Concept by
Shubhra Bhasker Bhatt

"Chari" is a system for people who want to make a health conscious and informed food choices every time they eat out.

Functionalities

- Calorific & Nutritional Information
 - Allergy Alerts
 - Drinks & Food Suggestion

Scenario-1

Fast Food Joint

Scenario-2

Fine Dine Restaurant

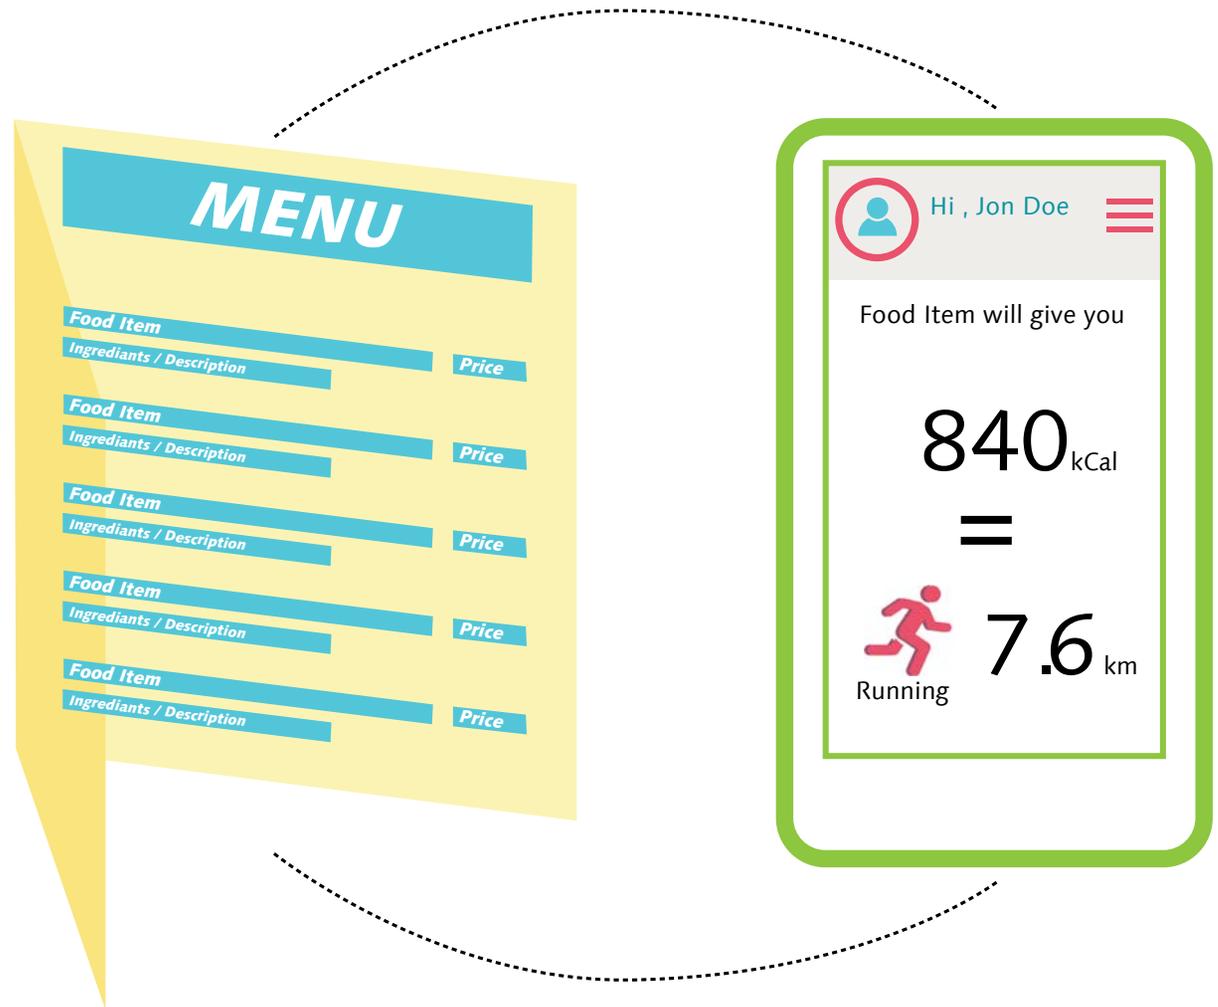

App Activation

Connection gets activated when the Smartphone taps the Menu Card.

Calorific & Nutritional Information

On touching the menu item the related calorie & Nutritional value will be displayed on the App. With Exercise comparison.

Allergy Alerts

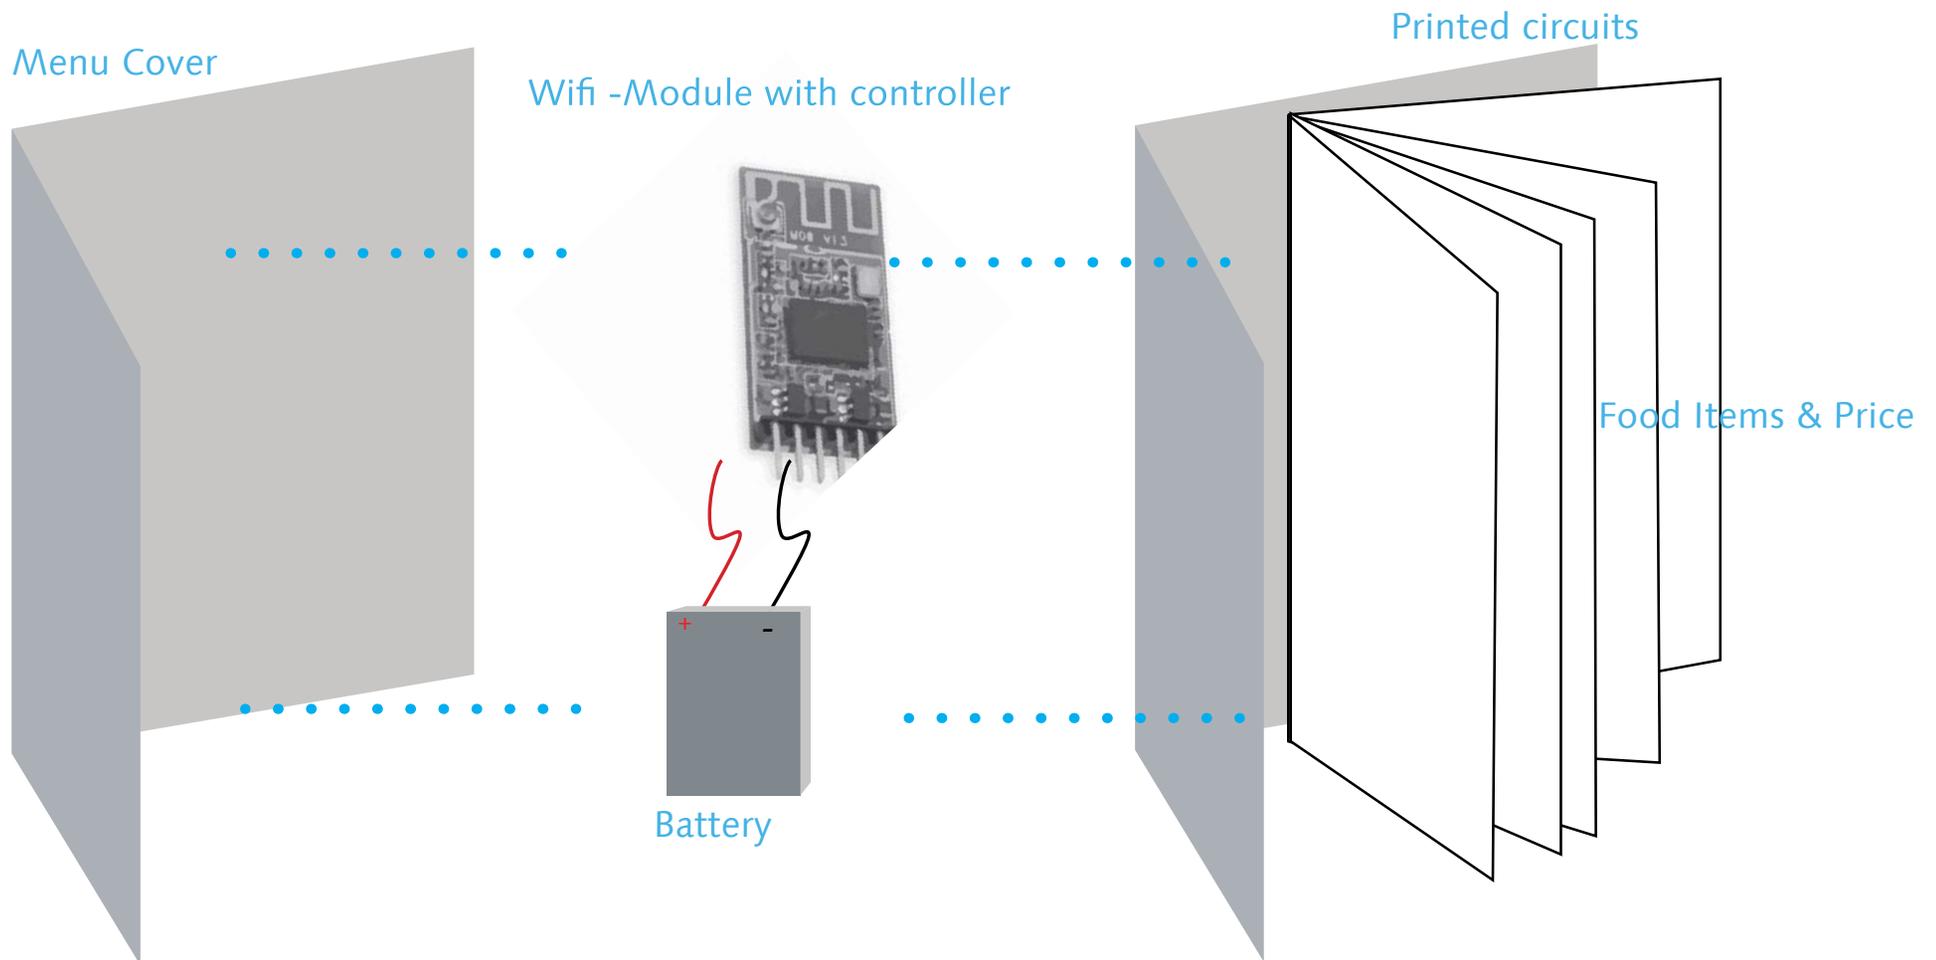

Based on user's medical History the App will suggest what food Items are not consumable.

Drinks & Food Suggestion

Based on user's preferences and choices
system will suggest which drinks &
food items the user can order

Circuit Concealation

For scenario-1 the circuit will be in the cover of the Menu Card.
