Describe the content structure of the app: (example:)

- Welcome （NOW&THEN ＋ MAGAZINE）

- Map   ▪ Tour

- Glossary （SITES ＋ NAMES ＋ Topics）   ▪ More （About Us ＋ Guide Book ＋ Language）

Opinion: Which features would you use in your prototype App for Weimarpedia, and why?

- Methodical classification （Not only classified by thoughts of App maker but also reference to the user's wishes. Design it according to the relevant information of Bauhaus from users. From the user's point of view, have been classified in Sites, Names and Topics. It will improve the user a pleasant degree effectively and easier to find the information that users need.)

- Specific information （It is very essential for the uses that the App has detailed and accurate information. Thus, in every place all the appropriate information will be attached so that the user find the address, opening times even the transportation information directly and help users plan their trips.）

- Succinct Interface （Using interface is very important for every app especially the one which have cultural nature. Overall, this App's interface colors are comfortable and the clear classification also cannot make people

confused. At the same time the designer should try to reduce the processing time of users, help the users find the information they want as soon as possible. I think what is worthy of studying is the smoothly sliding and clear icon even the color with no pressure.）
