 - Hunting – fishing – gathering
 - Contacts and influences
 - Raw materials and trade

- **Importance**
 - Unique sources are endangered
 - Prehistoric pile dwellings
 - World Heritage
- **Support**
 - Thanks (Acknowledgement to the sponsor)

Opinion:

User Interface Design: Overall design is good and user friendly.

Functionality: Fully functional and very easy to use.

Maps: The map is online. But offline detailed map could be a good option.

News: Good to gather all information about international exhibitions.

Articles: Nice option. But too much articles is not good for user.

Bug: The app stops occasionally. This bug should be fixed.

Features which I would like to use:

Map- The app has map feature of different museums and historical places. I would like to use map feature in my app prototype.

News- The app gives updated events/exhibitions about pile dwelling research and UNESCO world heritage. I would also like to use this feature.
