Content structure of the app:

**Welcome**

-A Panoramic picture of a site with audio played on loop.

**Map**

-GPS Map with museums and sites pins.

-Tapping on the pins opens a page with Audio & Text content about the site.

**News**

-Not updated.(Still have old news),

-Links in the news are not connected / clickable,

-No notification of events (Calendar Based).

**Knowledge**

-Information about the historical pile dwellers lifestyle & Technology.

For prototype App for Weimarpedia , I would use Map feature in as it is an integral part of the concept. Also there will be Participation from the user hence the prototype App will have means of uploading, reviewing and sharing content generated by the participant. There will also be data augmentation hence there will be combination of AR , Photo,audio & Video features.
