

Original	Proposal	Comment
		<p data-bbox="1010 353 1382 499">Original icon refers the category named "Video/Web" in https://www.indiegogo.com/.</p> <p data-bbox="1010 537 1382 891">Despite the fact, it is a category which is consist of two elements(Video and Web), it makes an impression that it stands only for web, since the logo looks like well known figure of world wide web which is a circles creates an earth shaped net.</p> <p data-bbox="1010 929 1382 1070">I propose to add a screen shape with a play button and a loading bar around the original icon.</p> <p data-bbox="1010 1108 1382 1249">Added screen implies that this category is also for videos whereas original icon stands for the web part.</p>
