 	 	<p>The icon that I selected is from Viber which is newly introduced for Public chat. I feel that's confusing until I don't open it, don't get to know what is it about?</p> <p>Therefore, redesigned icon has figure in it and make it more clear that user will follow somebody and spreading circles show social network.</p> <p>In my opinion, interface can be more improved if they include games (icon next to public chat) and public chat should be under one Social page. Social page should have three different icons.</p> <ul style="list-style-type: none">➤ Public Chat➤ News Feed➤ Games <p>Contacts page can be replaced with Social. Contacts icon can be next to search icon.</p>
