Harle

In Europe -Red Data Book
In Germany -map
explain geographic biomes
why the decline?
habitat fragmentation and
migration distances
other barriers

Thuringia -Weimar
on a personal level -Proposal: Birdhouse for Butter-
flies
choose species
select plants for eggs and larvae
select plants for
on a larger community scale -Butterfly Gardens
walks for data collection

to speparate /quarentine
experiment /test
observe
domesticate
transport
revitalize /rehabilitation

an example: vanessa cardui in space
history as 'lab rat'
nasa project -why?
partners & school involved
myself
where/platforms -flickr/facebook

Butterfly - Lepitoptera -Papilonoidea
what are they good for?
what if we loose them?

artificial habitatis
in terms of conservation
examples:
fish
coral reefs
plants
animals

explain assisted migration /colonization
social theory =native vs. non-native
