Welcome: Starts with a welcoming screen with a nice picture at the background also giving a little hint about the cathedral

Map: There are 2 kinds of map. GPS Map that can help you to locate the cathedral on the map and giving you the directions to its co-ordinates. The other map is a static map. It is drawn to describe the place from inside. It helps you to visit the places you want to visit. Also it helps you to orient yourself to the place.

Content: it is very interactive. It consists of well captured photos added to it description of the place captured in the picture. The photos are well done with high quality also the description is short decent and direct to the point.

Chronology: in this section the content is written in a chronological order for the events that happened in the place.

I would recommend using static map as well as using Chronology
