or too many

I thought about:

I thought about:

→ Grow Mycelium

I thought about:

→ Grow Mycelium

In a big flat container

I thought about:

→ Grow Mycelium

In a big flat container  
until there is a thick layer  
of it

I thought about:

→ Grow Mycelium

In a big flat container  
until there is a thick layer  
of it

Then take it out and  
iron it.

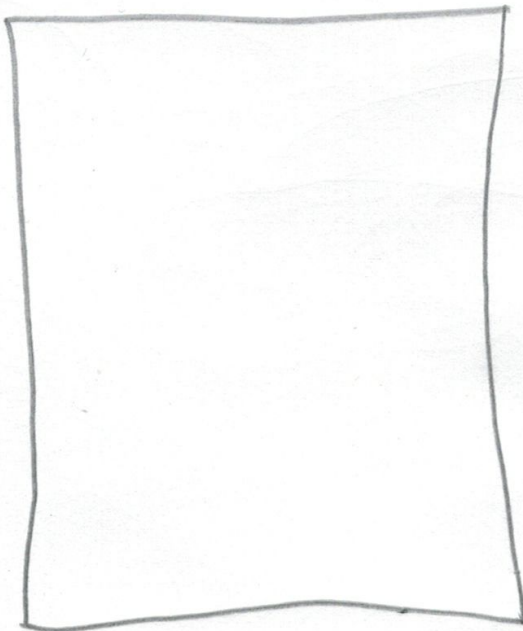

I thought about:

→ Grow Mycelium

In a big flat container  
until there is a thick layer  
of it

Then take it out and  
iron it.

And hope it  
would be nice  
Fungi Paper

Out of this paper,  
I would make a nice Fanzine:

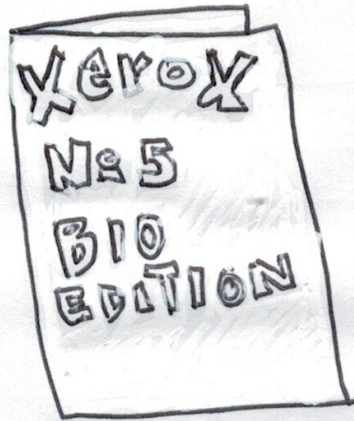

Out of this Paper,  
I would make a nice Fanzine;

It would be about  
How to make Paper  
out of Mycelium

Out of this paper,  
I would make a nice Fanzine;

It would be about  
How to make paper  
out of Mycelium

IT SHOULD BE PRINTED ON  
THE FUNGI PAPER  
screen

Out of this paper,  
I would make a nice Fanzine;

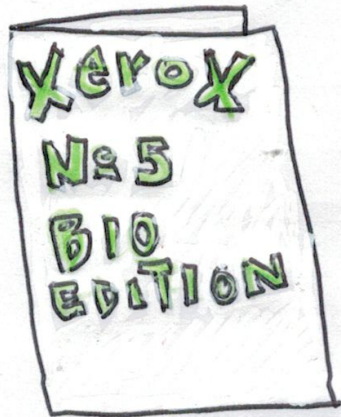

It would be about  
How to make paper  
out of Mycelium

screen  
IT SHOULD BE PRINTED ON  
THE FUNGI PAPER

And I would use liquid agar medium  
instead of colour

Out of this paper,  
I would make a nice Fanzine;

It would be about  
How to make paper  
out of Mycelium

**screen**  
**IT SHOULD BE PRINTED ON**  
**the fungi paper**

And I would use liquid agar medium  
instead of colour

and then grow bacteria or slime-  
molds in it to make the pictures  
and letters visible

Out of this paper,  
I would make a nice Fanzine:

It would be about  
How to make paper  
out of Mycelium

screen  
IT SHOULD BE PRINTED ON  
THE FUNGI PAPER

And I would use liquid agar medium  
instead of colour

and then grow bacteria or slime-  
molds in it to make the pictures  
and letters visible in a lot of  
different colours

But would that work out?

What to do with

Microbiology?

- No Idea -

But would that work out?

I'm not sure because:

But would that work out?

I'm not sure because:

The last mycelium is not growing because I didn't nurture it enough

# But would that work out?

I'm not sure because:

- The last mycelium is not growing because I didn't nurture it enough
- maybe it would fall apart because it's too brittle

•

# But would that work out?

I'm not sure because:

- The last mycelium is not growing because I didn't nurture it enough
- maybe it would fall apart because it's too brittle
- Bacteria get killed by Mycelium

But

# But would that work out?

I'm not sure because:

- The last mycelium is not growing because I didn't nurture it enough
- maybe it would fall apart because it's too brittle
- Bacteria get killed by Mycelium

But by ironing it, I would most likely kill the mycelium first...

# But would that work out?

I'm not sure because:

- The last mycelium is not growing because I didn't nurture it enough
- maybe it would fall apart because it's too brittle
- Bacteria get killed by Mycelium

But by ironing it, I would most likely kill the mycelium first...

Added to all those doubts. It would take very long, and maybe I lack motivation.
