2018

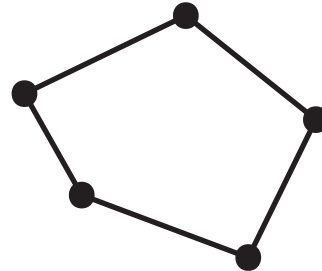

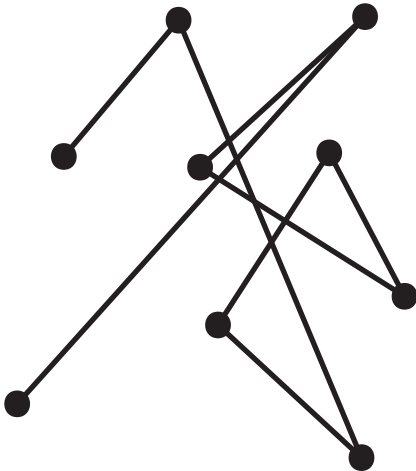

CONCEPT MAP

SELF - ORGANIZATION AS CONCEPT IN ART

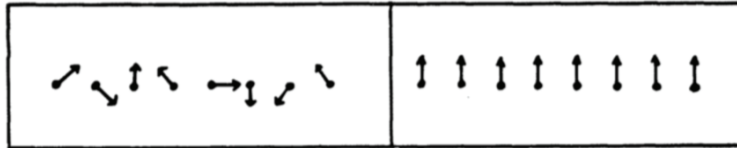

WHAT?

During the experiment made installation,
which will reflect the self-organization process follow
by bondary issue like chaos and order.

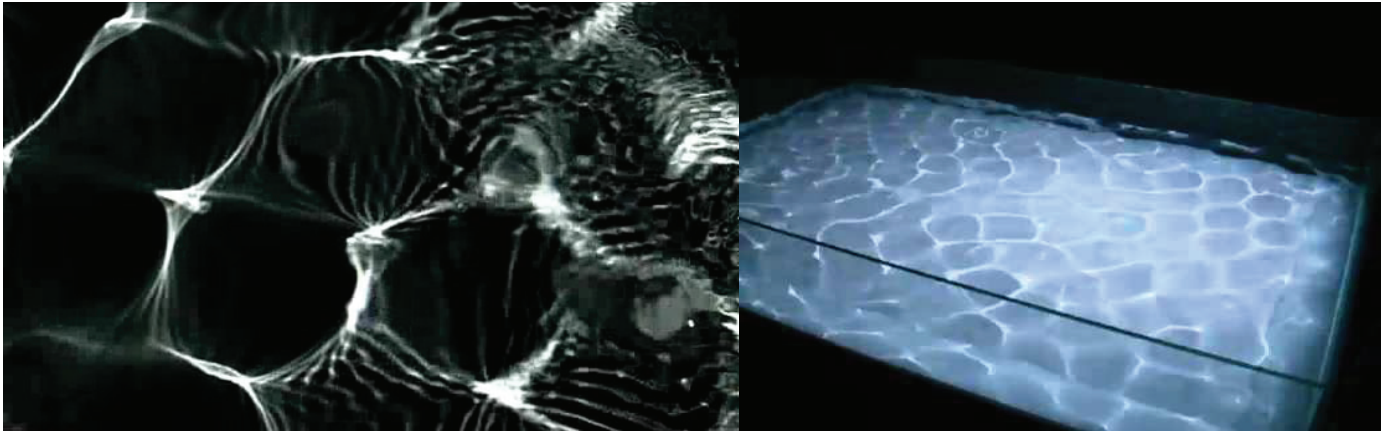

WHY?

The process is engaging and inspiring from fact that it explains the emergence of objects.

HOW?

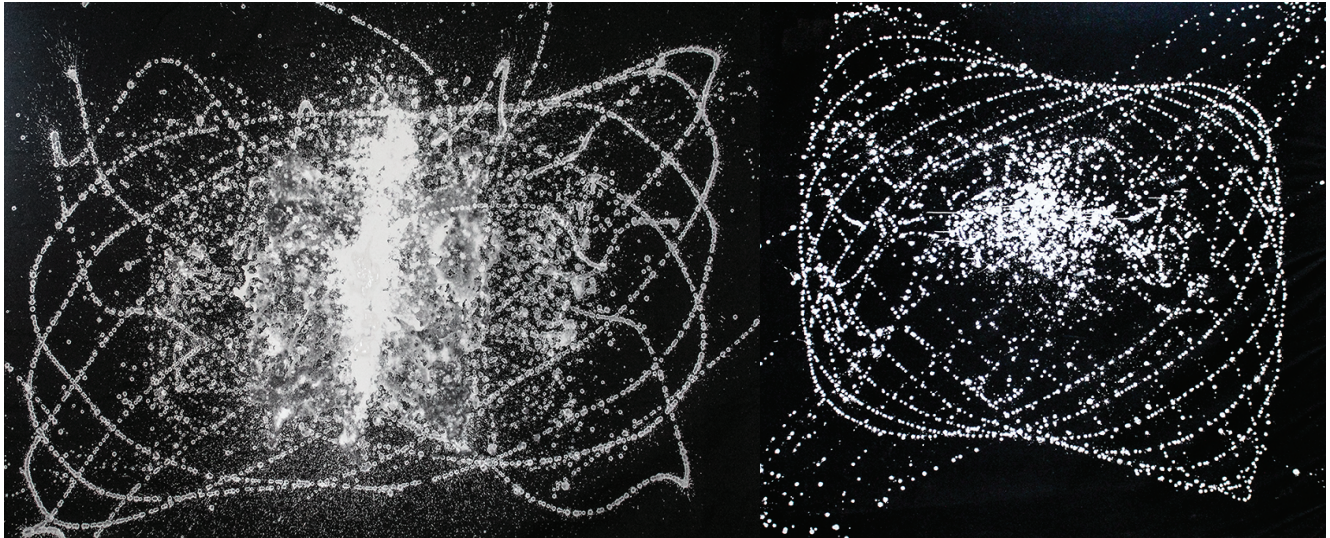

According to theoretical thots of physicist Hermann Haken about synergeticks, made self- organaizet mechanicism (installation) by using sound and water.

Voldemārs Johansons. *Aero Torrents*, 2007

SO WHAT?

Art reveals the discrete nature of science,
exposing fundamental representations,
in the search for unconventional aesthetic processes.
