

Original	Proposal	Comments
		<p>The first picture (Pedestrian Zone) is installed in all possible populated (busy) places by German traffic Signs & Signals, in which they show a woman and a child representing a Family/Community . While in my opinion there should be man also because without man community/family is incomplete. One main block of the community/family had been neglected.</p> <p>So, I propose the second picture representing all members of the family man woman and child, which looks more perfect and appropriate for this purpose.</p>
