Describe the content structure of the app: <ul style="list-style-type: none"> - Welcome page with the sound of the water in the background - News - Map - Knowledge - Support 												
Opinion: Which features would you use in your prototype App, and why? <p>Its usage is very intuitive.</p> <p>The most interesting feature is the audio guide in which the final user can download an audio guide of its own interest. It is not necessary to download all the audio files from all sites the application</p> <p>It contains few tour description, the idea is good however is not well developed.</p>
