READABLE

Kaleidoscope finds the most readable way to express changes. Instead of simply showing what's easiest for a computer to parse. Our 100% custom comparison engine goes the extra mile to give you the clearest possible overview.

VERSATILE

Compare your files in three different layouts, use instant search to find matches in one or both files, and use your keyboard's arrow keys to quickly jump from change to change. There are no distractions but tons of useful features.

Twitter Release Notes Support 

Compare files with...

KALEIDOSCOPE

Use Kaleidoscope to **spot the differences** in text and image files. Review changes in seconds with the world's **most advanced** file comparison application.

 **Text Scope**
Compare text and source code.

 **Image Scope**
Review mockups and photos.

 **Workflow**
Integrate with just about anything.

 **Details**
Skim through the feature list.

SPOT ON

The human eye is really good at spotting differences, but sometimes it can use a little help. Each layout aids the eye in a different way, to help you quickly spot anything, from the smallest retouch to image-wide color changes.

RESPONSIVE

Simply put, the image scope is really fast. Scrolling and zooming is always responsive, whether you use multi-touch gestures or your mouse and keyboard shortcuts. Try it once and you'll wonder why you ever settled for less.

PLAYS NICE

Kaleidoscope integrates perfectly with Versions, our award-winning Subversion client. Gitbox and Tower also integrate nicely. For everything else there is ksdiff, our built-in command-line tool.

FILES GALORE

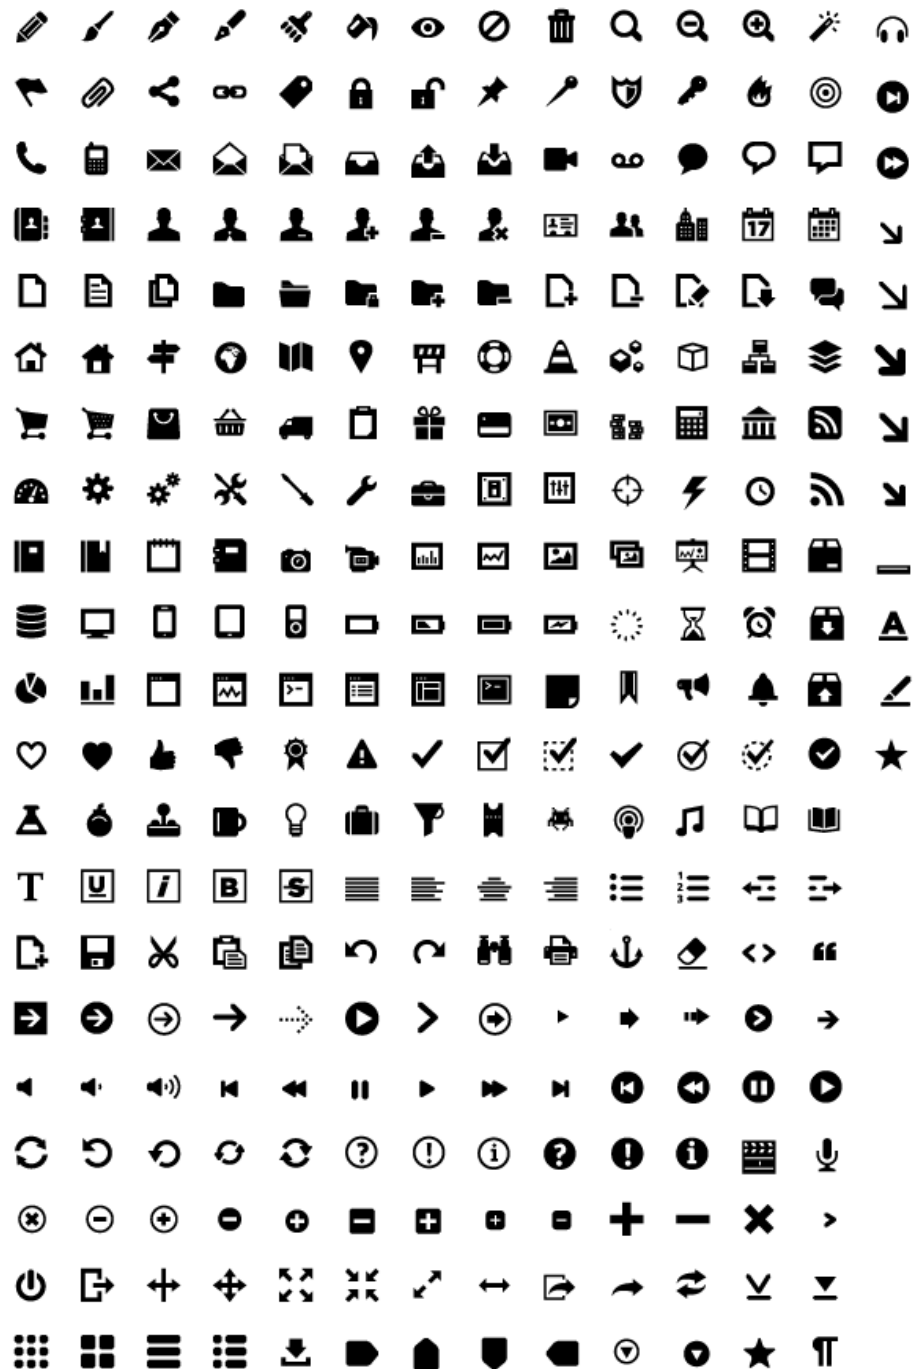

Drag a bunch of files onto Kaleidoscope to compare them to each other. Make as many comparisons as you want, and switch between them in Kaleidoscope's uncluttered single-window interface.

555 KUBIK | facade projection

from urbanscreen 3 years ago

555 KUBIK
"How it would be, if a house was dreaming"

The conception of this project consistently derives from its underlying architecture - the theoretic conception and visual pattern of the Hamburg Kunsthalle. The Basic idea of narration was to dissolve and break through the strict architecture of O. M. Ungers "Galerie der Gegenwart". Resultant permeability of the solid facade uncovers different interpretations of conception, geometry and aesthetics expressed through graphics and movement. A situation of reflexivity evolves - describing the constitution and spacious perception of this location by means of the building itself.

ÜBER UNS

Das Thüringen-Cluster BioEnergie Verbund e.V., gefördert durch das Thüringer Wirtschaftsministerium, hat als Zielstellung, die Aktivitäten im Bereich Biomassenutzung zu bündeln und dessen Akteure zu vernetzen, um in Thüringen ein internationales Zentrum für Bioraffinerietechnik zu etablieren.

Gemeinsam mit den beteiligten Unternehmen und Einrichtungen wird das gesamte Aufgabenspektrum von Forschung, Lehre und Entwicklung über die industrielle Produktion bis hin zur Öffentlichkeitsarbeit und Produktplatzierung abgedeckt.

Dabei fühlt sich der BioEnergie Verbund e.V. den normativen Werten:

Nachhaltigkeit, ökologische Verträglichkeit und ökonomische Darstellbarkeit

verpflichtet und setzt diese in der Praxis konsequent um.

Seit seiner Gründung organisiert das Thüringen Cluster zukunftsweisende

Forschungsunternehmungen, führt sie unter fachkundiger Anleitung von Hochschulen, Wissenschaftlern und Ingenieuren durch und evaluiert die Ergebnisse nach bleibenden Standards.

Durch die Vereinsarbeit werden Märkte, Nachfragesituationen und wirtschaftliche Potentiale erfasst, entwickelt und erschlossen, zu denen die am Cluster beteiligten Unternehmen einen direkten Zugang erhalten. Aus dem kooperativen Charakter des Verbandes entwickeln sich darüber hinaus neue Forschungsprojekte und Arbeitsgruppen.

Das macht den BioEnergie Verbund e.V. zum idealen Partner der Branche.
