

drastic measures

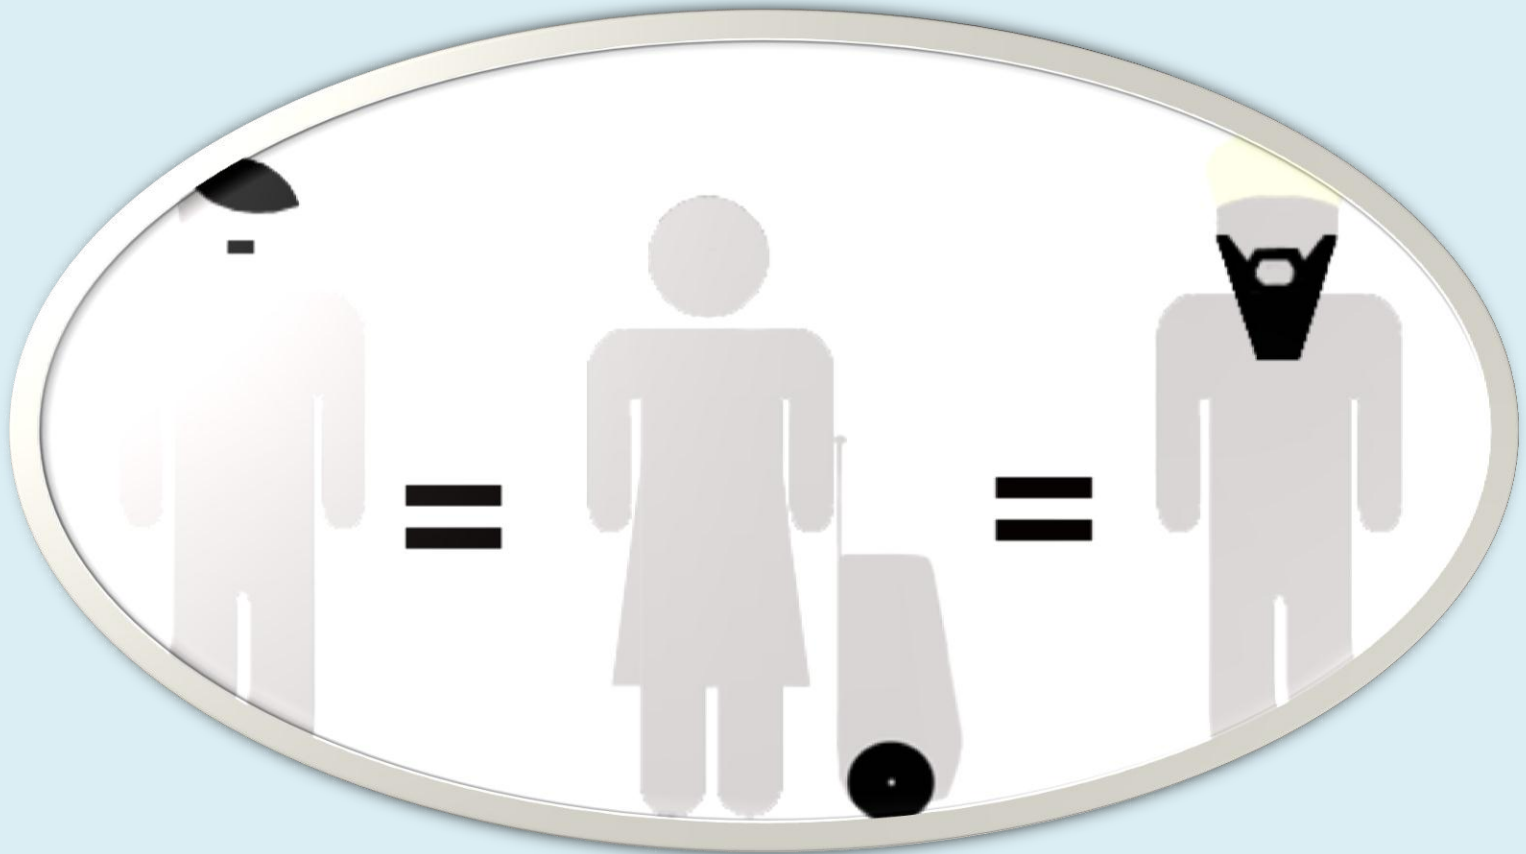

The Problem

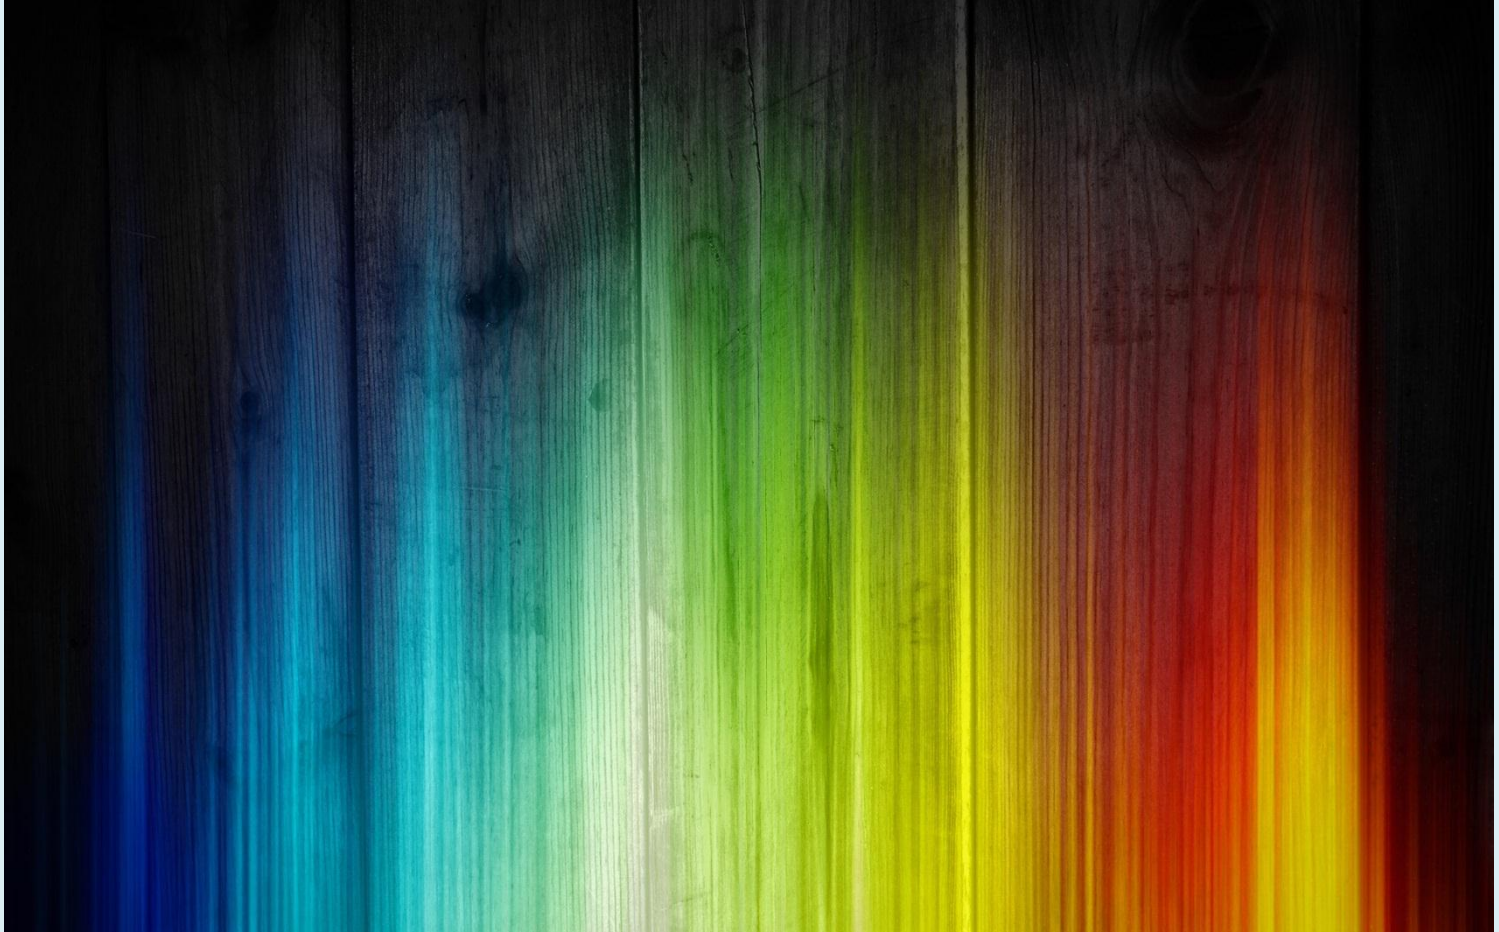

Too many **people** use their advance in knowledge to capitalize other people who are lacking knowledge

From now on

Everyone is equal

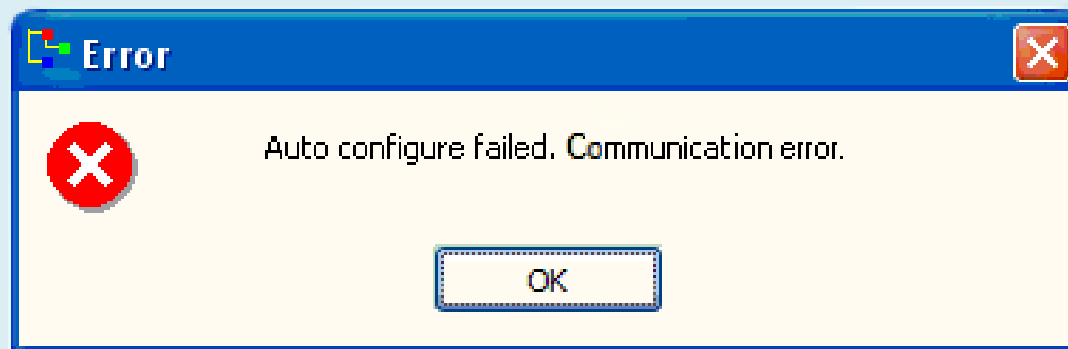

There exist no colours anymore

There are no more languages

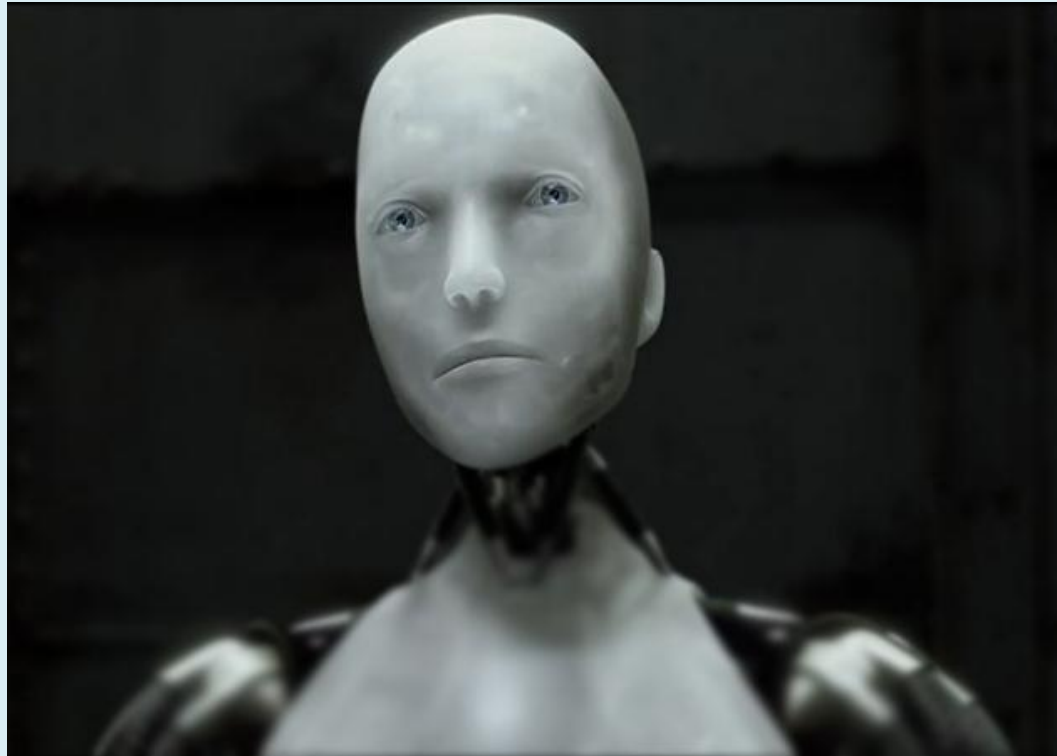

There is no more communication

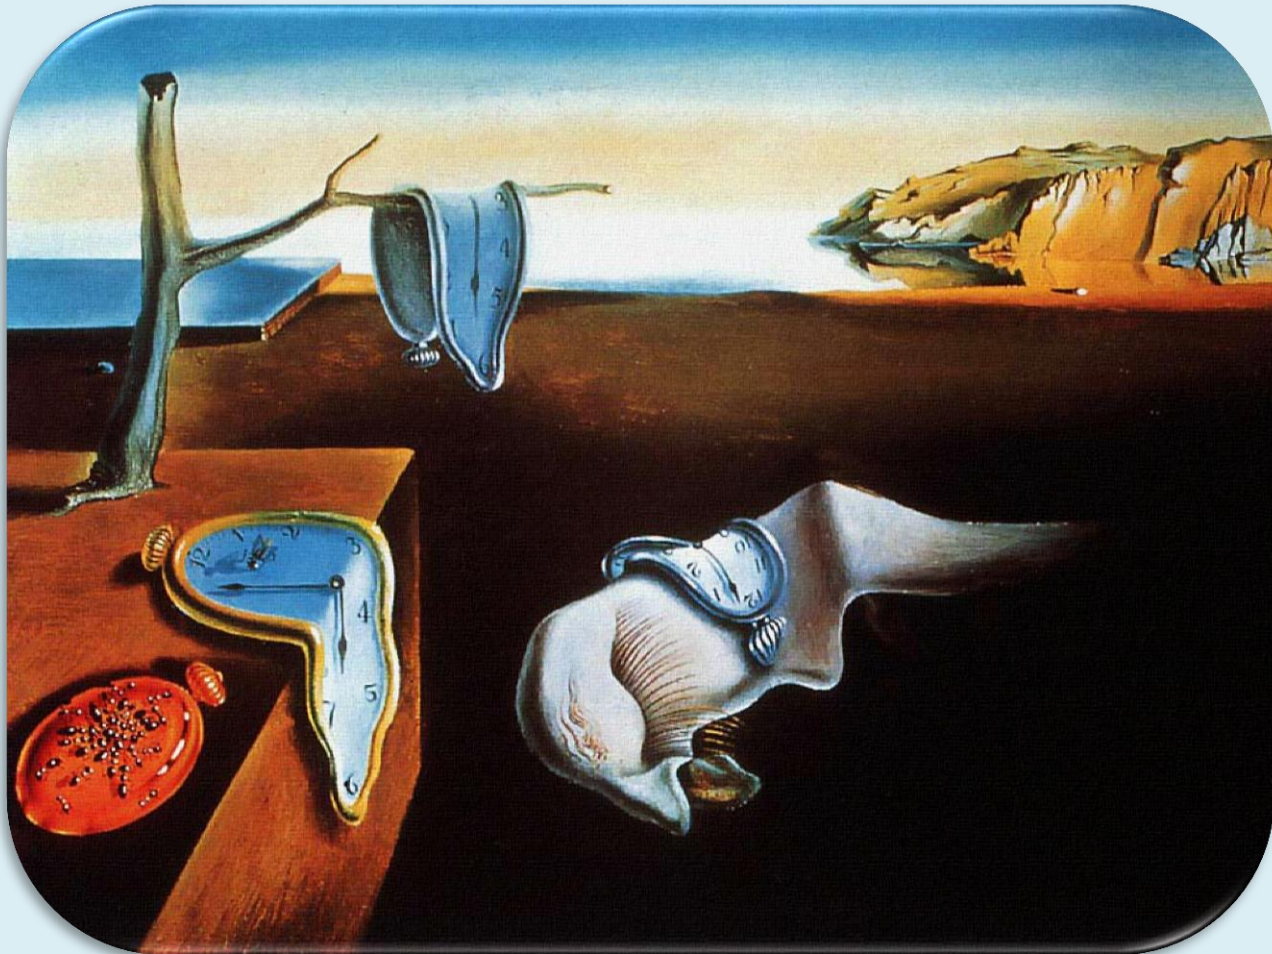

Now you cannot take advantage
anymore 'cause all human beings have
become the casing of themselves

The humanity becomes a bulk of unreflected
robotlike beings

No more capable of thinking, reflecting and
deciding anymore

Thus, the existence of time becomes irrelevant for
each one of us

Temporary End
of the world
