Opinion

1. The map used is of poor quality, making it hard to read for people with poor vision
2. The video and audio content is comprehensive and well created
3. The articles though decent, are poorly presented and fail to inspire the reader
4. There is no sharing or writing option provided for visitors to share the existing articles or create new ones
5. The images are of poor quality and seem out-dated for an app which belongs to the smart-phone generation
6. The UI though functional, is clunky and does not have a story driving its navigation
7. All the people involved in the development of the app are well credited in the **info** section
8. All the resources used from the open source community all also mentioned as references in the info page
