Summary

1. Prototype Presentation	3
1.1. Screens/Navigation	10
1.2. Time	15
1.3. Tips	16
2. Reference Styles	29
2.1 Some Examples	33
3. Reference Manager	42
3.1. Zotero	49
4. References	59

Prototype Presentation

Guidelines

Prototype Presentation

Prototype Presentation

What it can be?

Improved version
of an existing app

New app
idea / service

Prototype Presentation

Either way, what should be presented?

Prototype Presentation

- App name.
- Kind of service/type is offered by it.
- Target Group (tourists, students, elderly people, etc)
- Why it is needed? (Try to “sell” it)
- The OS (iOS, Android, etc) and **why** it was chosen.
- Screen Resolution.
- **Screens presentation and navigation.**

Prototype Presentation

If you will present an improved version of an existing app, in addition it is needed:

- Show WHY it was necessary, and HOW it can be improved.
This would deal about features and accessibility of those new features.
- Even if some features are already in other apps, you can also show a comparison with them. For instance, in which way your solution is "better", or "easier" to access.
- You can also try to offer a totally "original" feature, that could be the real differential about your app from others.

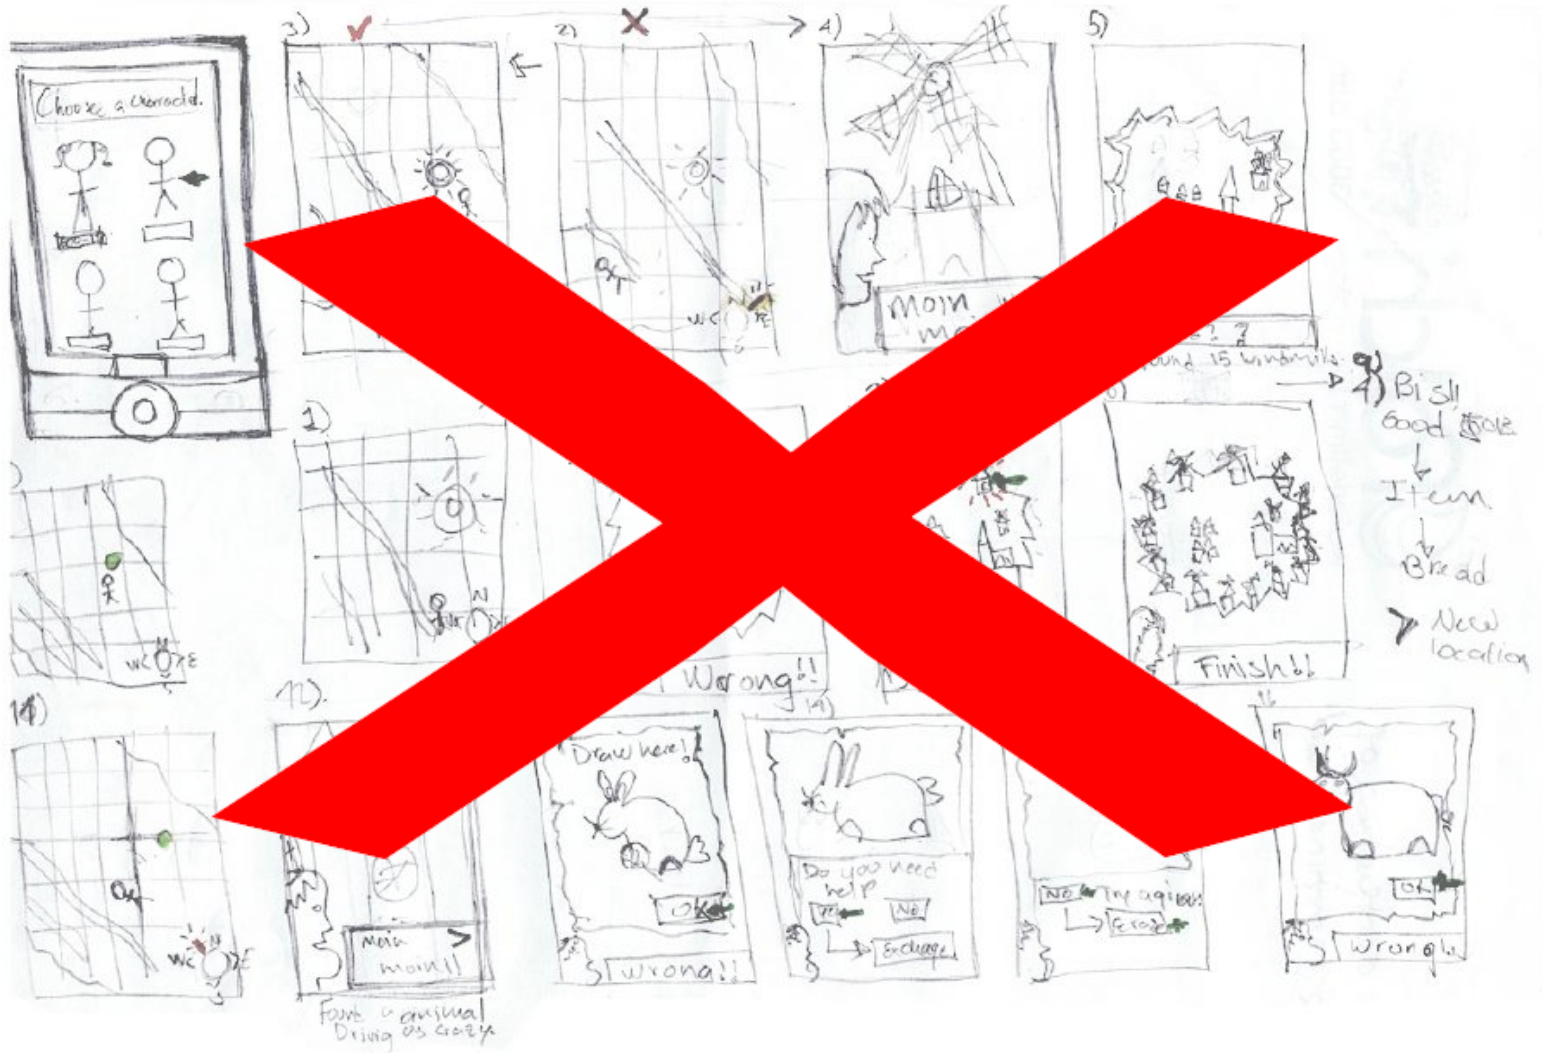

Prototype Presentation: Screens/Navigation

The student should provide the entire mock-up for accessing a functionality.

For instance, if the user wants to select a feature from the welcome screen, which steps (and how many “buttons” should be pressed) until achieve the desired information.

Prototype Presentation: Screens/Navigation

Prototype Presentation: Screens/Navigation

Prototype Presentation: Screens/Navigation

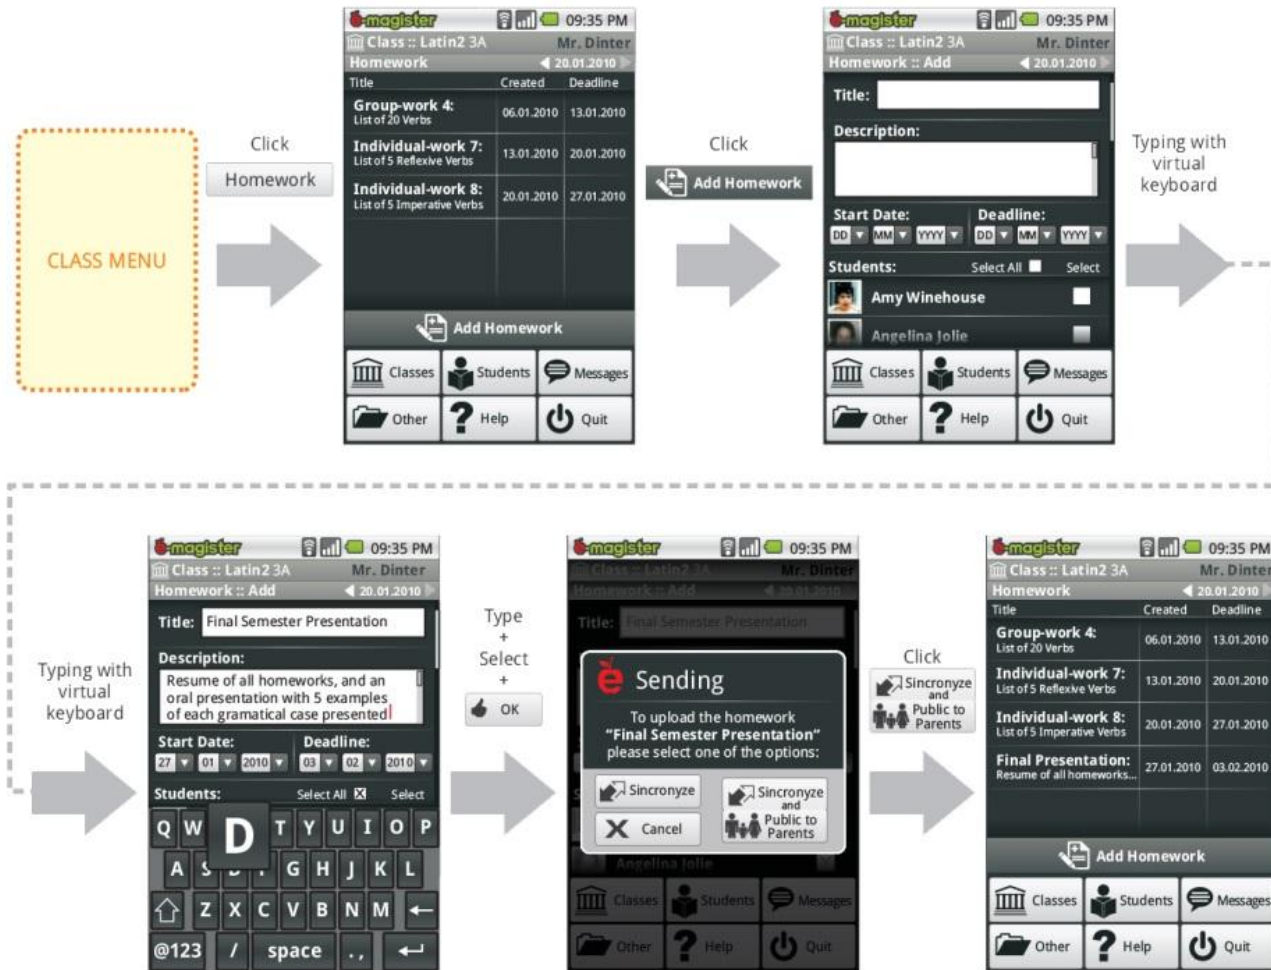

Image retrieved from *E-Magister: Digital Classbook* (Dutra, Ebel, & Lagos, 2010, p. 5)

Prototype Presentation: Screens/Navigation

Optional: further navigation explanations

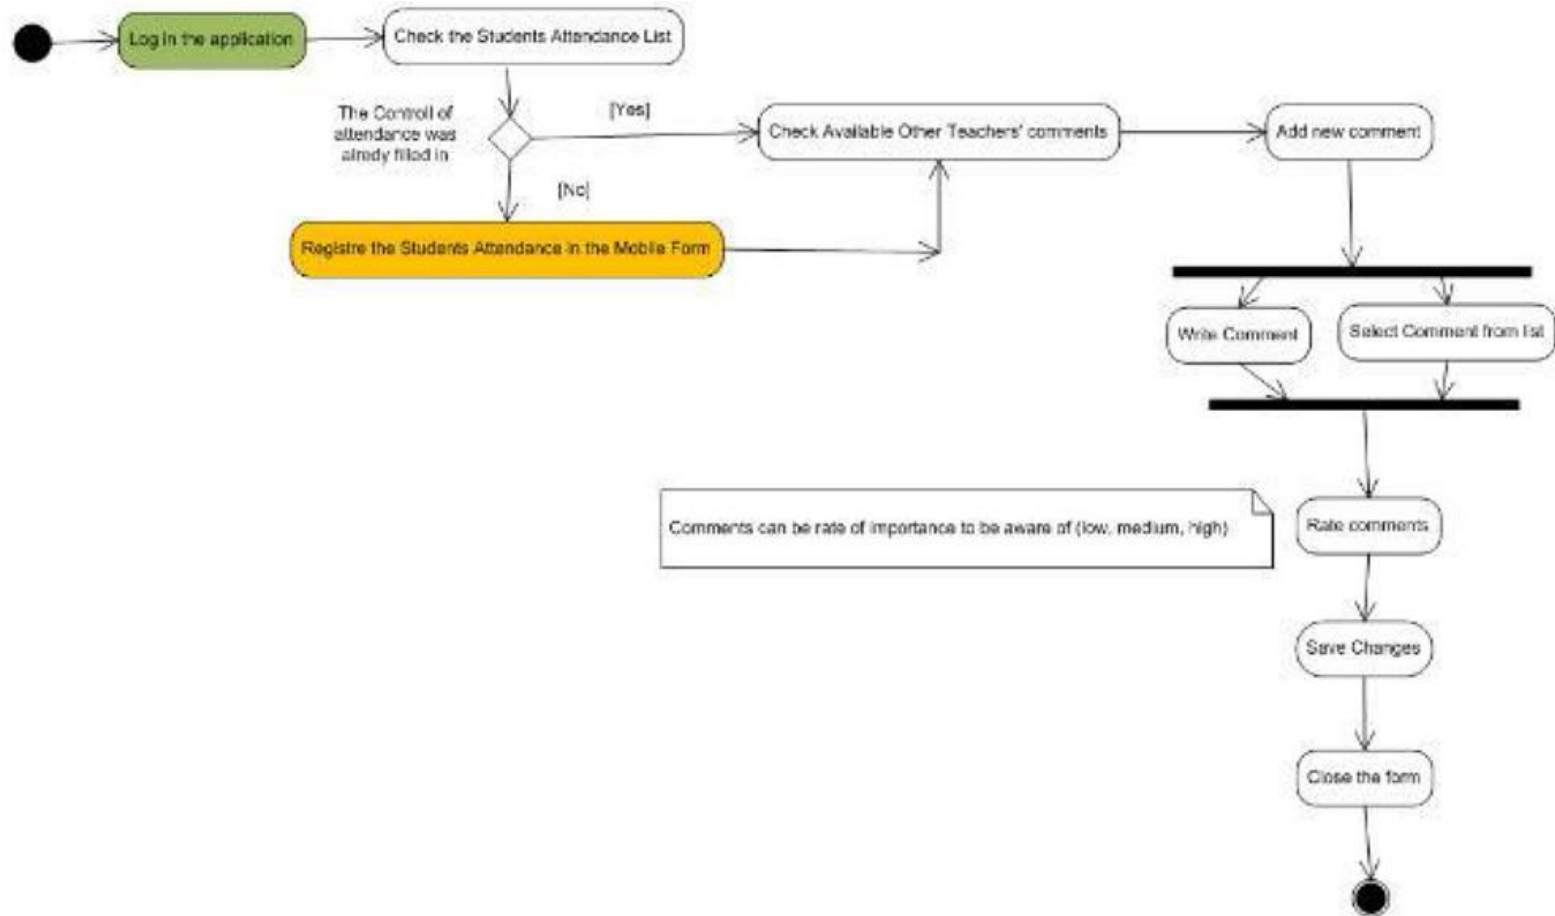

Image retrieved from *E-Magister: Digital Classbook*

Prototype Presentation: Time

- **15 to 20 minutes**
- At 15th minute, a **green** sign will be given and should finish in 5 minutes.
- At 20th minute a **yellow** sign will be given, showing that the presentation already reached the time limitation.
- At the 25th minute a **red** sign will be given and the presentation will be interrupted.

Prototype Presentation: Tips

Tips and Guidelines

Prototype Presentation: Tips

iOS Human Interface Guidelines

- <http://developer.apple.com/library/ios/documentation/UserExperience/Conceptual/MobileHIG/MobileHIG.pdf>
- <http://developer.apple.com/library/ios/#DOCUMENTATION/UserExperience/Conceptual/MobileHIG/Introduction/Introduction.html>

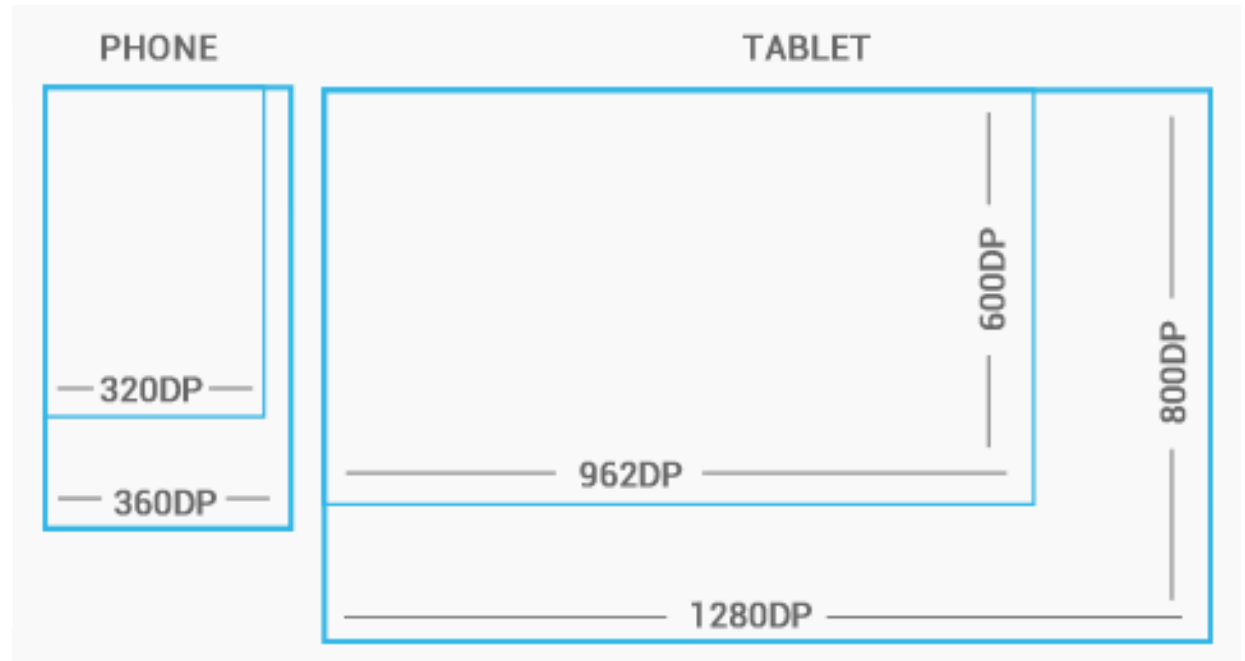

Status bar: 20 pixels
URL text field: 60 pixels
Remaining space: 140 pixels
Form assistant: 44 pixels
Keyboard: 216 pixels

Prototype Presentation: Tips

Design | Android Developers

- <http://developer.android.com/design/index.html>

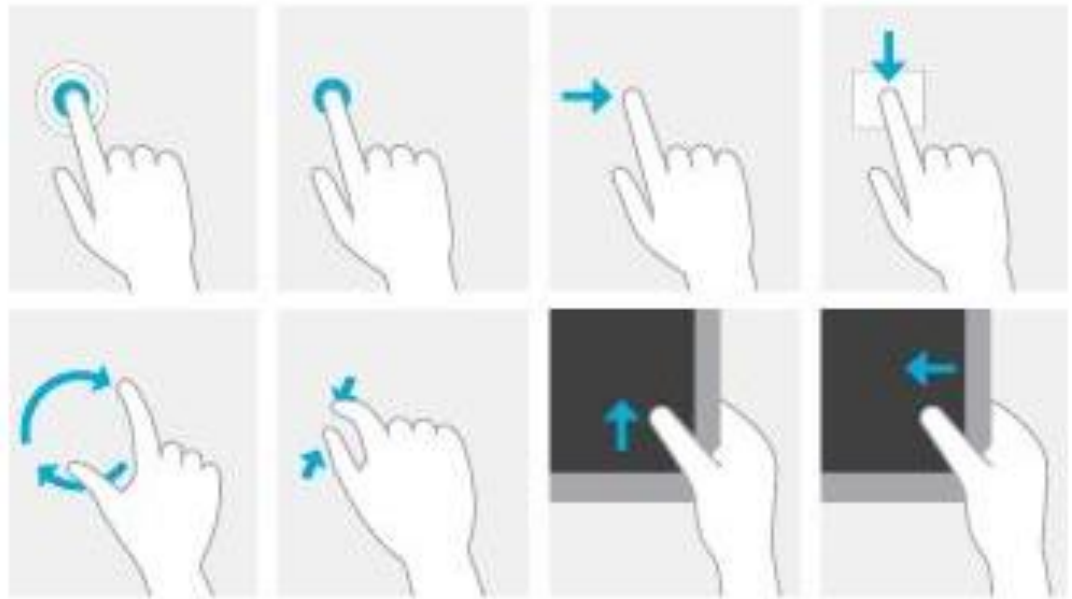

Prototype Presentation: Tips

Index of UX guidelines for Metro style apps

- <http://msdn.microsoft.com/en-us/library/windows/apps/hh465424>

Prototype Presentation: Tips

UI Design Guidelines for Handheld Devices

(Stone & Open University, 2005, p. 384) (adapted from Weiss, 2002, pp. 66–70)

- **“Select” versus “Type”**

Text entry on a small device can be difficult. Where possible, and where it is appropriate to the application, the user should be offered a selection option rather than be made to enter text. Finding the best solution will require both thought and user testing.

Prototype Presentation: Tips

UI Design Guidelines for Handheld Devices

(Stone & Open University, 2005, p. 384) (adapted from Weiss, 2002, pp. 66–70)

- **Be consistent**

Ensure that the same terminology is used within an application and that the same terminology is used between handheld applications. In the absence of guidelines, try to borrow ideas from applications that have been well designed and have a high degree of usability.

Prototype Presentation: Tips

UI Design Guidelines for Handheld Devices

(Stone & Open University, 2005, p. 384) (adapted from Weiss, 2002, pp. 66–70)

- **Consistency between platforms**

While the same terminology can be used between handheld applications, you will need to think carefully when adapting an application from a desktop to a handheld device. It is not necessarily the case that terminology that works for a desktop will work for the smaller screened handheld device.

Prototype Presentation: Tips

UI Design Guidelines for Handheld Devices

(Stone & Open University, 2005, p. 384) (adapted from Weiss, 2002, pp. 66–70)

- **Design stability**

In the event of, say, a connectivity failure, the system should allow the user to pick up from where he or she left off when the connection is restored. For example, if the user is completing some sort of form and a wireless connection goes down, the data in the fields from previously should not be lost and have to be reentered.

Prototype Presentation: Tips

UI Design Guidelines for Handheld Devices

(Stone & Open University, 2005, p. 384) (adapted from Weiss, 2002, pp. 66–70)

- **Provide feedback**

The system should support the user with feedback regarding what the application is doing. Feedback in relation to, say, the use of an application or navigation within it could be provided via an assigned information key.

Prototype Presentation: Tips

UI Design Guidelines for Handheld Devices

(Stone & Open University, 2005, p. 384) (adapted from Weiss, 2002, pp. 66–70)

- **Forgiveness**

The UI should be tolerant of user errors and provide an Undo function by, where feasible, a specially designated Back key.

Prototype Presentation: Tips

UI Design Guidelines for Handheld Devices

(Stone & Open University, 2005, p. 384) (adapted from Weiss, 2002, pp. 66–70)

- **Use metaphors**

Real-world metaphors in line with the size of the display should be used. For example, while a desktop metaphor would be inappropriate for a cell phone, the use of an address book for storing telephone numbers would be okay.

Prototype Presentation: Tips

UI Design Guidelines for Handheld Devices

(Stone & Open University, 2005, p. 385) (adapted from Weiss, 2002, pp. 66–70)

- **Clickable graphics should look clickable**

If a graphic is clickable, then it should have defined borders and the graphic should have high contrast with the background color. Conversely, graphics that are static should not appear to be clickable.

Prototype Presentation: Tips

UI Design Guidelines for Handheld Devices

(Stone & Open University, 2005, p. 385) (adapted from Weiss, 2002, pp. 66–70)

- **Use icons to clarify concepts**

Icons should be meaningful and representative of the concepts they are meant to convey.

Prototype Presentation: Tips

Most Important:

Be **CREATIVE** and
LOGICAL

and try something
NEW!

Reference Styles

How to cite

Reference Styles

- There are several types of reference styles.
- In some cases, such as submitting a paper for a conference, a specific style is required.
- In some countries all the academic material should follow the same reference style guidelines.

Reference Styles

- Helps to indentify the sources used in an academic work.

Reference Styles

Reference Styles

How to manage to learn and write in several types of reference styles?

Answer: Reference Manager

Reference Manager

Some of available tools and tips

Reference Manager

- It is possible to find several services regarding reference management.
- Some are free, some are paid.
- Your choice will depend on what you need from it.

Reference Manager

zotero

- Zotero (<https://zotero.org/>)

EndNote

- Endnote (<http://endnote.com/>)

 **MENDELEY**

- Mendeley (<http://mendeley.com/>)

 **RefWorks**

- RefWorks (<http://refworks.com/>)

citeulike 

- CiteULike (<http://citeulike.org/>)

JabRef

- JabRef (<http://jabref.sourceforge.net/>)

Papers

- Papers (<http://mekentosj.com/papers/>)

citavi

- Citavi (<http://citavi.com/>)

Reference Management

■ Reference Manager Overview

("Reference Manager Overview | Gobbledygook," n.d.)

		Zotero	EndNote	Mendeley	Refworks	CiteULike	JabRef	Papers	Citavi
Store Organize references on computer	Windows
