KAMINGESPRÄCH - Alumni Meeting Series

Dr. Sukanya Krishnamurthy - Eindhoven University of Technology (NL)

**Experiences in Formal & Informal Urbanization Processes,
and Interdisciplinary Research.**

14th November, 2014 - 18:30h

IfEU - Belvederer Allee, 5 - Room 005

Educated as an architect and urbanist in India and Germany, Sukanya Krishnamurthy received her Ph.D. from Bauhaus University (Germany) in 2012.

She is currently an assistant professor at the Chair of Urbanism and Urban Architecture at the Department of the Built Environment at the Eindhoven University of Technology (NL).

During the course of her professional life, she has worked as an architect, designer, lecturer and researcher in Bangalore (India), Aachen, Dessau, Weimar (Germany) and Toronto (Canada).

Sukanya's interests lie at the interface of urban, social and cultural geography, where her research explores various narratives that can be read through architecture within the multidisciplinary milieu of the contemporary city.

These include a wide range of subjects: aggregated and individual socio-spatial practices, forces shaping morphology, urban transformations and interdisciplinary methods of research.

The Alumni Meetings are organized regularly during the semester and provide an opportunity for our colleagues already holding a Ph.D. degree to share with us their experiences, mainly (but not exclusively) bearing in mind the question **"What comes after the PhD?"**.

Snacks and beverages create a pleasant and relaxed atmosphere for an intense exchange of ideas and new horizons. After the event everyone is invited to continue talks in the bar **ACC** with some dinner/beverages.
