What is Ecosystem?

Back to Ecosystems

Mindaugas Gapševičius, Isabella Lee Arturo, Bethan Hughes

Guattari identifies three interconnected ecologies:

Environmental ecology — our relationship to the natural environment.

Social ecology — our relationships and collective structures.

Mental (or human) ecology — our inner worlds, desires, and subjectivities.

Guattari, F. (2000). The three Ecologies, London NW1 7SG and New Brunswick: THE ATHLONE PRESS.

Creative process

How does my work engage with environmental processes — materials, energy, site, context?

How does it create or question social relations — collaboration, participation, community?

How does it shape subjectivity — perception, emotion, thought?
