What is Learnist ?

what | how | culture | user's interaction | navigation | technology

Learnist is a **social learning platform** where everyone can share **knowledge**.

Initially launched to let teachers and students of all kinds create “learn boards”.
‘People, helping other people learn.’

What is the relation of Learnist with Cultural purposes?

what | how | culture | user's interaction | navigation | technology

Knowledge creation by sharing
reliable information.

01
Welcome to the Intro to Philosophy course

It's always difficult as a professor to decide just how to set up one's Introduction to Philosophy courses -- so many approaches one could take, so many thinkers and texts to cover, and it's all for students approaching Philosophy for the first (and if you screw it up -- last!) time in their lives. My preference is to take a historical approach, and that's what I'm doing here. The videos are, for the most part, taken from an Intro to Philosophy class I taught last year, but I've supplemented them with videos from my Ethics classes and my Existentialism series. I'm hoping to add more videos eventually -- dealing with Plotinus, Philo of Alexandria, St. Augustine, Boethius, John Locke, Benedict Spinoza, David Hume, G.W. F. Hegel, and others. And, over time, I'll provide some additional resources for study here as well. My hope is that you enjoy this course, and that you take it as just a starting point for further study of philosophy.

Introduction to Philosophy (Historical - Video Sequence)

by Gregory Brian Sadler

Category: [Education](#) | 390 views | Created: 09/12/12

This Introduction to Philosophy course explores great thinkers, their ideas, and their texts. In the course videos -- many recorded from my own classes -- I provide up-to-date examples to help students relate to the concepts and positions
