404 Error

I have come across through different internet pages where error 404 page is not well defined. The icon above doesn't give concrete information about what is going on. At a glance it seems as some information icon, one cannot come up with solid information about the icon. Following is my suggested icon for 404 page error.

Description

404 error is very common page we frequently suffer in some websites. I came up with idea that it should be more meaningful and clear to understand. As one can see the cloud is broke up into pieces which means we are disconnected from the server. The 404 rain drops show the server is sent us the message.
