

Original	Suggestion	Comment
		<p>Context: A virtual lab, enable you to choose equipment and matters to do chemistry experiment.</p> <p>The original icon resembles water drop and point to choices for matter. But in chemistry, matter often exists in 3 states: liquid, solid and gas. The original can be misleading that they are more or less liquid</p> <p>The new one abuse the atomic icons which people are accustomed to. A Color scheme remains the same with addition of small shadow to help distinguishing itself in the context apart from other 2 icons</p>
