AVRO

Concept of the project

Polina Klimova

About the project

AVRO is a workflow management system for restorers.

It is a platform where all projects of a team of restorers come together. The system stores information about every restored object and history of its changes.
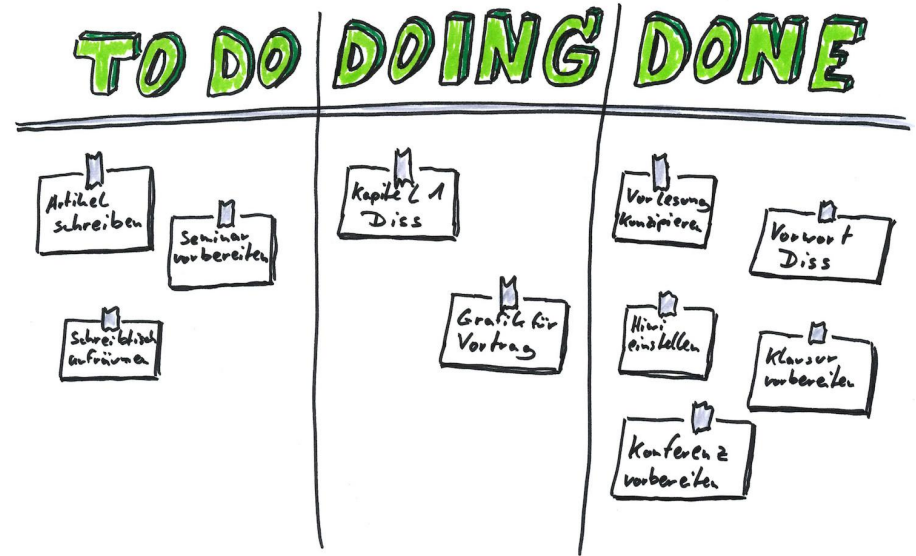

Questionnaire

How the process of restoration is organized?

Do you log object's changes during the process of restoration?

In what conditions do you restore the objects?

What specialists are saying

Every work plan has to be approved by Administrator before go life

We would like to keep the history of changes (descriptions Before and After, photos)

We need to have work plan with detailed descriptions inc. work conditions

Research

1. To-Do List Apps

Apple reminders

Google Tasks

Checkvist

2. GTD apps

Todoist

TickTick

OmniFocus
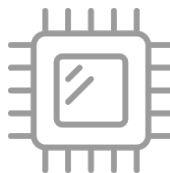

3. Kanban boards

Trello

Wrike

JIRA

Why AVRO?
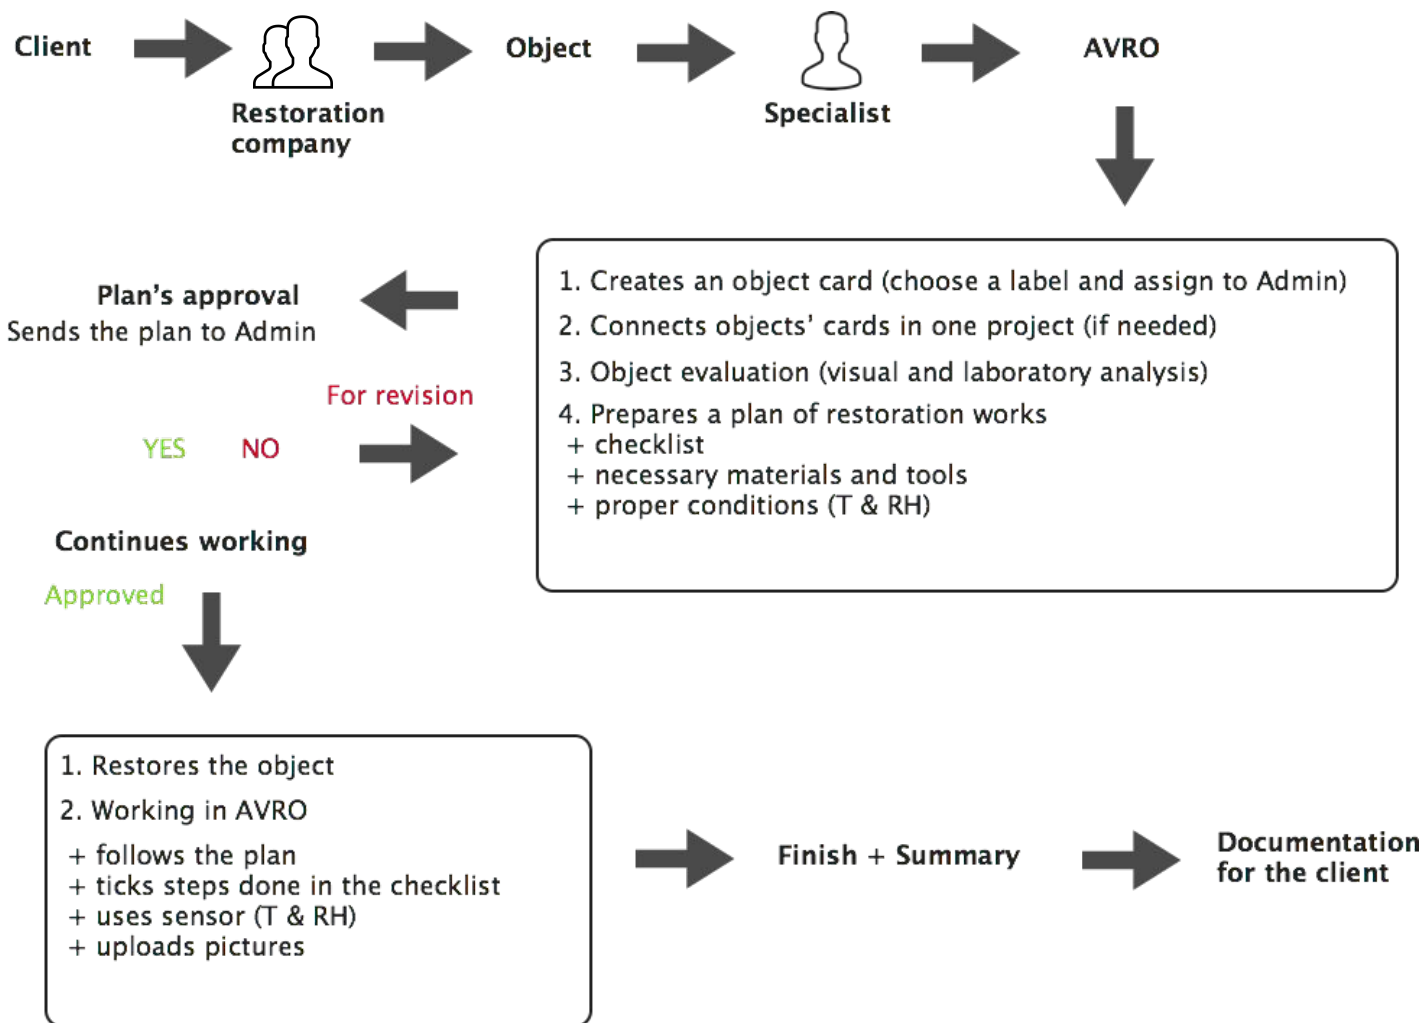

Specialized system for specific needs of restorers

Checklists for work plans

Integration with environment data logging system

Catalog of restored objects with history of their changes

Client → **Restoration company** → Object → **Specialist** → AVRO

↓

1. Creates an object card (choose a label and assign to Admin)

2. Connects objects' cards in one project (if needed)

3. Object evaluation (visual and laboratory analysis)

4. Prepares a plan of restoration works
 + checklist
 + necessary materials and tools
 + proper conditions (T & RH)

Plan's approval
Sends the plan to Admin ←

For revision →

YES   NO

Continues working

Approved

↓

1. Restores the object

2. Working in AVRO

+ follows the plan
+ ticks steps done in the checklist
+ uses sensor (T & RH)
+ uploads pictures

→ **Finish + Summary** → **Documentation for the client**
