

Combined Search in the Artists' Book Collection of the Bauhaus-Universität Weimar Library

A detailed classification system has been developed for the artists' book collection, allowing the holdings to be searched according to aspects of book design, genre, and individual copy characteristics. To perform a combined search for several of these aspects within the collection, please proceed as follows:

On the page <https://www.uni-weimar.de/en/university/structure/central-university-facilities/university-library/search-and-find/artists-book-collection/> you can display specific subsets of the collection by selecting the respective classification categories. For example, by selecting "Ie 6835", all publications classified as "photobooks" will be displayed in the library catalog; by selecting "Ie 6826", all publications recorded as "hand signed"; and by selecting "Ki 1109", all publications that make use of "special materials".

An example: If you wish to display only works that combine all three of these characteristics (photobook, signed, special materials), you can use the "Search history" tab in the library catalog. There, select your last three searches by ticking the corresponding boxes and combine them using the "combine (and)" function. The catalog will then display only those works that meet all selected criteria.

In this way, you can carry out targeted searches for specific approaches to book design or artistic strategies that are relevant to your own artistic practice, teaching, or research.
