research interest, formulating research questions and knowledge about how to design a research project, including relevant methods for data collection.

engl. Beschreibung

At the beginning we will deal with the process of production of scientific knowledge as such considering basic 'rules' of scientific work. As learning by doing is usually a successful way which makes us experiencing the specific demands of a research process you will work in the course in small teams defining and planning your own research project. Starting the practical work we will first deal with different sources of information, how to decode and evaluate them as wells as how to quote and organize them properly in scientific working and writing. Now having an idea how and where to gather information you will define your own research question and develop a research concept step by step going from a proper wording of the research question to the selection of fitting research methods, time planning and documentation.

Voraussetzungen

Participation: Readings, active participation, development and presentation of own research interest

Assignment: first-step research proposal: write a 2 page (Arial 11, line spacing 1) research proposal introducing your research interest, situating it in the relevant literature and developing a suitable research question, via Moodle.

Leistungsnachweis

Participation + presentations in class: 40%

Assignment first-step research proposal: 60%

1744294 Model Project Forum/ Seminar**B. Nentwig, P. Schmidt**

Veranst. SWS: 4

Seminar

wöch., online

Beschreibung

In this module, the International Model Project Forum is prepared in different steps. The seminar's goal is to exchange about and learn from different projects in the field of urban practice where third semester students have been involved during their Model Project semester in the winter semester 2020/21. The seminar challenges students to contextualise the own individual practical work and research experience into a broader context of reflective urban practice and research. This allows participants to deepen the understanding between practice and theory, to contribute real-world-experience in a reflective way and to develop a own set of interdisciplinary approaches within their individual professional role. The seminar also prepares students to hold a lecture dedicated to the International Model Project Forum, which closes as a highlight of the academic training. For this public academic event International Model Project Partners are invited to the forum as senior experts and critiques to the student presentations.

Course structure and requirements The seminar mainly consist of three phases and is accompanied through a virtual class-room, including a guided course with specific due dates, individual and groupwise online-consultations, life-meetings of the entire group and P2P-meetings as well as video-based presentation-coaching through Adobe Connect.

Course requirements include a final presentation, an interim report and a final report (25-30 pages) which is handed in online and as a printed version. After final rehearsals the module closes with the 21th International "Model Project Forum" (end of April 2021), requiring students attendance in Weimar or any selected place where the forum takes place. The forum fosters a critical but practice -related discussion among students and model project partners who are attending as guest critiques.

Learning Objectives

In this module students develop an in-depth understanding and exchange about professional fields dedicated to integrated urban development in an international context. Participants reflect the self-positioning and self-understanding of their professional role in the sense of 'Reflective Practice' related to urban strategies and interdisciplinary planning approaches. The final goal is to focus individual experiences about 'Good Practice' through adequate professional project-based training and praxis reflection.

engl. Beschreibung

In this module, the International **Model Project Forum** is prepared in different steps. The seminar's goal is to exchange about and learn from different projects in the field of urban practice where third semester students have been involved during their Model Project semester in the winter semester 2018/19. The seminar challenges students to contextualise the own individual practical work and research experience into a broader context of reflective urban practice and research. This allows participants to deepen the understanding between practice and theory, to contribute real-world-experience in a reflective way and to develop a own set of interdisciplinary approaches within their individual professional role. The seminar also prepares students to hold a lecture dedicated to the International Model Project Forum, which closes as a highlight of the academic training. For this public academic event International Model Project Partners are invited to the forum as senior experts and critiques to the student presentations.

Course structure and requirements

The seminar mainly consist of three phases and is accompanied through a virtual class-room, including a guided course with specific due dates, individual and groupwise online-consultations, life-meetings of the entire group and P2P-meetings as well as video-based presentation-coaching through Adobe Connect.

Course requirements include a final presentation, an interim report and a final report (25-30 pages) which is handed in online and as a printed version. After final rehearsals the module closes with the 19th International "Model Project Forum" (end of April 2019), requiring students attendance in Weimar or any selected place where the forum takes place. The forum fosters a critical but practice -related discussion among students and model project partners who are attending as guest critiques.

Learning Objectives

In this module students develop an in-depth understanding and exchange about professional fields dedicated to integrated urban development in an international context. Participants reflect the self-positioning and self-understanding of their professional role in the sense of 'Reflective Practice' related to urban strategies and interdisciplinary planning approaches. The final goal is to focus individual experiences about 'Good Practice' through adequate professional project-based training and praxis reflection.

Participation is mandatory for third semester students in Integrated Urban Development and Design – Reflective Urban Practice (IUDD-RUP).

Class based on continuous and active participation.

Bemerkung

Participation is mandatory for third semester students in Reflective Urban Practice.

Class based on continuous and active participation online.

120223701 EU policies, integrated development and redensification strategies in Europe's urban and regional development

K. Eckert

Veranst. SWS: 2

Seminar

Mi, wöch., 11:00 - 15:00, Bauhausstraße 9c - Arbeitsraum 004, 16.10.2024 - 23.10.2024

Mi, Einzel, 11:00 - 15:00, Bauhausstraße 9c - Arbeitsraum 004, 04.12.2024 - 04.12.2024

Mi, Einzel, 11:00 - 15:00, Bauhausstraße 9c - Arbeitsraum 004, 18.12.2024 - 18.12.2024

Mi, Einzel, 11:00 - 15:00, Bauhausstraße 9c - Arbeitsraum 004, 08.01.2025 - 08.01.2025

Beschreibung

The European Union is heavily investing in an "urban transformation" and pursues an integrated urban perspective. The New Leipzig Charter (2020) stresses the importance of integrated urban strategies for today's urban challenges and goals. The charter stresses the importance of urban dimensions such as the "green", "productive" and "just" city. However, upon closer inspection, broad EU policies and initiatives are defined by historical, cultural, socio-economic and environmental aspects (among others). How do integrated urban policies relate to broad EU policies, for example, the ambitions of the European Green Deal (2019)? Integrated urban policies and their role in EU policy is an important subject to debate; can integrated urban strategies support EU goals? If so, how?

The seminar will present current trends of EU level integrated urban policy. Key questions of the seminar include: What is "integrated urban policy" on the EU level and what characteristics does it have? What urban issues are identified/prioritized on the EU level? What role can scientific analysis have, for example, in explaining complexity? The seminar will start with a presentation of research results and experience on the pan-european environmental issue and urban planning instruments related to "land consumption" and "densification". With the help of the class, the topical variety of the seminar will then be expanded to explore further the integrated nature of urban challenges in detail. Literature will be used to evaluate integrated urban strategies from various perspectives. Group research will contextualize the issues and the role of policy to address these. Objectives of the seminar include: Develop a basic understanding of EU level integrated urban policy including current debates, develop a research question pertaining to policy, as well as apply a research method in a group setting to pursue the aforementioned research question. Ultimately, students will be able to actively contribute to future and creative urban visions and strategies.

121223701 IUDD Lectures**P. Schmidt**

Veranst. SWS: 2

Vorlesung

Do, wöch., 15:15 - 16:45, Bauhausstraße 9c - Arbeitsraum 004, 17.10.2024 - 06.02.2025

Beschreibung

This course will be offered in the coming summer semester 2024.

The understanding of a well-balanced urban development regarding social, economic and environmental needs is one of the main outlines of European Urban Policies to promote more sustainable cities. In 2007 the responsible ministers for urban development from 27 countries declared the Leipzig Charter as guiding principle to reach a stronger cohesion of the different factors that would be necessarily be more streamlined to reach such sustainable development. Integrated Urban Development Concepts since then have become a main instrument of urbanists to guide this process.

Urban and architectural qualities under the objective of climate adaptation and protection, renewable resources and resource conservation as well as long-term intergenerational perspectives are just some of the topics that have to be negotiated for more comprehensive future cities. For the disciplines concerned with urban design this means to develop a holistic view on the city and an understanding between the different disciplines, also in terms of a social equilibrium in urban space.

For this purpose the lectures in this module are framing different objectives of the Master's Programme »Integrated Urban Development and Design« with the idea to support the "urban curator" to develop a holistic view on the city and an understanding between the different disciplines. The lecture introduces different perspectives on integrated

urban development in the sense of multi-disciplinary planning approaches with a closer look on their implementation. Creative strategies and selected examples of "good practice" show how different approaches can be implemented through the lens of different disciplines, bringing together an academic and application-oriented reflection of the subject. Examples also include projects with a strong notion on computational concepts and analysis.

The IUDD lectures will take place as a combination of online-lectures, discussion and invited guest lecturers related to different approaches of requalifying cities and regions in terms of managing change and paradigm shifts. The goal of the lectures is to develop a general understanding and overview about how urban development and urban design can be considered in an interdisciplinary and integrated approach.

Leistungsnachweis

The format of the lectures requires students to contribute to moderated discussions and partly prepare those.

The final submission to receive credits is an essay for a selected subject. Students who require grading will be given an additional task to hand in an extended essay.

120223702 GIS for Integrated Urban Development

M. Abdelaziz Ibrahim Mousa

Veranst. SWS: 2

Seminar

Fr, Einzel, 11:00 - 16:45, Bauhausstraße 9c - Arbeitsraum 004, online, 18.10.2024 - 18.10.2024

Beschreibung

Geographic Information Systems (GIS) are a useful tool for multiple disciplines and user groups. In urban development and planning, different constituencies like local authorities interact through GIS e.g. applying it in environmental agencies, transportation, energy, resource and waste management, retail, disaster management, and socio-economics. Collecting, managing, analysing and visualising data with GIS as an information sharing tool can help in different stages of planning processes - from identifying problems to evaluating different planning proposals. Working with GIS allows to create easy understandable maps and to enable communication processes.

This course introduces different practices and applications of GIS in the wider context of urban development. It suits various users from different backgrounds who are interested in spatial information and mapping. Next to a theoretical insight to GIS, in practical applications participants will learn how to create maps by using ESRI ArcGIS software and get an insight in how experts are using GIS for different purposes related to questions of planning and design.

118223704 Moderating Planning Processes

T. Dobberstein

Veranst. SWS: 2

Blockveranstaltung

Do, Einzel, 11:00 - 15:00, Bauhausstraße 9c - Arbeitsraum 004, 07.11.2024 - 07.11.2024

Beschreibung

Integrated development and design processes require skills to effectively communicate with multiple urban actors, ranging from project stakeholders to citizen audiences. Fundamental knowledge of moderation is an important asset for the work with different interest groups in the urban sphere. The exercise course introduces basic moderation skills to meet today's challenges in the field integrated urban development and design, such as cooperative planning, mediation, and project evaluation. This includes the accurate detection of different interests, strategies for multi-interest decisions, and to work with potentially conflicting positions.

118223705 Reflective Urban Practice: Model Project Preparatory Course

P. Schmidt

Veranst. SWS: 2

Seminar

Do, wöch., 09:15 - 10:45, Bauhausstraße 9c - Arbeitsraum 004, 17.10.2024 - 06.02.2025

Beschreibung

The Model Project Preparatory Course "Reflective Urban Practice" introduces course participants to different fields of activity and occupation in urban development and interdisciplinary approaches in applied research, practice and administration. With the diverse professional fields existing in the field of urban development and design participants are prepared to evaluate and reflect their own existing experience for their future application at a Model Project Partner.

This seminar in the 1st semester of IUDD serves as preparation for the application and placement phase (2nd semester) prior to the Model Project (3rd semester) which students start in autumn next year. The "Model Project" (24 CP) is the praxis semester (3rd semester) of IUDD that takes place world-wide at a selected "Model Project Partner" (offices, institutions, administration) for the purpose of practical training. The internship arrangement (minimum 3 months) is related to urban design, planning, research and development. The training place is either proposed through the programme or the student, and approved through the coordinator of the Model Projects.

Learning Objectives

Besides an introduction to the 'Model Projects Integrated Urban Development and Design' students learn how to link their existing professional experience and interests to a broader field of professional activities related to planning and design. They present and reflect their professional experience. In a second part, the students are coached to further develop their specific interests and communicate them in their professional portfolio and actively take part in the targeted application for the reflective practice semester. First semester students are also attending the annual Model Project Forum to get first-hand impressions from different experiences of last semester's Model Projects.

Participation is mandatory and only for first semester master students of Integrated Urban Development and Design - Reflective Urban Practice (IUDD-RUP).

The seminar takes place in presence with individual consultations online. The class requires continuous and active participation.

registration: through BISON online platform

119223901 European Cities**D. Zupan**

Veranst. SWS: 2

Vorlesung

Di, wöch., 15:15 - 16:45, Marienstraße 13 C - Hörsaal B, 15.10.2024 - 04.02.2025

Beschreibung

What is the "European City"? How did cities in Europe develop historically? And what are trends and challenges that characterize contemporary European urban development?

By engaging with these questions, the lecture provides basic and interdisciplinary knowledge on European urban development. It discusses central concepts related to the "European City", provides an overview of foundational research, and explores new strands in urban studies. It illustrates these developments with case studies from different European cities. In the first part, the lecture reflects on the history of urban development and the material and immaterial urban heritage in European cities, and engages with the analytical and normative dimensions of the "European City". In the second part, it confronts the conceptual and theoretical concepts with current socio-spatial, economic and political developments in different European cities, such as neoliberal urbanism, processes of postsocialist urban transformation or the construction of heritage.

124220201 Green Gentrification**K. Brüske, S. Eipper**

Veranst. SWS: 4

Seminar

Mo, wöch., 13:30 - 16:45, Bauhausstraße 9c - Arbeitsraum 004, 21.10.2024 - 03.02.2025

Beschreibung

In cities worldwide, urban planners, citizens, and government officials are promoting environmental improvements such as increased green spaces, expanded bike infrastructure, pedestrianization, and car-free developments. These efforts aim to create more sustainable and livable urban environments.

However, as cities increasingly prioritize sustainability within their economic growth strategies, the link between environmental improvements and gentrification has become more evident. In particular, greening initiatives can catalyze and signify gentrification, intersecting with city policies, housing market dynamics, and real estate development. This seminar will involve delving into academic literature and examining case studies.

Note (Präsentation im Unterrichtsraum und wissenschaftliche Arbeit)

1411526 Verkehrsplanung

U. Plank-Wiedenbeck, L. Kraaz, J. Uhlmann, T. Feddersen Verant. SWS: 2

Integrierte Vorlesung

Di, wöch., 15:15 - 16:45, Coudraystraße 13a, HS 3, 15.10.2024 - 04.02.2025

Di, Einzel, 15:15 - 16:45, Prüfung HS 2, 17.12.2024 - 17.12.2024

Beschreibung

Die Veranstaltung Methoden der Verkehrsplanung gibt einen Überblick über das Aufgabengebiet der Verkehrsplanung, wobei die umweltgerechte, nachhaltige Gestaltung im Fokus steht. Dazu werden die grundlegenden Begrifflichkeiten, Mobilitätskenngrößen und verkehrsplanerischen Fragestellungen mit einem Schwerpunkt auf die methodische Vorgehensweise betrachtet. Mobilität als Zusammenhang zwischen Aktivitäten und Ortsveränderungen wird als Schnittstelle zwischen Stadt- und Verkehrsentwicklung thematisiert. Vorgestellt werden u.a. Instrumente der integrierten Verkehrsplanung (z. B. intermodale Konzepte, Parkraumbewirtschaftung etc.), Plangrundlagen (Nahverkehrspläne/ Radverkehrskonzepte etc.) und verkehrliche Erhebungsmethoden. Der Praxisbezug wird u.a. durch die Behandlung von Verkehrsentwicklungsplänen und Beispielen geplanter bzw. umgesetzter Vorhaben hergestellt.

Bemerkung

Die Einschreibung für den Beleg ist ausschließlich am Anfang des WiSe möglich! / The registration for the project work is only possible in the beginning of the winter term!

Lehrformat WiSe2024/25 (Stand 30.07.2024): Präsenz**Beginn der Lehrveranstaltung: 15.10.2024**

Studierende der Fak. A+U schreiben sich bitte innerhalb des Einschreibzeitraums für diesen Kurs ein. Studierende der Fak. B nutzen bitte die Prüfungsanmeldung für den Kurs "Verkehrsplanung: Teil Methoden der Verkehrsplanung". Bei Problemen und Fragen zur Einschreibung wenden Sie sich bitte an vsp@bauing.uni-weimar.de

Leistungsnachweis

Die Prüfungsleistung für das Teilmodul Methoden der Verkehrsplanung besteht aus einer schriftlichen Prüfung (60 Minuten, Termin im Dezember) und einem Beleg (Abgabe im Januar). Die Note der Klausur wird 75 % gewichtet, die Belegnote 25 %. Der Beleg wird ausschließlich im Wintersemester angeboten.

Der Beleg greift aktuelle Themen der Verkehrsplanung auf, welche in Gruppenarbeit (3 Personen pro Gruppe) für soziale Medien erarbeitet und aufbereitet werden sollen. Der Beleg soll dadurch Kompetenzen der modernen Wissenschaftskommunikation stärken und die thematische Vielfalt der Verkehrsplanung aufzeigen

2909021 International Case Studies in Transportation

Beschreibung

Wie gehen wir mit Herausforderungen im Bereich Mobilität und Verkehr um, z. B. mit den Auswirkungen auf die Klimakrise, mit Problemen des zunehmenden Gegensatzes zwischen ländlichen und städtischen Gebieten oder mit Fragen der Migration und räumlichen Beschränkungen? Wir glauben, dass dies nur durch die Zusammenführung von Fachwissen aus verschiedenen akademischen und praktischen Bereichen erreicht werden kann. Das Seminar stellt daher Positionen aus einer ausgeprägt interdisziplinären Position vor, die Verkehrs- und Stadtplanung mit Medienwissenschaft, Medienkunst, Journalismus und Sozialwissenschaft verbindet. Darüber hinaus bieten wir Perspektiven, die auch über den europäischen Kontext hinausgehen, und präsentieren Beispiele, die als "Best Practice" gesehen werden können. Einen Schwerpunkt sollen hierbei Phänomene des 'ruhenden Verkehrs' einnehmen, also Parken, Abstellen und z.T. Warten.

Der Kurs ist in zwei Teile gegliedert: Zunächst werden die Studierenden gebeten, an einem Online-Angebot teilzunehmen, das eine Einführung in die Grundlagen der Verkehrsplanung bietet. Anschließend werden in einem intermedialen Seminar Texte, Hörstücke und audiovisuelles Material zum Thema Verkehr und seinen Auswirkungen vorgestellt.

Bemerkung

Das Seminar findet als Blockveranstaltung an den oben aufgeführten Terminen statt.

Der Einführungskurs zur nachhaltigen Verkehrsplanung findet online statt (self-paced).

Der Kurs ist auf 15 Teilnehmer begrenzt.

Informationsveranstaltung am 14.10.2024 um 17:00 in der Schwanseeestr. 13, Raum 2.02

Einsendeschluss für das Motivationsschreiben: 15.10.2024 23:59

Die Zusage für den Kurs wird am 16.10.2024 verschickt.

Voraussetzungen

Bitte beachten Sie, dass eine kurze Bewerbung mit Darstellung Ihrer Motivation und Ihres akademischen Hintergrunds erforderlich ist. Die Modalitäten werden auf der Informationsveranstaltung näher erläutert.

Leistungsnachweis

Mündliche Prüfung in Form einer Präsentation.

Master-Colloquium
