History	Description in few paragraphs about Dom In 8 era. *
Guide	Consist of 4 part: 1. Plan of Dom 2. Text 3. Photo 4. Details of each photo
worship sending	Possibility to send worship text by user and receive the answer on coming Friday.

Guestbook	Possibility to send text.
Videos	Videos about Dom.
Legends	Audios about Dom.

*(information are just in text format).

Opinion: Which features would you use in your prototype App for *Weimarpedia*, and why?

Features which I find useful in "Der Kölner Dom" app, and want to utilize also in my app design:

Photo: It can help the user, to identify special site faster meanwhile visiting.

Video: They would be useful for some additional information about a place and convey them faster by visiting a site rather some text.

Building's plan: Helps user to find their desire point in a big hall even without internet.

Features which I think are essential but in this app did not employed :

Map

Map GPS

Map Static: Generally user with a map can comfortably manage everything even their time of arrival.

Review: For using an app it is very important to read other user opinion. It can help the user to decide for buying or installing one app.

Share: I think people rely on the other users' experience more, than a tough description. So it is essential for user to be able to share data.
