The Glass Box Interactive Facade

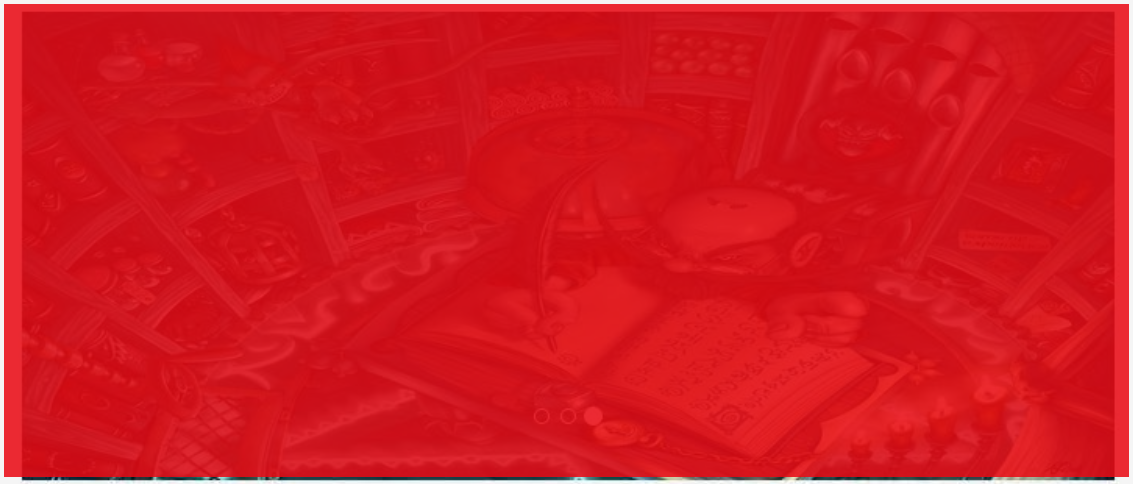
Jane Doe
View : Web-site



Every individual's perspective is different from the next. This is the basis for this project. FaÃ§ade design is usually perceived as a fixed element of a building. Perceiving it as a customizable aspect is the challenge. This project aims to open up opportunities for the public to envision their own view of the surrounding buildings and monuments. The Cube is essentially a glass cubic installation with different types of glasses and lenses attached to the walls of the cube. From inside the cube each person can see the entire Marktplatz with an entirely different perspective by rotating the glass panels and creating their own pattern.
