

# **Mindaugas Gapševičius & Klaus Herbst**

**Gestaltung Medialer Umgebungen**

Fach- / Werkmodul

**Winning natural habitats, Thursdays, 9.15-12.30**

Could the use of populated water puddles clean the air?

How do different pH levels affect organisms and their environment?

How do different nitrate levels affect organisms and their environment?

How do individual species change the environment?

# **Mindaugas Gapševičius & Klaus Herbst**

**Gestaltung Medialer Umgebungen**

Fach- / Werkmodul

**Winning natural habitats, Thursdays, 9.15-12.30**

We will start with rainwater and semi-controlled environments populated by selected organisms. Particular attention will be paid to the transient relationships between individual species and their environment. We will also try to understand empirically how the environment affects individual species and how individual species affect the environment.

Fach- / Werkmodul

**Winning natural habitats - Workshop, April 25-27**

Part of the course is a block workshop *Ecosystem services* with environmental scientist Outi Wahlroos (FI). The workshop was developed to acknowledge the services which nature can offer humans. The aim is to raise awareness of the fact that without a nurturing and healthy environment, humans do suffer. The workshop is scheduled for April 25-27 and will be executed in the campus.garten.
