Describe the content structure of the app:

- Map – It is a static map. It just shows the location of the places.
- Video --- It describes the ancient history of those places.
- Audio – It also describes the ancient history of those places.
- Articles --- it describes the current situation of those places, its Histories and its surroundings.
- GPS --- By this can find the Latitude and Longitude of the current position.
- Web-Index

Opinion: I would like to use video in my Weimarpedia apps. I found those videos are more interesting and described all the information so beautifully. People feel more attraction to see video rather than reading articles. So, I think by this video we can easily describe all the information and it will make our apps more content full.
