## Opinion

1. The design of the app looks pleasant and modern.
2. The audioguide(the core component) is pretty comprehensive and well structured.
3. The transition to the map window and the map itself is smoothless (on the tested device).
4. The booklet is a nice alternative to audioguide(in case of the lack of sound).
5. There is no sharing or writing option provided for visitors to share the existing articles or create new ones.
6. The menu is written in english while the content is in german. From the consistency point of view would be better to use just one language throughout the app.
7. The Glossary is a nice feature for people unfamiliar with certain specific terms.
