Share your
Speciality

Introduction.

This application is a sort of Social Network Service. Learning and Teaching through Internet. If the user have a speciality, can be a "Guru" in this app. And the user also have a interest, can be a fan of other "Guru".

feature.

01.
Learn from others
Be a fan of other Gurus. And then learn about your interests!

my app. design >>

02.
Share your own Speciality – Make a tutorial
Show your speciality and Make your own archive.

03.
Make a friend with same interest
Give a smiley, and communicate with other users.

# 1.Learn from others

This is the first page when user turn on the app. Posts from your Gurus will display on this page.
When user touch a home button then can come back this page.

1.Learn from others

After reading or watching tutorials, then user can give "Smiley" for the Guru.
And then can leave a comment about their tutorial.
The accumulation of Smiley will be a standard for a "Top10" tap.

1.Learn from others

TOP 10

1. WORKOUT!!

2. MAKE UP
   – JESSICASTYLE

3. DECO YOUR ROOM

4. DO A NAILART

This is the "Top 10" tap.
It shows the most popular 10 tutorials in this week.
I'll add a setting icon next to text, then people can see the trend of specific period.

# 2.Share your Speciality

Other parts are all same. Just make a choice between photo and video.

3. Make a friend

This is a tap for 'My account'.
It shows your Speciality and Interests.
And basic information for your accou
nt to show other users.
When user tap the Post/Guru/Fans
icon, then can see the whole list of tho
se category.
