

## Disable Autostart after Installation

AnyConnect writes itself into your Autostart. You can disable this feature if you don't need it.

### If you use Windows 7:

*msconfig > Systemstart > Cisco AnyConnect Secure Mobility Client*

### Windows 8 and above:

*press Ctrl + Alt + Del > Taskmanager >  
more details > Autostart > Cisco AnyConnect User Interface > disable*

The Client can be accessed via the start menu:

 Cisco AnyConnect Secure Mobility Client
